New C-BCFIN-2502 Actual Braindumps 100% Pass | Efficient C-BCFIN-2502: SAP Certified Associate - Positioning SAP Business Suite via SAP Financial Management Solutions 100% Pass

The hit rate of C-BCFIN-2502 study engine is very high. Imagine how happy it would be to take a familiar examination paper in a familiar environment! You can easily pass the exam, after using C-BCFIN-2502 training materials. You no longer have to worry about after the exam. At the moment you put the paper down you can walk out of the examination room with confidence. C-BCFIN-2502 study engine is so amazing. What are you waiting for?

SAP Certified Associate - Positioning SAP Business Suite via SAP Financial Management Solutions Sample Questions (Q24-Q29):

NEW QUESTION # 24

Which of the following is a key feature of SAP Datasphere?

- A. Batch-based reporting
- **B. Real-time data unification**
- C. Limited data integration
- D. Manual data entry

Answer: B

NEW QUESTION # 25

Which processes does SAP Global Trade Services most closely support?

Note: There are 2 correct answers to this question.

- **A. Purchasing**
- **B. Sales**
- C. Marketing
- D. Production

Answer: A,B

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

SAP Global Trade Services (GTS) is an essential component of the finance and risk landscape, specifically designed to manage the complexities of international trade. It is most closely integrated with the Sales and Purchasing processes. In the Purchasing (Procurement) process, GTS ensures that goods being imported meet all regulatory requirements, checks for sanctioned suppliers, and calculates the appropriate customs duties to be included in the landed cost.

In the Sales (Order-to-Cash) process, GTS performs critical "Sanctioned Party Screening" to ensure that the company is not selling to prohibited individuals or entities. It also manages export licenses and ensures that the goods being shipped comply with the export laws of the origin country and the import laws of the destination. If a violation is detected during either the Sales or Purchasing cycle, GTS can automatically place a "block" on the transaction in the SAP S/4HANA core, preventing further processing until the issue is resolved. This tight integration ensures that trade compliance is not a bottleneck but a real-time safeguard embedded into the supply chain and financial workflows. Marketing and Production, while related to the business, do not typically trigger the cross-border legal and financial compliance checks that define the core function of SAP GTS.

NEW QUESTION # 26

To which core function of the record to report process is SAP S/4HANA Cloud for group reporting most relevant?

- **A. Close**
- B. Report
- C. Account
- D. Record

Answer: A

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

The Record-to-Report (R2R) process encompasses everything from capturing a business transaction to the final disclosure of financial results. Within this cycle, SAP S/4HANA Cloud for group reporting is specifically designed to address the Close function, specifically the corporate consolidation phase. In large organizations with multiple legal entities, the "closing" process involves not just local entity closes, but also the aggregation of data, intercompany eliminations, and currency translations required for group-level reporting.

SAP S/4HANA Cloud for group reporting is uniquely positioned because it is integrated directly into the SAP S/4HANA core. This

allows for "continuous accounting" where local data is available for consolidation without the traditional, time-consuming Extract-Transform-Load (ETL) processes required by legacy consolidation tools. By focusing on the Close phase, it ensures that the consolidated financial statements are produced quickly and accurately, meeting the stringent deadlines of regulatory bodies. It bridges the gap between local accounting (the "Record" and "Account" phases) and the final dissemination of results (the "Report" phase), making it the engine that powers the complex financial close of a multi-entity enterprise.

NEW QUESTION # 27

Which SAP function within International Trade Management is designed to optimize costs by efficiently handling import and duties?

- A. Trade Preference Management
- B. Sanctioned Party Screening
- C. Customs Management
- D. Compliance Business Partner Management

Answer: C

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

Within the SAP Global Trade Services (GTS) framework, Customs Management is the specific functional area dedicated to the technical and financial aspects of moving goods across borders. While compliance- focused modules ensure you are "allowed" to trade, Customs Management focuses on the "how" and the

"cost." It automates the calculation of duties and taxes based on the Harmonized System (HS) codes and the value of the goods, ensuring that companies pay the correct amount- and not more.

By leveraging Customs Management, organizations can participate in special customs procedures such as bonded warehousing or foreign trade zones (FTZ), which allow for the deferral or reduction of duty payments.

It facilitates direct electronic communication with customs authorities, speeding up the clearance process and reducing the risk of costly storage fees at ports. For the CFO, this represents a significant opportunity for cost optimization and cash flow management.

By automating the filing of entry summaries and import declarations, SAP ensures that the organization maintains a high level of accuracy in its financial records related to landed costs, directly impacting the gross margin and overall profitability of international operations.

NEW QUESTION # 28

Which of the following is a key feature of SAP Analytics Cloud?

- A. Manual data integration
- B. Limited data visualization
- C. Real-time insights and predictive analytics
- D. No support for financial reporting

Answer: C

NEW QUESTION # 29

.....
