- Manage sprint
- Edit an issue's due date

- A. Schedule Issues
- B. Manage Sprints
- C. Manage Versions
- D. Edit Issues
- E. Manage Components
- F. Administer Projects

Answer: A,B,D,F

NEW QUESTION # 45
Which Jira user type is the most suitable for Nash for the following responsibilities?
- Manage project roles membership.
- Update project details and basic settings.
- Manage boards and field layout.

- A. Jira Software users
- B. Jira administrator
- C. Site administrator
- D. Project administrator

Answer: D

NEW QUESTION # 46
Nina recently joined as a finance manager. Her team already has a few Jira projects running that is related to finance projects. She needs to create a new project using the same configurations as the other finance projects.
Below is the configuration she used to create the project.
What will happen to Nina's Jira project (RMC) if the team that is managing the USC project changed their Jira configuration?

- A. All answers are incorrect.
- B. Nina has permission to accept the configuration changes if she needs them.
- C. Any changes with the other team's Jira project will automatically apply to Nina's Jira project.
- D. Nothing will happen. Jira will only apply the configuration changes at the initial Jira project creation.

Answer: B

NEW QUESTION # 47
A team needs a board that meets these requirements:
All issues can be moved across the entire workflow on a single view of the board.

Issues can be worked in a continuous flow without start and stop dates.
Which board configuration meets the requirements?

- A. Scrum board with swimlanes
- B. Scrum board without parallel sprints
- C. Kanban board with backlog
- D. Kanban board without backlog

Answer: D

Explanation:
A Kanban board without backlog displays all issues on a single view and supports a continuous workflow without start and stop dates. This setup is ideal for teams using a continuous delivery process, allowing issues to move freely across the entire workflow.

NEW QUESTION # 48
Razi's team and Dom's team are working on the same backlog, but they have their own active sprint.
Which of the following are true about parallel sprints? (Choose three.)

- A. Users cannot have a separate velocity chart for each team.
- B. Users can run up to 2 parallel sprints only.
- C. If users want to complete active sprint A with unresolved issues, they cannot move it to active sprint B.
- D. Project administrators can disable the parallel sprint feature for their projects.
- E. Users cannot complete multiple active sprints at once.

Answer: A,C,E

NEW QUESTION # 49
