DAMA Data Management Fundamentals Sample Questions (Q424-Q429):

NEW QUESTION # 424

Referential Integrity (RI) is often used to update tables without human intervention. Would this be a good idea for reference tables?

- A. Yes, older transactions do not have to be removed because with the Cloud there is unlimited database storage
- B. No, updates should always be made directly via data entry or through a specific batch interface based on operator-entered information partly because of regulatory reporting and archiving
- C. No, but an enterprise can use program logic to do updates as there is little potential for problems to occur with reference data

- D. Yes, you do not have to worry about archived data with reference data so tables can be updated automatically
- E. Yes, since Standards Bodies typically supply reference data, the enterprise can automatically update when a new code or value is received

Answer: B
