

# JN0-336 Lead2pass Review | 100% Pass | Latest Questions

What's more, part of that PrepAwayTest JN0-336 dumps now are free: <https://drive.google.com/open?id=1WfBuSxhSWi23Cd5siStJSg6CYUIUs-3B>

If you study with our JN0-336 exam questions, then you will be surprised to find that our JN0-336 training material is well-written and excellently-organised. That is because our experts fully considered the differences in learning methods and JN0-336 examination models between different majors and eventually formed a complete review system. It will help you to Pass JN0-336 Exam successfully after a series of exercises, correction of errors, and self-improvement. Our JN0-336 exam questions contain everything you need to pass the exam.

We have 24/7 Service Online Support services. If you have any questions about our JN0-336 guide torrent, you can email or contact us online. We provide professional staff Remote Assistance to solve any problems you may encounter. You will enjoy the targeted services, the patient attitude, and the sweet voice whenever you use JN0-336 Exam Torrent. 7\*24\*365 Day Online Intimate Service of JN0-336 questions torrent is waiting for you. "Insistently pursuing high quality, everything is for our customers" is our consistent quality principle on our JN0-336 exam questions.

## Free JN0-336 Exam Questions - JN0-336 Valid Study Materials

All these advantages will be available after passing the Security, Specialist (JNCIS-SEC) JN0-336 certification exam which is not easy to pass. However, the complete JN0-336 test preparation and proper planning can enable you to crack the Juniper JN0-336 exam easily. For the complete and comprehensive JN0-336 exam preparation, you can trust Juniper JN0-336 PDF Questions and practice tests. The Juniper is one of the leading platforms that are committed to ace the Security, Specialist (JNCIS-SEC) JN0-336 Exam Preparation with the Juniper JN0-336 valid dumps. The Juniper JN0-336 practice questions are the real JN0-336 exam questions that are verified by experience and qualified Juniper JN0-336 exam experts.

## Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q29-Q34):

### NEW QUESTION # 29

You are troubleshooting unexpected issues on your JIMS server due to out of order event log timestamps. Which action should you take to solve this issue?

- A. Enable time synchronization on the client devices.
- B. Enable time synchronization on the JIMS server.
- C. Enable time synchronization on the SRX Series devices.
- **D. Enable time synchronization on the domain controllers.**

**Answer: D**

Explanation:

To solve the issue of out of order event log timestamps on your JIMS server, you should enable time synchronization on the domain controllers. JIMS (Juniper Identity Management Service) is a Windows service that collects user, device, and group information from Active Directory domains or syslog sources and provides it to SRX Series devices and CSO for identity-based security policies. JIMS relies on the timestamps of the event logs generated by the domain controllers to track user logins, logouts, and IP address changes. If the domain controllers have different or inaccurate clocks, the event logs may have out of order or incorrect timestamps, which can cause JIMS to miss or misinterpret some events and affect its accuracy and performance. Therefore, you should ensure that all the domain controllers in your network are synchronized with a reliable time source, such as an NTP server or a Windows Time service. Reference: = Juniper Identity Management Service User Guide, Juniper Identity Management Service Feature Guide, Configure JIMS Collector to Get Microsoft Event Logs, Considerations for timestamps in centralized logging platforms

### NEW QUESTION # 30

When using Adaptive Threat Profiling, which two deployment modes are available on SRX Series devices?

(Choose two.)

- A. promiscuous
- B. inline
- C. tap
- D. bridge

**Answer: B,C**

Explanation:

The correct answers are B and C. Adaptive Threat Profiling allows SRX Series Firewalls to act either as inline enforcement devices or as tap-based sensors. In an inline deployment, the SRX is directly in the traffic path and can enforce policy actions such as blocking, denying, or adding threat indicators to Security Intelligence feeds for real-time mitigation. In a tap deployment, the SRX observes copied traffic from a TAP/SPAN-style feed and contributes intelligence without being the active forwarding device. Juniper's ATP Cloud documentation states that Adaptive Threat Profiling enables SRX devices to be deployed as sensors on Tap ports, identifying and sharing intelligence to inline devices for real-time enforcement. It also describes a "Tap- based SRX Series Firewall sensor" and contrasts it with an inline device.

Option A, bridge, is not the deployment mode being tested here. Bridge/transparent forwarding is a firewall deployment style, not the named Adaptive Threat Profiling mode. Option D, promiscuous, is also wrong; promiscuous mode is an interface behavior, not the ATP Adaptive Threat Profiling deployment model.

Reference topics: ATP Cloud, Adaptive Threat Profiling, tap sensors, inline enforcement, Security Intelligence feeds.

### NEW QUESTION # 31

Which two statements about the DNS ALG are correct? (Choose two.)

- A. The DNS ALG does not support NAT.
- B. The DNS ALG performs DNS doctoring.
- C. The DNS ALG supports VPN tunnels.
- D. The DNS ALG supports DDNS.

**Answer: B,C**

Explanation:

The DNS Application Layer Gateway (ALG) is designed to manage and facilitate the successful passage of DNS traffic through a network device such as a firewall or NAT. Here are the correct statements regarding DNS ALG:

The DNS ALG performs DNS doctoring.

