If you are preparing for the practice exam, we can make sure that the EMEA-Advanced-Support test practice files from our company will be the best choice for you, and you cannot find the better study materials than our company'. There are a lot of advantages of our EMEA-Advanced-Support preparation materials, and you can free download the demo of our EMEA-Advanced-Support training guide to know the special functions of our EMEA-Advanced-Support prep guide in detail. And you will know the quality of our EMEA-Advanced-Support study prep as well. We are hopeful that you will like our EMEA-Advanced-

Support exam questions.

Fortinet EMEA Advanced Support Exam Sample Questions (Q18-Q23):

NEW QUESTION # 18

What does the FortiGate 'set nat enable' command do in a firewall policy?

- A. Enables NAT for incoming traffic only
- B. Disables NAT for the policy
- C. Forces NAT to use a specific IP pool
- **D. Enables NAT for outgoing traffic**

Answer: D

Explanation:

The 'set nat enable' command in a FortiGate firewall policy enables Source NAT (SNAT) for outgoing traffic, typically rewriting the source IP to the FortiGate's interface IP or an IP pool. It does not disable NAT (B), force a specific pool (C), or limit to incoming traffic (D). Exact extract: "The 'set nat enable' command in a firewall policy enables Source NAT, rewriting the source IP address of outgoing traffic to the egress interface IP or a configured NAT pool."

NEW QUESTION # 19

What does the below route indicate?

- A. The destination network can be reached via any gates
- B. The device does not know the destination
- C. It is a dummy route in the routing table
- **D. The destination network is locally connected on that interface**

Answer: D

Explanation:

A route with a directly connected interface (no gateway) indicates the destination network is locally attached to that interface on the FortiGate. This is common for networks directly connected to the device's interfaces.

Option A is vague, B is incorrect as it's not a dummy route, and D suggests an unknown route, which isn't the case. Exact extract: "A directly connected route indicates that the destination network is locally attached to the interface specified in the routing table... No gateway is required for such routes as the FortiGate is directly connected to the network."

NEW QUESTION # 20

In Active FTP who sends the PORT command?

- A. There is no PORT command in Active FTP
- B. The FTP Server
- **C. The FTP Client**
- D. Both

Answer: C

Explanation:

In Active FTP, the client sends the PORT command to the server, specifying an ephemeral port for the server to initiate the data connection back to the client. This distinguishes Active FTP from Passive FTP, where the server provides the port. The server does not send PORT, and the command is a key part of Active FTP. Exact extract: "In Active FTP, the client sends a PORT command to the server, specifying the IP address and port number for the data connection... The server then initiates the data connection to the client's specified port."

NEW QUESTION # 21

Firewall is performing stateful inspection for TCP traffic between Client 10.0.0.21 and Server 172.16.1.200.

- A. Three way handshake was not completed
- B. Traffic is Asymmetric and not allowed by the Firewall
- C. Traffic should be allowed
- D. The ACK was not supposed to be sent to client 10.0.0.21

Answer: A

Explanation:

Stateful inspection requires a complete TCP three-way handshake (SYN, SYN-ACK, ACK) to establish a session in the firewall's state table. If the handshake is incomplete (e.g., missing ACK), the session is not established, and traffic is dropped. The question implies a stateful firewall scenario where traffic is blocked, likely due to an incomplete handshake. Asymmetric traffic (B) or incorrect ACK (A) are not indicated without further context, and C is incorrect if the handshake fails. Exact extract: "Stateful inspection ensures that a TCP three-way handshake is completed before allowing traffic... If the handshake is not completed, FortiGate drops the packets as invalid."

NEW QUESTION # 22

What happens when a FortiGate detects a SYN flood attack?

- A. It redirects traffic to a backup gateway
- B. It applies rate limiting to SYN packets
- C. It drops all incoming packets
- D. It enables proxy-based inspection

Answer: B

Explanation:

When FortiGate detects a SYN flood attack, it applies rate limiting to SYN packets via a DoS policy, dropping excessive packets to mitigate the attack. It does not drop all packets (A), enable proxy inspection (B), or redirect traffic (D). Exact extract: "FortiGate mitigates SYN flood attacks using DoS policies, which apply rate limiting to SYN packets to prevent overwhelming the system."

NEW QUESTION # 23

.....

Our EMEA-Advanced-Support test prep attaches great importance to a skilled, trained and motivated workforce as well as the company's overall performance. Adhere to new and highly qualified EMEA-Advanced-Support quiz guide to meet the needs of customer, we are also committed to providing the first -class after-sale service. There will be our customer service agents available 24/7 for your supports; any request for further assistance or information about EMEA-Advanced-Support Exam Torrent will receive our immediate attention.
