ExamCost's Network Appliance NS0-185 Exam Training materials is a good training tool. It can help you pass the exam successfully. With this certification, you will get international recognition and acceptance. Then you no longer need to worry about being fired by your boss.

Network Appliance NetApp Storage Installation Engineer, ONTAP Professional Exam Sample Questions (Q30-Q35):

NEW QUESTION # 30

What is a valid failover policy for a SAN LIF?

- A. disabled
- B. local-only
- C. broadcast-domain-wide
- D. system-defined

Answer: A

Explanation:

In ONTAP SAN concepts, SAN LIFs (used for iSCSI, FC, NVMe/FC) behave differently from NAS LIFs.

SAN access relies on multipathing at the host level, not LIF failover within the storage system. Because of this architectural design, SAN LIFs are configured with a failover policy of disabled.

When a SAN LIF goes offline, ONTAP does not move the LIF to another port. Instead, the host multipathing software (such as ALUA for iSCSI or FC multipath drivers) redirects I/O to another available path. This design ensures predictable path behavior and avoids unexpected changes that could confuse host multipathing logic.

Failover policies such as broadcast-domain-wide or local-only are valid only for NAS or management LIFs.

The system-defined option is not a valid failover policy value.

Therefore, the only valid failover policy for a SAN LIF is disabled, making A the correct answer.

NEW QUESTION # 31

Referring to the exhibit, you installed a new AFF A250 HA system with FC at a customer site. The customer asks how many ports can be used for the Ethernet host connections.

□ In this scenario, what would you tell the customer?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

The AFF A250 provides eight Ethernet ports that can be used for Ethernet-based host connectivity, depending on adapter configuration. FC ports are separate and do not count toward Ethernet host connections.

NEW QUESTION # 32

What is the purpose of a mailbox disk?

- A. Sending AutoSupport mail
- B. Storing HA partner information
- C. Logging
- D. Shipping defective drives

Answer: B

Explanation:

Mailbox disks store HA metadata and partner state information required for takeover and giveback operations.

NEW QUESTION # 33

You are preparing to physically install a new AFF A400 cluster into a customer's racks. All equipment has been delivered.

Which three tools do you need to complete this installation? (Choose three.)

- A. Phillips #2 screwdriver
- B. cable management tray
- C. additional network cables
- D. slide rail kit
- E. laptop computer

Answer: A,B,E

Explanation:

Physical installation of an AFF system requires specific tools. A Phillips #2 screwdriver is required for securing rails and components. A laptop computer is needed for console access, initial configuration, and validation. A cable management tray is necessary to properly route and secure cables, ensuring airflow and serviceability.

Additional network cables and slide rail kits are equipment components, not tools.

Therefore, the correct answers are B, C, and E.

NEW QUESTION # 34

You finished installing a 2-node cluster and want to verify correct operation.

Which two methods can be used? (Choose two.)

- A. system node auto support check show
- B. OnCommand Performance Manager GUI
- C. OnCommand System Manager GUI
- D. cluster ha show and storage failover show commands

Answer: C,D

NEW QUESTION # 35

.....

Because these NetApp Storage Installation Engineer, ONTAP Professional Exam NS0-185 exam dumps are designed by experts after in-depth research about the certification exam content. The NetApp Storage Installation Engineer, ONTAP Professional Exam exam product is made of 100% real Network Appliance NS0-185 Exam Questions verified by Network Appliance professionals. The NetApp Storage Installation Engineer, ONTAP Professional Exam NS0-185 Valid Dumps of ExamCost are exceptionally curated and approved by experts. We have hired professionals who after in-depth research add the most important and real test questions in three formats of our NS0-185 exam practice material.
