

Pass Guaranteed 2026 Cisco 300-410: Implementing Cisco Enterprise Advanced Routing and Services Perfect Test Quiz

What's more, part of that BraindumpsPrep 300-410 dumps now are free: https://drive.google.com/open?id=1liQFPZJNHq_LHrk498w1go7MN9n2COs

These experts are committed and work together and verify each 300-410 exam question so that you can get the real, valid, and updated Implementing Cisco Enterprise Advanced Routing and Services (300-410) exam practice questions all the time. So you do not need to get worried, countless 300-410 exam candidates have already passed their dream Cisco 300-410 Certification Exam and they all got help from real, valid, and error-free 300-410 exam practice questions. So you also need to think about your future and advance your career with the badge of 300-410 certification exam.

The Cisco 300-410 Exam covers a variety of topics, such as implementing OSPFv2/v3, EIGRP for IPv4/IPv6, BGP, and MPLS. It also covers the configuration and management of different VPN technologies like DMVPN, FlexVPN, and Site-to-Site VPN. Additionally, the exam covers the implementation of infrastructure services such as QoS, NAT, and DHCP.

100% Pass Quiz 2026 Cisco Pass-Sure 300-410: Implementing Cisco Enterprise Advanced Routing and Services Test Quiz

The unmatched and the most workable study guides of BraindumpsPrep are your real destination to achieve your goal. The pathway to pass 300-410 was not so easy and perfectly reliable as it has become now with the help of our products. Just you need to spend

a few hours daily for two week and you can surely get the best insight of the syllabus and command over it. The 300-410 Questions and answers in the guide are meant to deliver you simplified and the most up to date information in as fewer words as possible.

Cisco Implementing Cisco Enterprise Advanced Routing and Services Sample Questions (Q164-Q169):

NEW QUESTION # 164

Refer to the exhibit.

A network administrator is using the DNA Assurance Dashboard panel to troubleshoot an OSPF adjacency that failed between Edge_NYC interface GigabitEthernet1/3 with Neighbor Edge_SNJ. The administrator observes that the neighborship is stuck in exstart state. How does the administrator fix this issue?

- A. Configure to match the OSPF interface speed and duplex settings on both routers.
- B. Configure to match the OSPF interface unique IP address and subnet mask on both routers.
- **C. Configure to match the OSPF interface MTU settings on both routers.**
- D. Configure to match the OSPF interface network types on both routers.

Answer: C

Explanation:

<https://www.cisco.com/c/en/us/support/docs/ip/open-shortest-path-first-ospf/13684-12.html> After two OSPF neighboring routers establish bi-directional communication and complete DR/BDR election (on multi-access networks), the routers transition to the exstart state. In this state, the neighboring routers establish a master/slave relationship and determine the initial database descriptor (DBD) sequence number to use while exchanging DBD packets.

Neighbors Stuck in Exstart/Exchange State The problem occurs most frequently when attempting to run OSPF between a Cisco router and another vendor's router. The problem occurs when the maximum transmission unit (MTU) settings for neighboring router interfaces don't match. If the router with the higher MTU sends a packet larger than the MTU set on the neighboring router, the neighboring router ignores the packet.

NEW QUESTION # 165

The network administrator configured R1 for Control Plane Policing so that the inbound Telnet traffic is policed to 100 kbps. This policy must not apply to traffic coming in from 10.1.1.1/32 and 172.16.1.1/32. The administrator has configured this:

```

access-list 101 permit tcp host 10.1.1.1 any eq 23
access-list 101 permit tcp host 172.16.1.1 any eq 23
!
class-map CoPP-TELNET
match access-group 101
!
policy-map PM-CoPP
class CoPP-TELNET
police 100000 conform transmit exceed drop
!
control-plane
service-policy input PM-CoPP

```

The network administrator is not getting the desired results. Which set of configurations resolves this issue?

- A. control-planeno service-policy input PM-CoPPservice-policy input PM-CoPP
- B. no access-list 101access-list 101 deny tcp host 10.1.1.1 any eq 23access-list 101 deny tcp host 172.16.1.1 any eq 23access-list 101 permit ip any any!interface E0/0service-policy input PM-CoPP
- C. control-planeno service-policy input PM-CoPP!interface Ethernet 0/0service-policy input PM-CoPP
- **D. no access-list 101access-list 101 deny tcp host 10.1.1.1 any eq 23access-list 101 deny tcp host 172.16.1.1 any eq 23access-list 101 permit ip any any**

Answer: D

Explanation:

Packets that match a deny rule are excluded from that class and cascade to the next class (if one exists) for classification. Therefore if we don't want to CoPP traffic from 10.1.1.1/32 and 172.16.1.1/32, we must "deny" them in the ACL.

NEW QUESTION # 166

What are two characteristics of VRF instance? (Choose two.)

- A. Each VRF has a different set of routing and CEF tables
- **B. A customer site can be associated to different VRFs**
- C. It is defined by the VPN membership of a customer site attached to a P device.
- **D. An interface must be associated to one VRF.**
- E. All VRFs share customers routing and CEF tables .

Answer: B,D

Explanation:

Reference:

https://www.cisco.com/c/en/us/td/docs/ios-xml/ios/mp_l3_vpns/configuration/15-s/mp-l3-vpns-15-s-book/mp-bgp-mpls-vpn.pdf

NEW QUESTION # 167

The network administrator deployed the Binding Table Recovery feature. Which two devices recover the missing binding table entries? (Choose two.)

- A. DHCP client
- **B. DHCP server**
- C. source host
- **D. destination host**
- E. DHCP relay agent

Answer: B,D

NEW QUESTION # 168

Refer to the exhibit.

An engineer configured NetFlow to capture traffic information through the router, but it is not working as expected. Which action captures the flow information from this router to the collector?

- A. Configure more than one flow exporter destination addresses.
- B. Change the flow exporter transport protocol from UDP to TCP
- C. Change the interface configuration FLOW-MONITOR-1 from input to output.
- **D. Configure a flow exporter under flow FLOW-MONITOR-1.**

Answer: D

NEW QUESTION # 169
