Reliable Splunk - SPLK-1003 - Splunk Enterprise Certified Admin Pdf Format

Our company's top SPLK-1003 exam braindumps are meant to deliver you the best knowledge on this subject. If you study with our SPLK-1003 study guide, you will find that not only you can get the most professional and specialized skills to solve the

problems in your daily work, but also you can pass the exam without difficulty and achieve the certification. What is more, the prices of our SPLK-1003 training engine are quite favorable.

The SPLK-1003 certification exam is a performance-based exam that requires candidates to demonstrate their practical knowledge and skills in administering Splunk Enterprise environments. SPLK-1003 exam covers a range of topics, including installation and configuration, data inputs and forwarders, search and reporting, user management, and monitoring and troubleshooting. SPLK-1003 exam is designed to test the candidate's ability to deploy and manage Splunk Enterprise environments in a variety of scenarios.

To prepare for the SPLK-1003 Exam, candidates can take Splunk's official training courses, which cover all the topics included in the exam. Additionally, candidates can use Splunk's documentation and online resources to gain a deeper understanding of the platform's capabilities and best practices for its administration. Practice exams and study groups can also be helpful in preparing for the exam.

Splunk Enterprise Certified Admin Sample Questions (Q14-Q19):

NEW QUESTION # 14

Which configuration file would be used to forward the Splunk internal logs from a search head to the indexer?

- **A. outputs.conf**
- B. collections.conf
- C. props.conf
- D. inputs.conf

Answer: A

Explanation:

<https://docs.splunk.com/Documentation/Splunk/8.1.1/DistSearch/Forwardsearchheaddata> Per the provided Splunk reference URL by @hwangho, scroll to section Forward search head data, subsection titled, 2. Configure the search head as a forwarder. "Create an outputs.conf file on the search head that configures the search head for load-balanced forwarding across the set of search peers (indexers)."

NEW QUESTION # 15

What are the required stanza attributes when configuring the transforms.conf to manipulate or remove events?

- **A. REGEX, DEST_KEY, FORMAT**
- B. REGEX, DEST_KEY FORMATTING
- C. REGEX, SRC_KEY, FORMAT
- D. REGEX, DEST. FORMAT

Answer: A

NEW QUESTION # 16

An admin updates the Role to Group mapping for external authentication. How does the change affect users that are currently logged into Splunk?

- A. The role update terminates the user's current session, and they have to log back in.
- **B. Users will continue to operate under their previous role until the next time they log into Splunk.**
- C. Only newly created user accounts are affected by the role change.
- D. Search is disabled until users reauthenticate.

Answer: B

Explanation:

Splunk checks role-to-group mapping only during user login for external authentication (e.g., LDAP, SAML).

Users already logged in will continue using their previously assigned roles until they log out and log back in.

The changes to role mapping do not disrupt ongoing sessions.

Incorrect Options:

B:Search is not disabled upon role updates.

C:This is incorrect since existing users are also updated upon the next login.

D:Role updates do not terminate ongoing sessions.

NEW QUESTION # 17

Running this search in a distributed environment:

On what Splunk component does the eval command get executed?

- A. Search heads
- B. Universal Forwarders
- C. Heavy Forwarders
- **D. Search peers**

Answer: D

Explanation:

The eval command is a distributable streaming command, which means that it can run on the search peers in a distributed environment¹. The search peers are the indexers that store the data and perform the initial steps of the search processing². The eval command calculates an expression and puts the resulting value into a search results field¹. In your search, you are using the eval command to create a new field called

"responsible_team" based on the values in the "account" field.

NEW QUESTION # 18

What are the required stanza attributes when configuring the transforms. conf to manipulate or remove events?

- **A. REGEX, DEST_KEY, FORMAT**
- B. REGEX.SRC_KEY, FORMAT
- C. REGEX, DEST_KEY FORMATTING
- D. REGEX, DEST. FORMAT

Answer: A

Explanation:

Explanation

REGEX = <regular expression>

* Enter a regular expression to operate on your data.

FORMAT = <string>

* NOTE: This option is valid for both index-time and search-time field extraction. Index-time field extraction configuration require the FORMAT settings. The FORMAT settings is optional for search-time field extraction configurations.

* This setting specifies the format of the event, including any field names or values you want to add.

DEST_KEY = <key>

* NOTE: This setting is only valid for index-time field extractions.

* Specifies where SPLUNK software stores the expanded FORMAT results in accordance with the REGEX match.
