

Pass Guaranteed Authoritative Nutanix - NCP-MCI-6.10 Valid Test Tutorial

What's more, part of that Exams4Collection NCP-MCI-6.10 dumps now are free: https://drive.google.com/open?id=1X-ani_emVZvx CZhl-b6CI-4ZbYtAzd0Q

You must ensure that you can pass the NCP-MCI-6.10 exam quickly, so you must choose an authoritative product. Our NCP-MCI-6.10 exam materials are certified by the authority and have been tested by users. This is a product that you can definitely use with confidence. Of course, our data may make you more at ease. The passing rate of NCP-MCI-6.10 Preparation prep reached 99%, which is a very incredible value, but we did. If you want to know more about our products, you can consult our staff, or you can download our free trial version of our NCP-MCI-6.10 practice engine. We are looking forward to your joining.

The evergreen field of Nutanix is so attractive that it provides non-stop possibilities for the one who passes the Nutanix NCP-MCI-6.10 exam. So, to be there on top of the Nutanix sector, earning the Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) (NCP-MCI-6.10) certification is essential. Because of using outdated NCP-MCI-6.10 study material, many candidates don't get success in the Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) (NCP-MCI-6.10) exam and lose their resources.

NCP-MCI-6.10 Test Topics Pdf | Questions NCP-MCI-6.10 Pdf

Nowadays certificates are more and more important for our job-hunters because they can prove that you are skillful to do the jobs in the certain areas and you boost excellent working abilities. Passing the test of NCP-MCI-6.10 certification can help you find a better job and get a higher salary. With this target, we will provide the best NCP-MCI-6.10 Exam Torrent to the client and help the client pass the exam easily if you buy our product.

Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) Sample Questions (Q115-Q120):

NEW QUESTION # 115

An administrator wants to ensure that user VMs on AHV hosts can take advantage of bandwidth available beyond a single adapter in a bond.

Which uplink Bond Type should the administrator configure?

- A. Active-Active
- B. No uplink bond
- C. Active-Active with MAC pinning
- D. Active-backup

Answer: A

Explanation:

Nutanix AHV networking supports multiple bond types that determine how traffic is distributed across physical NICs. The detailed guidance in the AHV networking section states:

"Active-Active bonding provides load distribution of outbound traffic across all interfaces in the bond, allowing aggregate throughput beyond a single physical adapter." Active-backup keeps only one NIC active at a time and provides no throughput gain. Active-Active with MAC pinning distributes VMs across NICs but does not aggregate the total throughput for a single VM and is typically used with switch-independent designs.

Because the requirement is to "take advantage of bandwidth beyond a single adapter," only the standard Active-Active bond type satisfies this, as it truly aggregates available bandwidth.

Therefore, the correct bond type is Active-Active.

NEW QUESTION # 116

Refer to the Exhibit:

An administrator needs to create two virtual machines: VM4 and VM5 that leverage the memory over-commit feature.

Once VM4 is created and running, the administrator notices that it uses only 28GB of RAM.

What will be the maximum RAM that can be allocated to VM5 so that it can be powered on?

- A. 8GB
- B. 4GB
- C. 16GB
- D. 32GB

Answer: A

Explanation:

Understanding the Exhibit & Memory Allocation

* The host has 128GB of physical RAM.

* The current memory allocation across three VMs (VM1, VM2, VM3) is 128GB, but only 92GB is actually utilized.

* This means there is 36GB of unutilized memory available for allocation.

Step-by-Step Breakdown

* Existing Memory Usage Before Adding VM4

* Total Physical RAM: 128GB

* Used by running VMs (VM1, VM2, VM3): 92GB

* Unutilized Memory Available: 36GB

* After Creating and Running VM4

* VM4 is allocated memory but only utilizes 28GB.

* The table does not show VM4's allocated RAM, but assuming it was given a reasonable allocation, it must have been taken from the 36GB unutilized memory pool.

* If VM4 uses 28GB, the remaining unutilized memory is now $(36\text{GB} - 28\text{GB}) = 8\text{GB}$.

* Maximum Memory Allocation for VM5

* Since only 8GB remains unutilized, the maximum memory VM5 can be allocated while still allowing it to power on is 8GB.

Evaluating the Answer Choices

* (A) 4GB#(Incorrect)

* More memory (8GB) is available, so limiting to 4GB is unnecessary.

* (B) 8GB#(Correct)

* The remaining unutilized memory after VM4 is 8GB, so VM5 can be allocated up to 8GB while ensuring it can power on.

* (C) 16GB#(Incorrect)

* Only 8GB is left, so 16GB is not possible.

* (D) 32GB#(Incorrect)

* There is not enough unutilized memory to allocate 32GB.

Key Concept: Nutanix Memory Overcommit

* Nutanix AHV supports memory overcommit, meaning VMs can be allocated more memory than physically available using memory ballooning and swapping.

* However, to power on VM5 without impacting performance, it must fit within the available unutilized memory, which is 8GB.

NEW QUESTION # 117

A Disaster Recovery administrator has setup a Protection Policy for 50 workloads - all configured in a similar fashion in terms of OS, storage, network, and performance. The RPO is 60 minutes with a specified retention of 10 copies local, 5 copies remote, and crash consistency.

After configuring the Protection Policy and activating it, the administrator has noticed that recovery points are not showing up in DR. Yet, everything within the Protection Policy looks correct and recovery points are showing up on production side. What is the most likely issue?

