### Exam Format, Cost, and Schedule

The LPI 010-160 test consists basically of 40 questions with a time frame of 60 minutes. The cost of sitting for this exam depends entirely on your country of residence. Thus, the residents of the USA will have to pay \$120 for taking 010-160. To schedule this exam, you must register with the Pearson VUE website and choose whether to take such a test online or in a testing center.

Lpi 010-160 Exam covers a wide range of topics, including the Linux command line, file management, scripting, networking fundamentals, and security. 010-160 exam consists of 40 multiple-choice questions and has a duration of 60 minutes. Candidates are required to achieve a score of at least 500 out of 800 to pass the exam and obtain the Linux Essentials Certificate.

### Lpi Linux Essentials Certificate Exam - version 1.6 Sample Questions (Q45-Q50):

#### NEW QUESTION # 45

Which of the following commands creates an archive file `work.tar` from the contents of the directory `/work/`?

- A. `tar -create work.tgz -content ./work/`
- B. `tar -cf work.tar ./work/`
- C. `tar work > work.tar`
- D. `tar --new work.tar ./work/`
- E. `tar work.tar < ./work/`

**Answer: B**

#### NEW QUESTION # 46

What is true about the `dmesg` command? (Choose two.)

- A. It displays the content of the Linux kernel's ring buffer.
- B. It traces the execution of a command and shows each step the program carries out.
- C. It sends messages to the command lines of all current user sessions.
- D. It might not display older information because it was overwritten by newer information.
- E. It immediately outputs all new messages written to the system journal.

**Answer: A,D**

#### NEW QUESTION # 47

What is true about a recursive directory listing?

- A. It includes the permissions of the directory listed.
- B. It includes a preview of content for each file in the directory.
- C. It includes the content of sub-directories.
- D. It includes ownership information for the files.
- E. It includes details of file system internals, such as inodes.

**Answer: C**

#### NEW QUESTION # 48

The ownership of the file doku.odt should be changed. The new owner is named tux. Which command accomplishes this change?

- A. `chmod u=tux doku.odt`
- B. `passwd doku.odt:tux`
- C. `newuser doku.odt tux`
- **D. `chown tux doku.odt`**
- E. `transfer tux: doku.odt`

**Answer: D**

Explanation:

Explanation

The correct command to change the ownership of the file doku.odt to a new owner named tux is `chown tux doku.odt`. This command uses the `chown` command, which stands for change owner, followed by the name of the new owner and the name of the file as arguments. The `chown` command allows you to change the user and/or group ownership of a given file, directory, or symbolic link<sup>12</sup>. The other options are incorrect because they use different commands or syntax that do not change the ownership of the file.

For example:

\* Option A uses the `chmod` command, which stands for change mode, and is used to change the permissions of files and directories, not the ownership<sup>3</sup>.

\* Option B uses the `newuser` command, which is used to create a new user account, not to change the ownership of a file<sup>4</sup>.

\* Option D uses the `transfer` command, which is not a valid Linux command.

\* Option E uses the `passwd` command, which is used to change the password of a user account, not the ownership of a file<sup>5</sup>.

## NEW QUESTION # 49

Which of the following statements is true about Free Software?

- A. It only runs on Linux.
- B. It is only distributed as a compiled binary.
- C. It is developed by volunteers only.
- D. It must always be available free of charge.
- **E. It may be modified by anyone using it.**

**Answer: E**

Explanation:

The correct statement about Free Software is that it may be modified by anyone using it. This is one of the four essential freedoms of Free Software, which are: the freedom to run the program as you wish, for any purpose; the freedom to study how the program works, and change it so it does your computing as you wish; the freedom to redistribute copies so you can help your neighbor; and the freedom to distribute copies of your modified versions to others<sup>1</sup>. Access to the source code is a precondition for these freedoms<sup>1</sup>.

The other statements are false for the following reasons:

Free Software is not developed by volunteers only. It can be developed by anyone, including individuals, companies, organizations, or communities. Some Free Software developers are paid for their work, while others do it as a hobby or for social benefit<sup>1</sup>.

Free Software does not have to be available free of charge. It can be sold or given away for any price. The term "free" refers to the users' freedom, not the price of the software<sup>1</sup>. However, Free Software users have the freedom to redistribute copies, so they can obtain the software at no charge from someone who has a copy<sup>1</sup>.

Free Software does not only run on Linux. It can run on any operating system that supports it, such as Windows, MacOS, BSD, or Android. Linux is an example of a Free Software operating system, but not the only one<sup>1</sup>.

Free Software is not only distributed as a compiled binary. It can also be distributed as source code, or both. In fact, Free Software must provide access to the source code, otherwise the users cannot study or modify the software<sup>1</sup>.
