

FCSS_EFW_AD-7.4 Test Cram & FCSS_EFW_AD-7.4 Test Topics Pdf

BONUS!!! Download part of ExamsTorrent FCSS_EFW_AD-7.4 dumps for free: <https://drive.google.com/open?id=136HFiNi3jmEfwS8CluD4Z4nurTmMoBQH>

Customers always attach great importance to the quality of FCSS_EFW_AD-7.4 exam torrent. We can guarantee that our study materials deserve your trustee. We have built good reputation in the market now. After about ten years' development, we have owned a perfect quality control system. All FCSS_EFW_AD-7.4 exam prep has been inspected strictly before we sell to our customers. The inspection process is very strict and careful. Any small mistake can be tested clearly. So you can completely believe our FCSS_EFW_AD-7.4 Exam Guide. What's more, all contents are designed carefully according to the exam outline. As you can see, the quality of our FCSS_EFW_AD-7.4 exam torrent can stand up to the test. Your learning will be a pleasant process.

If you lack confidence for your exam, you can strengthen your confidence for your exam through using FCSS_EFW_AD-7.4 exam torrent of us. FCSS_EFW_AD-7.4 Soft test engine can simulate the real exam environment, so that you can know the procedure for the exam, and your confidence for the exam can also be built up. What's more, FCSS_EFW_AD-7.4 Exam Braindumps are famous for instant access to download, and you can receive downloading link and password within ten minutes, so you start the training right now. You can enjoy free update for 365 days for FCSS_EFW_AD-7.4 test materials after payment, and the update version will be sent to you automatically.

FCSS_EFW_AD-7.4 Test Cram - 100% Pass Quiz 2026 First-grade FCSS_EFW_AD-7.4: FCSS - Enterprise Firewall 7.4 Administrator Test Topics Pdf

All exam materials in FCSS_EFW_AD-7.4 learning materials contain PDF, APP, and PC formats. They have the same questions and answers but with different using methods. If you like to take notes randomly according to your own habits while studying, we recommend that you use the PDF format of our FCSS_EFW_AD-7.4 Study Guide. And besides, you can take it with you wherever you go for it is portable and takes no place. So the PDF version of our FCSS_EFW_AD-7.4 exam questions is convenient.

Fortinet FCSS - Enterprise Firewall 7.4 Administrator Sample Questions (Q69-Q74):

NEW QUESTION # 69

Which statement about memory conserve mode is true?

- A. A FortiGate exits conserve mode when the configured memory use threshold reaches yellow.
- **B. A FortiGate enters conserve mode when the configured memory use threshold reaches red**
- C. A FortiGate starts dropping new sessions when the configured memory use threshold reaches red
- D. A FortiGate Starts dropping all the new and old sessions when the configured memory use threshold reaches extreme.

