Palo Alto Networks PSE-Strata-Pro-24 Reliable Exam Materials | PSE-Strata-Pro-24 Certification Cost

P.S. Free & New PSE-Strata-Pro-24 dumps are available on Google Drive shared by ActualTestsQuiz:
https://drive.google.com/open?id=1iKlB_0zjDD5e5GCvlZwECyUH1cI1ae3-

To assimilate those useful knowledge better, many customers eager to have some kinds of practice materials worth practicing. All content is clear and easily understood in our PSE-Strata-Pro-24 practice materials. They are accessible with reasonable prices and various versions for your option. All content are in compliance with regulations of the exam. As long as you are determined to succeed, our PSE-Strata-Pro-24 Study Guide will be your best reliance

Setting Up for Professional Presentations, So as you see, we are the corporation with ethical code and willing to build mutual trust between our customers, Latest PSE-Strata-Pro-24 dumps exam training resources in PDF format download free try from Palo Alto Networks Systems Engineer Professional - Hardware Firewall PSE-Strata-Pro-24 is the name of Palo Alto Networks Systems Engineer Professional - Hardware Firewall exam dumps which covers all the knowledge points of the real Palo Alto Networks Systems Engineer Professional - Hardware Firewall exam.We will try our best to help our customers get the latest information about study materials, Choosing our PSE-Strata-Pro-24 Exam Torrent is not an end, we are considerate company aiming to make perfect in every aspect. In order to give you a basic understanding PSE-Strata-Pro-24 our various versions, each version offers a free trial, The successful endeavor of any kind of exam not only hinges on the PSE-Strata-Pro-24 effort the exam candidates paid, but the quality of practice materials' usefulness.

>> Palo Alto Networks PSE-Strata-Pro-24 Reliable Exam Materials <<

100% Pass Quiz 2026 Palo Alto Networks PSE-Strata-Pro-24: Pass-Sure Palo Alto Networks Systems Engineer Professional - Hardware Firewall Reliable

Exam Materials

ActualTestsQuiz provides you with the best preparation material. What makes ActualTestsQuiz PSE-Strata-Pro-24 brain dumps the first choice for their exam preparation is obviously its superior content that beats its competitors in quality and usefulness. ActualTestsQuiz currently has a clientele of more than 60,000 satisfied customers all over the world. This is factual proof of the incomparable quality of our products. The way our brain dumps introduce you the syllabus contents of PSE-Strata-Pro-24 Exam increases your confidence to perform well in the actual exam paper.

Palo Alto Networks Systems Engineer Professional - Hardware Firewall Sample Questions (Q11-Q16):

NEW QUESTION # 11

A large global company plans to acquire 500 NGFWs to replace its legacy firewalls and has a specific requirement for centralized logging and reporting capabilities.

What should a systems engineer recommend?

- A. Deploy a pair of M-1000 log collectors in the customer data center, and route logs from all 500 firewalls to the log collectors for centralized logging and reporting.
- B. Combine Panorama for firewall management with Palo Alto Networks' cloud-based Strata Logging Service to offer scalability for the company's logging and reporting infrastructure.
- C. Use Panorama for firewall management and to transfer logs from the 500 firewalls directly to a third- party SIEM for centralized logging and reporting.
- D. Highlight the efficiency of PAN-OS, which employs AI to automatically extract critical logs and generate daily executive reports, and confirm that the purchase of 500 NGFWs is sufficient.