DNS doctoring is indeed a function of the DNS ALG where it modifies the payload of DNS responses to ensure that the information is aligned with the NAT policy. For example, it can rewrite the IP addresses in DNS responses to match the internal or external NAT'd IP address that the client should use.

The DNS ALG supports VPN tunnels.

DNS ALG can function across VPN tunnels by managing DNS traffic that traverses the tunnel, ensuring that the DNS queries and responses are correctly handled in environments where IP address translation occurs due to the VPN.

### NEW QUESTION # 32

Which action will the SRX Series device take if traffic matches the custom attack object shown in the exhibit?

```
[edit security idp]
user@srx# show
custom-attack BGP-DEFEND {
  recommended-action drop;
  severity critical;
  attack-type {
    signature {
      context bgp-update-attr-as-path;
      pattern 65501;
      direction any;
    }
  }
}
```

- A. the action taken is defined by the security policy.
- **B. the action taken is defined in the IDP policy that includes this attack object.**
- C. The SRX Series device will reject the traffic.
- D. The SRX series device will drop the traffic.

**Answer: B**

Explanation:

The correct answer is A. the action taken is defined in the IDP policy that includes this attack object. The exhibit defines a custom attack object named BGP-DEFEND under the security idp custom-attack hierarchy.

The custom object includes metadata such as recommended-action drop, severity critical, and signature match conditions such as BGP update AS-path context and pattern 65501. However, an attack object by itself does not determine the final enforcement behavior. The attack object defines what to match; the IDP policy rule that references the object defines what action to take when that match occurs. Juniper describes attack objects as objects used inside IDP rules to identify malicious activity, while IDP rules include rule actions such as drop-packet, drop-connection, close-client, close-server, recommended, and others.

Option B is wrong because the firewall security policy enables IDP inspection by applying an IDP policy, but the IDP action is not selected directly by the normal security policy. Options C and D are too absolute. Even though the custom object shows recommended-action drop, that is only used if the IDP rule action invokes recommended behavior. Without seeing the IDP policy rule action, you cannot conclude reject or drop.

Reference topics: IDP custom attack objects, IDP policy rule actions, recommended action, signature-based attack matching.

### NEW QUESTION # 33

Exhibit

Exhibit

```
[edit security policies from-zone Trust to-zone Untrust]
user@srx# show
policy FindThreat {
  match {
    source-address any;
    destination-address any;
    application junos-defaults;
    dynamic-application { junos:BITTORRENT junos:BITTORRENT-BUNDLE
junos:BITTORRENT-WEB-CLIENT };
  }
  then {
    permit;
  }
}
[edit security policies from-zone Trust to-zone Untrust]
user@srx#
```

JUNIPER NETWORKS

You are asked to track BitTorrent traffic on your network. You need to automatically add the workstations to the High\_Risk\_Workstations feed and the servers to the BitTorrent\_Servers feed automatically to help mitigate future threats. Which two commands would add this functionality to the FindThreat policy? (Choose two.)

- A.

```
[edit security policies from-zone Trust to-zone Untrust policy FindThreat then permit application-
services security-intelligence]
user@srx# set add-source-identity-to-feed High_Risk_Workstations
```

- B.

```
[edit security policies from-zone Trust to-zone Untrust policy FindThreat then permit application-
services security-intelligence]
user@srx# set add-destination-identity-to-feed BitTorrent_Servers
```

- C.

```
[edit security policies from-zone Trust to-zone Untrust policy FindThreat then permit application-
services security-intelligence]
user@srx# set add-destination-ip-to-feed BitTorrent_Servers
```

- D.

```
[edit security policies from-zone Trust to-zone Untrust policy FindThreat then permit application-
services security-intelligence]
user@srx# set add-source-identity-to-feed High_Risk_Workstations
```

Answer: A,C

#### NEW QUESTION # 34

.....

We know that every user has their favorite. Therefore, we have provided three versions of JN0-336 practice guide: the PDF, the Software and the APP online. You can choose according to your actual situation. If you like to use computer to learn, you can use the Software and the APP online versions of the JN0-336 Exam Questions. If you like to write your own experience while studying, you can choose the PDF version of the JN0-336 study materials. Our PDF version can be printed and you can take notes as you like.

**Free JN0-336 Exam Questions:** <https://www.prepawaytest.com/Juniper/JN0-336-practice-exam-dumps.html>

When our JN0-336 download vce pdf has new updates, our system will automatically remind you and send the newest Juniper latest study material to your e-mail, If you are not so sure about JN0-336 best questions, please download our free demo first and have an experimental try, we believe you will be make up your mind, Our website offers the most reliable and accurate JN0-336 exam dumps for you.

Another change to the interactions panel is the JN0-336 Valid Study Materials ability to enter into a special target mode' that will allow you to visually select the target of the component, Neal: What would JN0-336 you have a developer tell a manager to convince them to allow some of these techniques?

## Proven and Recommended Way to Pass Juniper JN0-336 Certification Exam

When our JN0-336 Download vce pdf has new updates, our system will automatically remind you and send the newest Juniper latest study material to your e-mail.
