As you know, the CEM certificate is hard to get for most people. But our CEM study guide will offer you the most professional guidance. As old saying goes, opportunities are always for those who prepare themselves well. In the end, you will easily pass the CEM Exam through our assistance. Then you will find that your work ability is elevated greatly by studying our CEM actual exam. In the end, you will become an excellent talent.

However, you should keep in mind that to get success in the CEM certification exam is not a simple and easy task. A lot of effort, commitment, and in-depth Certified Energy Manager (CEM) (CEM) exam questions preparation is required to pass this CEM Exam. For the complete and comprehensive Certified Energy Manager (CEM) (CEM) exam dumps preparation you can trust valid, updated, and CEM Questions which you can download from the ValidVCE platform quickly and easily.

CEM Printable PDF, CEM Practice Questions

It was never so easy to make your way to the world's most rewarding professional qualification as it has become now! ValidVCE' CEM practice test questions answers are the best option to secure your success in just one go. You can easily answer all exam questions by doing our CEM exam dumps repeatedly. For further sharpening your skills, practice mock tests using our CEM Brain Dumps Testing Engine software and overcome your fear of failing exam. Our Certified Energy Manager (CEM) dumps are the most trustworthy, reliable and the best helpful study content that will prove the best alternative to your time and money.

AEE Certified Energy Manager (CEM) Sample Questions (Q90-Q95):

NEW QUESTION # 90

Which problems can be caused by poor power quality?

- A. Equipment overheating
- B. Circuit breakers tripping
- C. Answers B and C
- D. All of the above
- E. Induction motors running backwards

Answer: C

NEW QUESTION # 91

What is the main cause of low power factor?

- A. Computers and electronic equipment
- B. Harmonics
- C. Fluorescent lighting
- D. Low-load induction motors
- E. Solar flares

Answer: D

NEW QUESTION # 92

Which of the following best describes a dead band in controls?

- A. A system which changes the output of a controller based on how fast a variable is moving from or to a set point
- B. The delay in response of a system to a controlled change
- C. The difference between a sensor variable and its set point
- D. A value that has been assigned to a controlled variable
- E. A range around a set point with no change in state even though there is a change in sensor input

Answer: E

NEW QUESTION # 93

A new energy-efficient boiler costs \$60,890 to buy and install. The new energy-efficient boiler will save \$15,400 per year and last for 20 years. What is the internal rate of return (IRR) of the project?

- A. 15%
- B. 30%
- C. 25%
- D. 20%
- E. 10%

Answer: D

NEW QUESTION # 94

Why do electric utility companies transmit power at high voltages?

SELECT THE CORRECT ANSWER

- A. Higher voltages are safer
- B. Transmission power losses (I²R) are less
- C. Electrical frequency is more stable
- D. Higher voltages are more stable

Answer: B

Explanation:

Electric utility companies transmit power at high voltages primarily to reduce transmission power losses, which are proportional to the square of the current (I^2) multiplied by the resistance (R) of the transmission lines. This relationship is expressed by the formula for power loss: $P_{\text{loss}} = I^2R$.

Key Points:

* **Power Loss and Current Relationship:** Power losses in transmission lines are directly proportional to the square of the current flowing through them. Reducing the current decreases these losses significantly.

* **High Voltage Transmission:** By increasing the transmission voltage, the current required to deliver the same amount of power decreases. This is because power (P) is the product of voltage (V) and current (I): $P = VI$. For a given power level, increasing voltage allows for a corresponding decrease in current.

* **Reduced I^2R Losses:** Lower current results in reduced I^2R losses, enhancing the efficiency of power transmission over long distances.

Conclusion:

Transmitting power at high voltages minimizes transmission losses, making it the most efficient method for long-distance electrical power delivery. Therefore, the correct answer is C. Transmission power losses (I^2R) are less.

NEW QUESTION # 95

Our CEM test torrent is of high quality, mainly reflected in the pass rate. Our CEM test torrent is carefully compiled by industry experts based on the examination questions and industry trends in the past few years. More importantly, we will promptly update our CEM exam materials based on the changes of the times and then send it to you timely. 99% of people who use our learning materials have passed the exam and successfully passed their certificates, which undoubtedly show that the passing rate of our CEM Test Torrent is 99%.