Answer: B

Explanation:
A large deployment of 500 firewalls requires a scalable, centralized logging and reporting infrastructure.
Here's the analysis of each option:
* Option A: Combine Panorama for firewall management with Palo Alto Networks' cloud-based Strata Logging Service to offer scalability for the company's logging and reporting infrastructure
* The Strata Logging Service (or Cortex Data Lake) is a cloud-based solution that offers massive scalability for logging and reporting. Combined with Panorama, it allows for centralized log collection, analysis, and policy management without the need for extensive on-premises infrastructure.
* This approach is ideal for large-scale environments like the one described in the scenario, as it ensures cost-effectiveness and scalability.
* This is the correct recommendation.
* Option B: Use Panorama for firewall management and to transfer logs from the 500 firewalls directly to a third-party SIEM for centralized logging and reporting
* While third-party SIEM solutions can be integrated with Palo Alto Networks NGFWs, directly transferring logs from 500 firewalls to a SIEM can lead to bottlenecks and scalability issues.
Furthermore, relying on third-party solutions may not provide the same level of native integration as the Strata Logging Service.
* This is not the ideal recommendation.
* Option C: Highlight the efficiency of PAN-OS, which employs AI to automatically extract critical logs and generate daily executive reports, and confirm that the purchase of 500 NGFWs is sufficient
* While PAN-OS provides AI-driven insights and reporting, this option does not address the requirement for centralized logging and reporting. It also dismisses the need for additional infrastructure to handle logs from 500 firewalls.
* This is incorrect.
* Option D: Deploy a pair of M-1000 log collectors in the customer data center, and route logs from all 500 firewalls to the log collectors for centralized logging and reporting
* The M-1000 appliance is an on-premises log collector, but it has limitations in terms of scalability and storage capacity when compared to cloud-based options like the Strata Logging Service. Deploying only two M-1000 log collectors for 500 firewalls would result in potential performance and storage challenges.
* This is not the best recommendation.
References:
* Palo Alto Networks documentation on Panorama
* Strata Logging Service (Cortex Data Lake) overview in Palo Alto Networks Docs

NEW QUESTION # 12

Which two compliance frameworks are included with the Premium version of Strata Cloud Manager (SCM)? (Choose two)

- A. Center for Internet Security (CIS)
- B. Health Insurance Portability and Accountability Act (HIPAA)
- C. National Institute of Standards and Technology (NIST)
- D. Payment Card Industry (PCI)

Answer: A,D

Explanation:
Strata Cloud Manager (SCM), part of Palo Alto Networks' Prisma Access and Prisma SD-WAN suite, provides enhanced visibility and control for managing compliance and security policies across the network. In the Premium version of SCM, compliance frameworks are pre-integrated to help organizations streamline audits and maintain adherence to critical standards.
A: Payment Card Industry (PCI)
PCI DSS (Data Security Standard) compliance is essential for businesses that handle payment card data. SCM Premium provides monitoring, reporting, and auditing tools that align with PCI requirements, ensuring that sensitive payment data is processed securely across the network.
B: National Institute of Standards and Technology (NIST)
NIST is a comprehensive cybersecurity framework used in various industries, especially in the government sector. However, NIST is not specifically included in SCM Premium; organizations may need separate configurations or external tools to fully comply with NIST guidelines.
C: Center for Internet Security (CIS)
CIS benchmarks provide security best practices for securing IT systems and data. SCM Premium includes CIS compliance checks, enabling organizations to maintain a strong baseline security posture and proactively address vulnerabilities.
D: Health Insurance Portability and Accountability Act (HIPAA)
HIPAA is a framework designed to protect sensitive healthcare information. While Palo Alto Networks provides general solutions that can be aligned with HIPAA compliance, it is not explicitly included as a compliance framework in SCM Premium.
Key Takeaways:
* The frameworks included in SCM Premium are PCI DSS and CIS.
* Other frameworks like NIST and HIPAA may require additional configurations or are supported indirectly but not explicitly part of the Premium compliance checks.
References:
* Palo Alto Networks Strata Cloud Manager Documentation
* Palo Alto Networks Compliance Resources

NEW QUESTION # 13

What is the minimum configuration to stop a Cobalt Strike Malleable C2 attack inline and in real time?

