Desktop Based Associate-Cloud-Engineer Google Associate Cloud Engineer Exam Practice Test Software

The exam questions and answers of general Google certification exams are produced by the Google specialist professional experience. Actualtests4sure just have these Google experts to provide you with practice questions and answers of the exam to help you pass the exam successfully. Our Actualtests4sure's practice questions and answers have 100% accuracy. Purchasing products of Actualtests4sure you can easily obtain Google certification and so that you will have a very great improvement in Associate-Cloud-Engineer area.

Google Associate Cloud Engineer Exam Sample Questions (Q251-Q256):

NEW QUESTION # 251
You are the project owner of a GCP project and want to delegate control to colleagues to manage buckets and files in Cloud Storage. You want to follow Google-recommended practices. Which IAM roles should you grant your colleagues?

- A. Storage Object Creator
- B. Project Editor
- C. Storage Object Admin
- D. Storage Admin

Answer: D

Explanation:

Storage Admin (roles/storage.admin) Grants full control of buckets and objects.
When applied to an individual bucket, control applies only to the specified bucket and objects within the bucket.
firebase.projects.get
resourcemanager.projects.get
resourcemanager.projects.list
storage.buckets.*
storage.objects.*
https://cloud.google.com/storage/docs/access-control/iam-roles
This role grants full control of buckets and objects. When applied to an individual bucket, control applies only to the specified bucket and objects within the bucket.
Ref: https://cloud.google.com/iam/docs/understanding-roles#storage-roles

NEW QUESTION # 252

You are the team lead of a group of 10 developers. You provided each developer with an individual Google Cloud Project that they can use as their personal sandbox to experiment with different Google Cloud solutions.
You want to be notified if any of the developers are spending above $500 per month on their sandbox environment. What should you do?

- A. Create a separate billing account per sandbox project and enable BigQuery billing exports. Create a Data Studio dashboard to plot the spending per billing account.
- B. Create a single billing account for all sandbox projects and enable BigQuery billing exports. Create a Data Studio dashboard to plot the spending per project.
- C. Create a budget per project and configure budget alerts on all of these budgets.
- D. Create a single budget for all projects and configure budget alerts on this budget.

Answer: C

Explanation:
Set budgets and budget alerts Overview Avoid surprises on your bill by creating Cloud Billing budgets to monitor all of your Google Cloud charges in one place. A budget enables you to track your actual Google Cloud spend against your planned spend. After you've set a budget amount, you set budget alert threshold rules that are used to trigger email notifications. Budget alert emails help you stay informed about how your spend is tracking against your budget. 2. Set budget scope Set the budget Scope and then click Next. In theProjects field, select one or more projects that you want to apply the budget alert to. To apply the budget alert to all the projects in the Cloud Billing account, choose Select all.https://cloud.google.com/billing/docs/how-to/budgets#budget-scop

NEW QUESTION # 253

You have developed an application that consists of multiple microservices, with each microservice packaged in its own Docker container image. You want to deploy the entire application on Google Kubernetes Engine so that each microservice can be scaled individually.
What should you do?

- A. Create and deploy a Deployment per microservice.
- B. Create and deploy a Docker Compose File.
- C. Create and deploy a Job per microservice.
- D. Create and deploy a Custom Resource Definition per microservice.

Answer: A

Explanation:
Can deploy each service through
kubectl apply -f <deployment_config.yaml>

NEW QUESTION # 254

You need to set up permissions for a set of Compute Engine instances to enable them to write data into a particular Cloud Storage bucket. You want to follow Google-recommended practices. What should you do?

- A. Create a service account and add it to the IAM role 'storage.objectAdmin' for that bucket.

- B. Create a service account with an access scope. Use the access scope 'https://www.googleapis.com/auth/cloud-platform'.
- C. Create a service account and add it to the IAM role 'storage.objectCreator' for that bucket.
- D. Create a service account with an access scope. Use the access scope 'https://www.googleapis.com/auth/devstorage.write_only'.

Answer: B

Explanation:

NEW QUESTION # 255

You created a Google Cloud Platform project with an App Engine application inside the project. You initially configured the application to be served from the us-central region. Now you want the application to be served from the asia-northeast1 region. What should you do?

- A. Create a new GCP project and create an App Engine application inside this new project. Specify asia-northeast1 as the region to serve your application.
- B. Create a second App Engine application in the existing GCP project and specify asia-northeast1 as the region to serve your application.
- C. Change the region property setting in the existing App Engine application from us-central to asia-northeast1.
- D. Change the default region property setting in the existing GCP project to asia-northeast1.

Answer: A

Explanation:
https://cloud.google.com/appengine/docs/flexible/managing-projects-apps-billing#:~:text=Each%20Cloud%20project%20can%20contain%20only%20a%20single%20App%20Engine%20application%2C%20and%20once%20created%20you%20cannot%20change%20the%20location%20of%20your%20App%20Engine%20application.
Two App engine can't be running on the same project: you can check this easy diagram for more info:
https://cloud.google.com/appengine/docs/standard/an-overview-of-app-engine#components_of_an_application And you can't change location after setting it for your app Engine. https://cloud.google.com/appengine/docs/standard/locations
App Engine is regional and you cannot change an apps region after you set it. Therefore, the only way to have an app run in another region is by creating a new project and targeting the app engine to run in the required region (asia-northeast1 in our case).