- A. The storage container name of the protected VMs is not the same as the DR cluster storage container
- B. Nutanix NGT is not installed on the source VMs.
- **C. The storage container RF factor of the protected VMs is not the same as the RF factor in the DR cluster container.**
- D. Windows updates need to be run on all the affected VMs.

Answer: C

Explanation:

In Nutanix Protection Domain-based replication, both the source and destination storage containers must have the same Replication Factor (RF) to ensure consistent data protection and replication. This is a key requirement for the data's protection and integrity.

From the Nutanix ECADocumentation:

"Replication and recovery require that the source and destination containers have the same RF setting (either RF2 or RF3). If the RF does not match, replication and recovery points will not be generated in the DR site." The other options:

- * A (NGT): NGT is not required for crash-consistent protection.
- * C (Windows updates): Updates are not directly relevant to replication consistency.
- * D (container name): Names can differ; what matters is the container's RF setting.

NEW QUESTION # 118

An administrator is preparing for a firmware upgrade on a host and wants to manually migrate VMs before executing the LCM upgrade. However, one VM is unable to migrate while others migrate successfully. Which action would fix the issue?

- A. Enable Acropolis Dynamic Scheduling (ADS) at the cluster level.
- B. Configure backplane port groups that are assigned to the CVM.
- C. Update Link Layer Discovery Protocol (LLDP).
- **D. Disable Agent VM within the VM configuration options.**

Answer: D

Explanation:

If a VM is unable to migrate, the most likely cause is that it is an Agent VM (such as a Nutanix Witness VM or a VM with special dependencies).

- * Option C (Disable Agent VM) is correct:
- * Some Agent VMs are configured to prevent migration due to critical roles (e.g., a Witness VM for Metro Availability).
- * Disabling Agent VM restrictions allows it to migrate before a host enters maintenance mode.
- * Option A (Enable ADS) is incorrect:
- * Acropolis Dynamic Scheduling (ADS) helps with VM placement after migration, but it does not force an unmigratable VM to move.
- * Option B (Update LLDP) is incorrect:
- * LLDP is used for network discovery, but it does not impact VM migration behavior.
- * Option D (Configure backplane port groups) is incorrect:
- * Backplane settings impact CVM communication, not VM migration.

References:

- * Nutanix KB #Troubleshooting VM Migration Failures in AHV

NEW QUESTION # 119

An administrator is managing two clusters registered to two different Prism Central instances.

After configuring a Protection Policy for synchronous replication and verifying data replication, the administrator would like to create a new Recovery Plan with automatic failover. However, the administrator finds that the Recovery Plan workflow offers only manual failure execution mode.

What configuration must be fixed to execute the failover automatically?

- **A. Primary Location and Recovery Location must be in the same AZ.**
- B. Verify protected VM are not already part of another Recovery Plan.

- C. Modify firewall to open 2030, 2036, 2073, 2090 ports on every local and remote CVM5.
- D. Protection Policy must also have a local schedule.

Answer: A

NEW QUESTION # 120

.....

Once you have used our NCP-MCI-6.10 exam training guide in a network environment, you no longer need an internet connection the next time you use it, and you can choose to use NCP-MCI-6.10 exam training at your own right. Our NCP-MCI-6.10 exam training do not limit the equipment, do not worry about the network, this will reduce you many learning obstacles, as long as you want to use NCP-MCI-6.10 Test Guide, you can enter the learning state. And you will find that our NCP-MCI-6.10 training material is the best exam material for you to pass the NCP-MCI-6.10 exam.

NCP-MCI-6.10 Test Topics Pdf: <https://www.exams4collection.com/NCP-MCI-6.10-latest-braindumps.html>

Besides, the most desirable part is the favorable prices of NCP-MCI-6.10 quiz guide materials, which are not expensive at all but can be obtained with favorable figure and occasional discounts, and we also provide considerate aftersales service for you 24/7 of NCP-MCI-6.10 test quiz materials, With our NCP-MCI-6.10 exam review, you have greater opportunity prone to get desirable outcomes, Our Nutanix experts are continuously working on including new NCP-MCI-6.10 questions material and we provide a guarantee that you will be able to pass the NCP-MCI-6.10 exam on the first attempt.

For those items we do paint, we begin by retrieving NCP-MCI-6.10 the `QStyleOptionViewItem` supplied by the base class, Economists argue that the future wealth of nations will depend increasingly on the excellence of the NCP-MCI-6.10 Test Topics Pdf workforce skills and the strength of institutions that underpin the innovation-based knowledge economy.

NCP-MCI-6.10 Exam Torrent & NCP-MCI-6.10 Study Materials & NCP-MCI-6.10 Actual Exam

Besides, the most desirable part is the favorable prices of NCP-MCI-6.10 Quiz guide materials, which are not expensive at all but can be obtained with favorable figure and occasional discounts, and we also provide considerate aftersales service for you 24/7 of NCP-MCI-6.10 test quiz materials.

With our NCP-MCI-6.10 exam review, you have greater opportunity prone to get desirable outcomes, Our Nutanix experts are continuously working on including new NCP-MCI-6.10 questions material and we provide a guarantee that you will be able to pass the NCP-MCI-6.10 exam on the first attempt.

All you need to do is practice the questions answered one time and we assure you that you will be able to clear the Nutanix NCP-MCI-6.10 test in just one attempt.

As we all know, NCP-MCI-6.10 certificates are an essential part of one's resume, which can make your resume more prominent than others, making it easier for you to get the job you want.
