API-580 Reliable Test Test - API-580 Test Online

API-580 exam dumps provided by TrainingDumps are tested through practice, and are the most correct and the newest practical API-580 test dumps. Our TrainingDumps can provide accurate API-580 certification training questions based on extensive research and the experience of real world to make you pass API-580 Certification Exam in a short time. If you purchase our API-580 exam dumps, we will offer free update service within one year.

API Risk Based Inspection Professional Sample Questions (Q43-Q48):

NEW QUESTION # 43

If operating condition have changed, deterioration rates based on inspection data from the previous operating conditions

- A. Valid till the equipment exists with any change
- B. Can be valid with some correction by engineers
- C. May not be valid

Answer: C

NEW QUESTION # 44

If operating condition have changed, deterioration rates based on inspection data from the previous operating conditions

- A. Valid till the equipment exists with any change
- B. Can be valid with some correction by engineers
- C. May not be valid

Answer: C

NEW QUESTION # 45

Depending on factors such as the remaining life of the equipment and the type of damage mechanism, risk management through inspection:

- A. is the least cost-effective.
- B. may have little or no effect.
- C. is most effective in reducing risk.
- D. results in a decrease in inspection frequencies.

Answer: B

Explanation:

API 580, Section 12.4 states:

"Depending on factors such as the remaining life of the equipment and type of damage mechanism, risk management through inspection may have little or no effect." Examples include:

Instantaneous failures

Equipment at end of life

Damage mechanisms not detectable through inspection

Reference: API 580, 2nd Edition (2016), Section 12.4

-

NEW QUESTION # 46

Which of the following statements is correct with regard to the potential reduction of inspection cost by using RBI?

- A. On-stream inspections are as effective as internal inspections.
- B. Equipment integrity is the focus.
- C. RBI will eliminate many internal inspections.
- D. RBI will probably raise the total cost of inspection for a given unit.

Answer: B

Explanation:

API 580 highlights that while cost reduction is a potential benefit of RBI, the true focus is risk management and equipment integrity.

From Section 12.5:

"Inspection costs can be more effectively managed through the use of RBI... The user should recognize that while there is a potential for the reduction of inspection costs through the utilization of RBI, increased equipment integrity and inspection cost optimization should remain the focus." This confirms that the main driver for RBI is not cost elimination, but rather the intelligent allocation of inspection resources to preserve equipment integrity.

Option B is incorrect because RBI does not guarantee elimination of internal inspections - only that some may be deferred or replaced with alternative methods.

Option C generalizes effectiveness without case-by-case evaluation.

Option D is false; RBI is designed to optimize, not increase costs.

Reference: API 580, 2nd Edition (2016), Section 12.5

NEW QUESTION # 47

The models are evaluated _____ to provide both qualitative and quantitative insights about the level of risk and to identify

the design, site, or operational characteristics that are the most important to risk

- A. Probabilistically
- B. Statistically
- C. Logically
- D. Linearly

Answer: C

NEW QUESTION # 48

.....