Answer: B

NEW QUESTION # 70

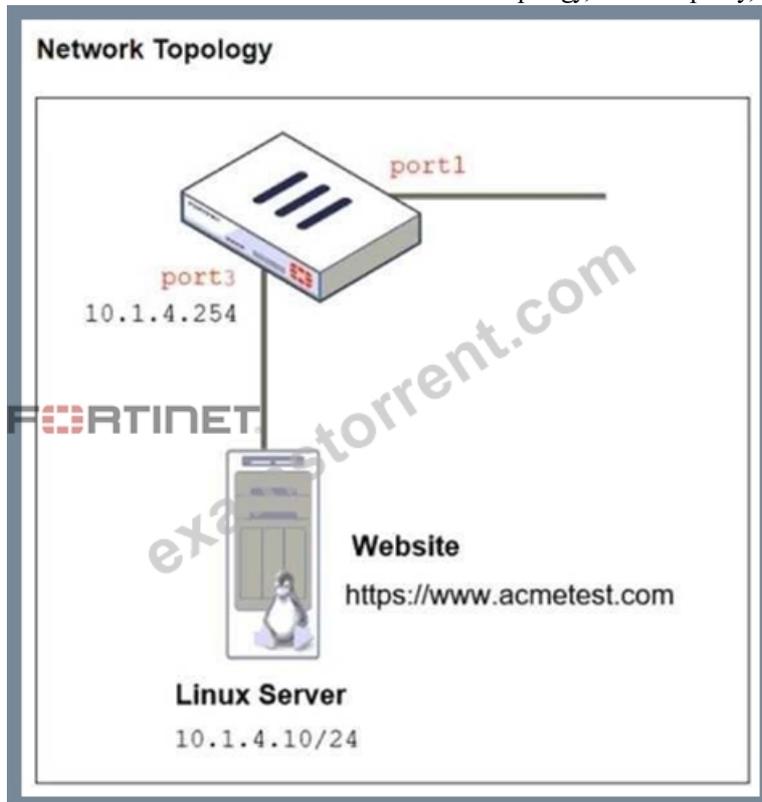

An administrator must optimize the performance of real-time voice and video applications across a WAN link with high packet loss. Which combination of IPsec phase 1 parameters must the administrator configure to reduce errors and boost application reliability?

- **A. fec-ingress and fsc-egress**
- B. keepalive and keylive
- C. dpd and dpd-retryinterval
- D. fragmentation and fragmentation-mtu

Answer: A

NEW QUESTION # 71

Refer to the exhibits. The exhibits show a network topology, a firewall policy, and an SSL/SSH inspection profile configuration.

Firewall policy on FortiGate

```
DCFW # sh firewall policy 3
config firewall policy
edit 3
set name "To Linux Servers"
set uuid bf77d59e-5513-51ef-147d-e35066c267e9
set srcintf "port1"
set dstintf "port3"
set action accept
set srcaddr "all"
set dstaddr "10.0.0."
set schedule "always"
set service "ALL"
set utm-status enable
set inspection-mode proxy
set ssl-ssh-profile "deep-inspection"
set ips-sensor "IPS Monitor"
set logtraffic all
next
end
```

Why is FortiGate unable to detect HTTPS attacks on firewall policy ID 3 targeting the Linux server?

- A. The administrator must set the policy to inspection mode to analyze the HTTPS packets as expected.
- B. The administrator must enable cipher suites in the SSL/SSH inspection profile to decrypt the message.
- C. The administrator must enable HTTPS in the protocol port mapping of the deep- inspection SSL/SSH inspection profile.
- **D. The administrator must enable SSL inspection of the SSL server and upload the certificate of the Linux server website to the SSL/SSH inspection profile.**

Answer: D

Explanation:

The FortiGate SSL/SSH inspection profile is configured for Full SSL Inspection, which is necessary to analyze encrypted HTTPS traffic. However, the firewall policy is protecting an SSL server (the Linux server hosting the website), and currently, the SSL/SSH profile only applies to client-side SSL inspection.

To detect HTTPS-based attacks targeting the Linux server:

FortiGate must act as an SSL intermediary to inspect encrypted traffic destined for the web server. The administrator must upload the SSL certificate of the Linux web server to FortiGate so that the server-side SSL inspection can decrypt incoming HTTPS traffic before analyzing it.

NEW QUESTION # 72

Refer to the exhibit, which shows the output of a debug command.

```

FGT # get router info ospf interface port4
port4 is up, line protocol is up
Internet Address 172.20.121.236/24, Area 0.0.0.0, MTU 1500
Process ID 0, Router ID 0.0.0.4, Network Type BROADCAST, Cost: 1
Transmit Delay is 1 sec, State DROther, Priority 1
Designated Router (ID) 172.20.140.2, Interface Address 172.20.121.2
Backup Designated Router (ID) 0.0.0.1, Interface Address 172.20.121.239
Timer intervals configured, Hello 10.000, Dead 40, Wait 40, Retransmit 5
Hello due in 00:00:05
Neighbor Count is 4, Adjacent neighbor count is 2
Crypt Sequence Number is 411
Hello received 106 sent 27, DD received 6 sent 3
LS-Req received 2 sent 2, LS-Upd received 7 sent 17
LS-Ack received 4 sent 3, Discarded 1

