

# DEA-C01 Latest Version & PDF DEA-C01 Cram Exam

## Latest Version: 6.0

### Question: 1

Streams cannot be created to query change data on which of the following objects? [Select All that Apply]

- A. Standard tables, including shared tables.
- B. Views, including secure views
- C. Directory tables
- D. Query Log Tables
- E. External tables

**Answer: D**

Explanation:  
Streams supports all the listed objects except Query Log tables.

### Question: 2

Tasks may optionally use table streams to provide a convenient way to continuously process new or changed data. A task can transform new or changed rows that a stream surfaces. Each time a task is scheduled to run, it can verify whether a stream contains change data for a table and either consume the change data or skip the current run if no change data exists. Which System Function can be used by Data engineer to verify whether a stream contains changed data for a table?

- A. SYSTEMSSTREAM\_HAS\_CHANGE\_DATA
- B. SYSTEMSSTREAM\_CDC\_DATA
- C. SYSTEMSSTREAM\_HAS\_DATA
- D. SYSTEMSSTREAM\_DELTA\_DATA

**Answer: C**

Explanation:  
SYSTEMSSTREAM\_HAS\_DATA  
Indicates whether a specified stream contains change data capture (CDC) records.

### Question: 3

1. `SYSTEMSSTREAM_HAS_DATA('SF_DATA', 'COL1')`
2. `SYSTEM$CLUSTERING_INFORMATION('SF_DATA', ('COL1, COL3'))`

As you all know that practicing with the wrong preparation material will waste your valuable money and many precious study hours. So you need to choose the most proper and verified preparation material with caution. Preparation material for the SnowPro Advanced: Data Engineer Certification Exam (DEA-C01) exam questions from PassTorrent helps to break down the most difficult concepts into easy-to-understand examples. Also, you will find that all the included questions are based on the last and updated DEA-C01 Exam Dumps version. We are sure that using DEA-C01 Exam Questions preparation material will support you in passing the DEA-C01 exam with confidence.

## Snowflake DEA-C01 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Data Transformation: The SnowPro Advanced: Data Engineer exam evaluates skills in using User-Defined Functions (UDFs), external functions, and stored procedures. It assesses the ability to handle semi-structured data and utilize Snowpark for transformations. This section ensures Snowflake engineers can effectively transform data within Snowflake environments, critical for data manipulation tasks.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Security:</b> The Security topic of the DEA-C01 test covers the principles of Snowflake security, including the management of system roles and data governance. It measures the ability to secure data and ensure compliance with policies, crucial for maintaining secure data environments for Snowflake Data Engineers and Software Engineers.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Data Movement:</b> Snowflake Data Engineers and Software Engineers are assessed on their proficiency to load, ingest, and troubleshoot data in Snowflake. It evaluates skills in building continuous data pipelines, configuring connectors, and designing data sharing solutions.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Performance Optimization:</b> This topic assesses the ability to optimize and troubleshoot underperforming queries in Snowflake. Candidates must demonstrate knowledge in configuring optimal solutions, utilizing caching, and monitoring data pipelines. It focuses on ensuring engineers can enhance performance based on specific scenarios, crucial for Snowflake Data Engineers and Software Engineers.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Storage and Data Protection:</b> The topic tests the implementation of data recovery features and the understanding of Snowflake's Time Travel and micro-partitions. Engineers are evaluated on their ability to create new environments through cloning and ensure data protection, highlighting essential skills for maintaining Snowflake data integrity and accessibility.</li> </ul>

## PDF DEA-C01 Cram Exam | DEA-C01 Latest Dumps

Our system will automatically deliver the newest version of our DEA-C01 exam questions to your via email after you pay for them. So you will never have to worry that the exam questions and answers will be outdated one day for our experts are always keeping on updating the DEA-C01 Study Materials to the most precise. As you can see, our DEA-C01 exam simulation really deserves your selection. Do not be afraid of making positive changes. It will add more colors to your life.

### Snowflake SnowPro Advanced: Data Engineer Certification Exam Sample Questions (Q30-Q35):

#### NEW QUESTION # 30

A data engineer needs to create an Amazon Athena table based on a subset of data from an existing Athena table named `cities_world`. The `cities_world` table contains cities that are located around the world. The data engineer must create a new table named `cities_us` to contain only the cities from `cities_world` that are located in the US.

Which SQL statement should the data engineer use to meet this requirement?

- A. `UPDATE cities_usa SET (city, state) = (SELECT city, state FROM cities_world WHERE country='usa');`
- B. `MOVE city, state FROM cities_world TO cities_usa WHERE country='usa';`
- C. `INSERT INTO cities_usa SELECT city, state FROM cities_world WHERE country='usa';`
- **D. `INSERT INTO cities_usa (city,state) SELECT city, state FROM cities_world WHERE country='usa';`**

**Answer: D**

#### NEW QUESTION # 31

If using a JavaScript UDF in a masking policy, Data Engineer needs to ensure the data type of the column, UDF, and masking policy match irrespective of case-sensitivity?

- **A. FALSE**
- B. TRUE

**Answer: A**

Explanation:  
Explanation

Please note JavaScript is case sensitive but if we are using a JavaScript UDF in a masking policy, ensure the data type of the

column, UDF, and masking policy match.

### NEW QUESTION # 32

A company stores customer data that contains personally identifiable information (PII) in an Amazon Redshift cluster. The company's marketing, claims, and analytics teams need to be able to access the customer data.

The marketing team should have access to obfuscated claim information but should have full access to customer contact information. The claims team should have access to customer information for each claim that the team processes. The analytics team should have access only to obfuscated PII data.

Which solution will enforce these data access requirements with the LEAST administrative overhead?

- A. Create a separate Redshift cluster for each team. Load only the required data for each team. Restrict access to clusters based on the teams.
- B. Move the customer data to an Amazon S3 bucket. Use AWS Lake Formation to create a data lake. Use fine-grained security capabilities to grant each team appropriate permissions to access the data.
- C. Create a separate Amazon Redshift database role for each team. Define masking policies that apply for each team separately. Attach appropriate masking policies to each team role.
- D. Create views that include required fields for each of the data requirements. Grant the teams access only to the view that each team requires.

**Answer: C**

### NEW QUESTION # 33

Which are the Cloud Platforms that Support Calling an External Function?

- A. AWS & AZURE
- B. GCP
- C. AWS,GCP,AZURE
- D. AWS only

**Answer: C**

### NEW QUESTION # 34

Two developers are working on separate application releases. The developers have created feature branches named Branch A and Branch B by using a GitHub repository's master branch as the source.

The developer for Branch A deployed code to the production system. The code for Branch B will merge into a master branch in the following week's scheduled application release.

Which command should the developer for Branch B run before the developer raises a pull request to the master branch?

- A. `git rebase master`
- B. `git diff branchB master`  
`git commit -m`
- C. `git fetch -b master`
- D. `git pull master`

**Answer: A**

Explanation:

Rebasing

In Git, there are two main ways to integrate changes from one branch into another: the merge and the rebase. In this section you'll learn what rebasing is, how to do it, why it's a pretty amazing tool, and in what cases you won't want to use it.

The Basic Rebase

If you go back to an earlier example from Basic Merging, you can see that you diverged your work and made commits on two different branches.

### NEW QUESTION # 35

.....

Our DEA-C01 practice dumps are so popular that all our customers are giving high praise on its high-quality to help them pass the exams. Numerous of warning feedbacks from our worthy customers give us data and confidence. We have clear data collected from customers who chose our DEA-C01 training engine, the passing rate is 98-100 percent. So your chance of getting success will be increased greatly by our DEA-C01 exam questions!
