If you want to know PDF version of HP HPE7-A06 new test questions, you can download our free demo before purchasing. Yes, we provide free PDF version for your reference. If you want to know the quality of our PDF version of HPE7-A06 new test questions, free PDF demo will show you. PDF version is easy for read and print out. If you are used to studying on paper, this version will be suitable for you. Besides, you place order for your companies, PDF version of HPE7-A06 new test questions can be printed out many times and suitable for demonstration.

Before you buy HPE7-A06 exam torrent, you can log in to our website to download a free trial question bank, and fully experience the convenience of PDF, APP, and PC three models of HPE7-A06 quiz guide. During the trial period, you can fully understand HPE7-A06 practice test 'learning mode, completely eliminate any questions you have about HPE7-A06 exam torrent, and make your purchase without any worries. If you are a student, HPE7-A06 Quiz guide will also make your study time more flexible. With HPE7-A06 exam torrent, you don't need to think about studying at the time of playing. You can study at any time you want to study and get the best learning results with the best learning status.

HP HPE7-A06 Valid Exam Guide, HPE7-A06 Exam Labs

As a responsible company, we don't ignore customers after the deal, but will keep an eye on your exam situation. Although we can assure you the passing rate of our HPE7-A06 study materials nearly 100 %, we can also offer you a full refund if you still have

concerns. If you try our HPE7-A06 Study Materials but fail in the final exam, we can refund the fees in full only if you provide us with a transcript or other proof that you failed the exam.

HPE Campus Access Switching Expert Written Exam Sample Questions (Q35-Q40):

NEW QUESTION # 35

A network administrator is implementing a new VoIP solution. They want the AOS-CX switches to advertise the correct DSCP priority for the physical IP phones.

Which switch features are needed to implement this solution? (Choose two.)

- A. LLDP med network-policy
- B. Voice VLAN
- C. LLDP med DSCP
- D. LLDP dot3 mls
- E. Priority-Flow Control (PFC)

Answer: A,B

Explanation:

To ensure IP phones receive the correct QoS settings, the switch must use Voice VLAN to separate VoIP traffic and apply appropriate QoS policies. Additionally, LLDP-MED network-policy is required to advertise voice-related parameters (such as VLAN ID, priority, and DSCP values) to the IP phones so they can mark traffic correctly.

NEW QUESTION # 36

Refer to the exhibit.

□ A gateway cluster needs to be connected to the VSX-enabled switches where MC-LAG is configured. What is a possible constraint?

- A. lacp mode active needs to be configured on the gateways when using "static-activate" mode.
- B. LLDP needs to be enabled to detect LACP-configured interfaces.
- C. The command lacp fallback is missing on the interface lag level.
- D. LACP is not supported during the initial provisioning and needs to be turned off.

Answer: D

Explanation:

When connecting a gateway cluster to VSX-enabled switches with MC-LAG, LACP cannot be used during the initial provisioning phase (ZTP/OTP). You must use static port-channeling (no LACP) for the first setup. Once provisioning is complete, you can re-enable LACP. This is a documented constraint for initial gateway provisioning with Aruba gateways.

NEW QUESTION # 37

Refer to the exhibit.

□ An end-to-end QoS design needs to be implemented for wired and wireless. What is needed on the LAN side to maintain the correct DSCP tags?

- A. to create a customer DSCP mapping as WLAN DSCP values are different
- B. to create a WMM to DSCP mapping on the LAN Edge
- C. to trust all DSCP-marked packets in the QoS interior ports
- D. to create a WMM to DSCP mapping on the WLAN side

Answer: C

Explanation:

In an end-to-end QoS design, the AP already maps WMM (wireless QoS) values to DSCP values when traffic enters the wired LAN. To preserve these QoS markings, the LAN edge and LAN core devices must be configured to trust the DSCP values instead of re-marking them. Trusting DSCP-marked packets ensures the QoS tags from the wireless side are carried consistently through the wired LAN.

NEW QUESTION # 38

An IT administrator uses AOS-CX switches to send TCP 22 traffic from the switch port to a remote server to analysis. The administrator now wants to save it locally to be downloaded and used later in case the admin changes their mind about the approach to take.

- A. destination file tshark-pcap
- B. destination cpu
- C. destination flash://my-mirror.pcap policy Policy_Mirror22
- D. destination tunnel file tshark-pcap

Answer: A

Explanation:

To save mirrored packets locally on an AOS-CX switch for later download and analysis, use the command destination file tshark-pcap. This will save the mirrored traffic in a pcap file, which you can then download from the switch and analyze as needed.

NEW QUESTION # 39

Match the AOS-CX switch BGP keepalive and holddown timersto the default.

Answer:

Explanation:

Explanation:

The question requires matching the default BGP keepalive and hold-down timers on AOS-CX switches to their respective values.

* Analysis of Options:

* Keepalive Timer: The keepalive timer determines how often BGP keepalive messages are sent to maintain a session. The default value on AOS-CX switches is 60 seconds.

* Hold-down Timer: The hold-down timer specifies the maximum time a BGP session can remain active without receiving a keepalive or update message before it is considered down. The default value on AOS-CX switches is 180 seconds.

* Why This Mapping is Correct: Per BGP standards (RFC 4271) and HPE Aruba Networking AOS-CX documentation, the default BGP keepalive timer is 60 seconds, and the hold-down timer is 180 seconds (three times the keepalive interval). These timers ensure BGP sessions remain stable while allowing timely detection of peer failures. The AOS-CX implementation adheres to these defaults unless explicitly configured otherwise.

* Relevance to Certification Objectives:

* Routing (16%): Involves designing and troubleshooting BGP routing topologies, including timer configurations.

* Troubleshooting (10%): Includes diagnosing BGP session issues related to timers.

References:

HPE Aruba Networking AOS-CX Configuration Guide: BGP Configuration, detailing default timer values.

HPE7-A06 Study Guide: Covers BGP session management and timers.

RFC 4271: A Border Gateway Protocol 4 (BGP-4), specifying default keepalive and hold-down timers.

NEW QUESTION # 40

.....

Free renewal of our HP HPE7-A06 study prep in this respect is undoubtedly a large shining point. Apart from the advantage of free renewal in one year, our HP HPE7-A06 Exam Engine offers you constant discounts so that you can save a large amount of money concerning buying our HP HPE7-A06 training materials.