```

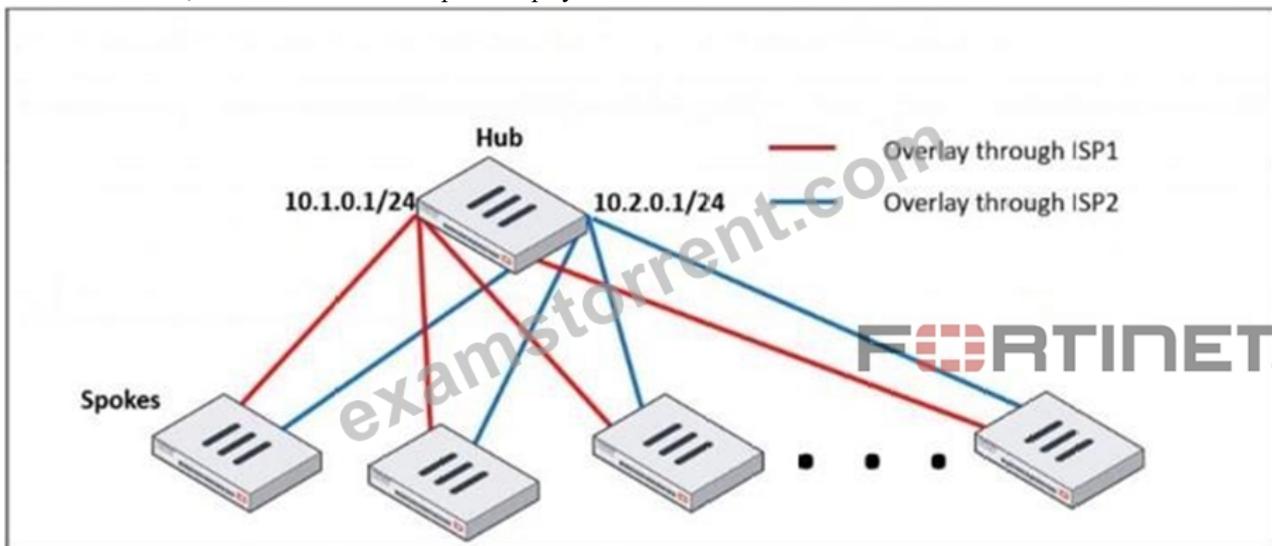

Which two statements about the output are true? (Choose two.)

- A. There are a total of 5 OSPF routers attached to the Port4 network segment.
- B. Based on the network type of port 4, OSPF hello packets will be sent to 224.0.0.6.
- C. Based on the network type of port 4, OSPF hello packets will be sent to 224.0.0.5.
- D. In the network connected to port 4, two OSPF routers are down.

Answer: A,C

NEW QUESTION # 73

Refer to the exhibit, which shows a hub and spokes deployment.

An administrator is deploying several spokes, including the BGP configuration for the spokes to connect to the hub.

Which two commands allow the administrator to minimize the configuration? (Choose two.)

- A. route-reflector-client
- B. ibgp-enforce-multihop
- C. neighbor-group
- D. neighbor-range

Answer: C,D

Explanation:

neighbor-group:

This command is used to group multiple BGP neighbors with the same configuration, reducing redundant configuration.

Instead of defining individual BGP settings for each spoke, the administrator can create a neighbor-group and apply the same policies, reducing manual work.

neighbor-range:

This command allows the configuration of a range of neighbor IPs dynamically, reducing the need to manually define each spoke

neighbor.

It automatically adds BGP neighbors that match a given prefix, simplifying deployment.

NEW QUESTION # 74

.....

In this social-cultural environment, the FCSS_EFW_AD-7.4 certificates mean a lot especially for exam candidates like you. To some extent, these certificates may determine your future. With respect to your worries about the FCSS_EFW_AD-7.4 practice exam, we recommend our FCSS_EFW_AD-7.4 preparation materials which have a strong bearing on the outcomes dramatically. Our FCSS_EFW_AD-7.4 Preparation materials are products full of advantages. And our FCSS_EFW_AD-7.4 exam simulation has quick acquisition. What is more, our FCSS_EFW_AD-7.4 study guide offers free updates for one year and owns increasing supporters.
