If you use our products, you will just need to spend 20-30 hours to take your exam.

Salesforce Certified Platform Administrator II Sample Questions (Q143-Q148):

NEW QUESTION # 143

Sales managers at Ursa Major Solar have asked for some additional automation around opportunity reminders. If the opportunity is in the Proposal stage a week before the close date, they want an email sent to the opportunity owner and manager. If the Budget Approved custom field is checked, the managers want to be notified immediately.

How should these requirements be met without using code?

- A. Create a schedule-triggered flow for the Opportunity object. Configure the trigger to flow daily.
- B. Create a record-triggered flow with scheduled paths. Configure the trigger to flow after the record is saved.
- C. Create a record-triggered flow with scheduled paths. Configure the trigger to flow before the record is saved.
- D. Create a schedule-triggered flow. Configure the trigger to flow weekly.

Answer: B

Explanation:
A record-triggered flow lets you automate actions when a record is created or updated. You can use scheduled paths to schedule actions relative to a date field on the record, such as close date. You should configure the trigger to flow after the record is saved so that you can access the updated field values. References:
https://help.salesforce.com/s/articleView?id=sf.flow_concepts_trigger_types_record.htm&type=5

NEW QUESTION # 144

The Cloud Kicks security team has seen an increase in unattended device attacks, where hackers can view sensitive information when users leave devices unlocked in public settings. The security team wants to ensure Salesforce data cannot be viewed after 10 minutes of inactivity.

What is the recommended security setting to configure?

- A. Enforce login IP ranges on every request.
- B. Force logout on session timeout.
- C. Lock sessions to the domain in which they were first used.
- D. Require a high assurance session.

Answer: B

Explanation:
Force logout on session timeout is the recommended security setting to configure because it prevents users from resuming their sessions after they time out due to inactivity, which reduces the risk of unauthorized access to Salesforce data from unattended devices. References: https://help.salesforce.com/s/articleView?id=sf.security_sessions_logout.htm&type=5

NEW QUESTION # 145

Cloud Kicks has a Process Builder which should trigger upon a status change from on approval process. The Process Builder triggers if the status is updated manually, but not as a result or the approval process update.

What could the administrator do to troubleshoot the issue?

- A. Check the Approval Process to make sure it is on the correct version.
- B. Check the Reevaluate Workflow Rules After Field Change box on the Approval Process Field Update Action.
- C. Turn Recursion the Process Builder under the Advanced Settings so the Process Builder fires again.
- D. Change the value with a Specific New Field Value so the Process Builder knows what value to look for.

Answer: B

Explanation:
Check the Reevaluate Workflow Rules After Field Change box on the Approval Process Field Update Action is what the administrator should do to troubleshoot the issue. This option allows the approval process field update to trigger any workflow rules or processes that are based on the updated field value. If this option is not checked, the approval process field update will not trigger any workflow rules or processes, and the Process Builder will not fire

NEW QUESTION # 146

AW Computing sells a variety of software programs for Its customers to choose from. Management wants to ensure that the customer automatically receives phone support when they purchase photo editing. software.

how should an administrator meet these retirements?

- A. Include a milestone to the product with a term of 365 days for phone support.
- B. Add an entitlement template to the pressure conduct for phone support.
- C. Create a flow to attach an entitlement to the asset upon purchase.
- D. Configure a flow to create a milestone co the asset upon purchase.

Answer: C

Explanation:
An entitlement is a record that represents a customer's right to receive support or service based on the terms of a contract or agreement. An asset is a record that represents a product that a customer has purchased. To automatically provide phone support to customers who purchase photo editing software, the administrator can create a flow that attaches an entitlement to the asset upon purchase. The entitlement can have a term of 365 days and a service contract that specifies the phone support details. References: https://help.salesforce.com/s
/articleView?id=sf.entitlements_overview.htm&type=5 https://help.salesforce.com/s/articleView?id=sf.
assets_overview.htm&type=5

NEW QUESTION # 147
Cloud Kicks (CK) has a backup team of employees that helps short-staffed departments. These users could be working with sales one day and service the next. CK is implementing new Lightning record pages for each department so that they view records In a way that makes sense for each department.
How should the administrator ensure this Is configured correctly?

- A. Configure ore app per department and activate record pages for each app.
- B. Allow the backup team users to update their own profile with Delegated Administration.
- C. Adjust the profile of the backup users each day to align with the proper access they require.
- D. Create permission sets for each department and assign them to the backup team users.

Answer: A

Explanation:
Configure one app per department and activate record pages for each app is how the administrator should ensure this is configured correctly. An app is a collection of items that work together to serve a particular function for a group of users. An app can include items such as tabs, objects, reports, dashboards, and record pages. A record page is a type of Lightning page that displays details about a specific record. A record page can be customized using Lightning App Builder and activated for different apps, profiles, or record types. By configuring one app per department and activating record pages for each app, the administrator can ensure that the backup team users can view records in a way that makes sense for each department depending on which app they are using.