- A. Threat Prevention and Advanced WildFire with PAN-OS 10.0
- B. Advanced Threat Prevention and PAN-OS 10.2
- C. DNS Security, Threat Prevention, and Advanced WildFire with PAN-OS 9.x
- D. Next-Generation CASB on PAN-OS 10.1

Answer: B

Explanation:
Cobalt Strike is a popular post-exploitation framework often used by attackers for Command and Control (C2) operations. Malleable C2 profiles allow attackers to modify the behavior of their C2 communication, making detection more difficult. Stopping these attacks in real time requires deep inline inspection and the ability to block zero-day and evasive threats.
* Why "Advanced Threat Prevention and PAN-OS 10.2" (Correct Answer B)?Advanced Threat Prevention (ATP) on PAN-OS 10.2 uses inline deep learning models to detect and block Cobalt Strike Malleable C2 attacks in real time. ATP is designed to prevent evasive techniques and zero-day threats, which is essential for blocking Malleable C2. PAN-OS 10.2 introduces enhanced capabilities for detecting malicious traffic patterns and inline analysis of encrypted traffic.
* ATP examines traffic behavior and signature-less threats, effectively stopping evasive C2 profiles.
* PAN-OS 10.2 includes real-time protections specifically for Malleable C2.
* Why not "Next-Generation CASB on PAN-OS 10.1" (Option A)?Next-Generation CASB (Cloud Access Security Broker) is designed to secure SaaS applications and does not provide the inline C2 protection required to stop Malleable C2 attacks. CASB is not related to Command and Control detection.
* Why not "Threat Prevention and Advanced WildFire with PAN-OS 10.0" (Option C)?Threat Prevention and Advanced WildFire

are effective for detecting and preventing malware and known threats. However, they rely heavily on signatures and sandboxing for analysis, which is not sufficient for stoppingreal-time evasive C2 traffic. PAN-OS 10.0 lacks the advanced inline capabilities provided by ATP in PAN-OS 10.2.
* Why not "DNS Security, Threat Prevention, and Advanced WildFire with PAN-OS 9.x" (Option D)?While DNS Security and Threat Prevention are valuable for blocking malicious domains and known threats, PAN-OS 9.x does not provide the inline deep learning capabilities needed for real-time detection and prevention of Malleable C2 attacks. The absence of advanced behavioral analysis in PAN- OS 9.x makes this combination ineffective against advanced C2 attacks.

NEW QUESTION # 14
While a quote is being finalized for a customer that is purchasing multiple PA-5400 series firewalls, the customer specifies the need for protection against zero-day malware attacks.
Which Cloud-Delivered Security Services (CDSS) subscription add-on license should be included in the quote?

- A. Advanced WildFire
- B. AI Access Security
- C. App-ID
- D. Advanced Threat Prevention

Answer: A

Explanation:
Zero-day malware attacks are sophisticated threats that exploit previously unknown vulnerabilities or malware signatures. To provide protection against such attacks, the appropriate Cloud-Delivered Security Service subscription must be included.
* Why "Advanced WildFire" (Correct Answer C)?Advanced WildFire is Palo Alto Networks' sandboxing solution that identifies and prevents zero-day malware. It uses machine learning, dynamic analysis, and static analysis to detect unknown malware in real time.
* Files and executables are analyzed in the cloud-based sandbox, and protections are shared globally within minutes.
* Advanced WildFire specifically addresses zero-day threats by dynamically analyzing suspicious files and generating new signatures.
* Why not "AI Access Security" (Option A)?AI Access Security is designed to secure SaaS applications by monitoring and enforcing data protection and compliance. While useful for SaaS security, it does not focus on detecting or preventing zero-day malware.
* Why not "Advanced Threat Prevention" (Option B)?Advanced Threat Prevention (ATP) focuses on detecting zero-day exploits (e.g., SQL injection, buffer overflows) using inline deep learning but is not specifically designed to analyze and prevent zero-day malware. ATP complements Advanced WildFire, but WildFire is the primary solution for malware detection.
* Why not "App-ID" (Option D)?App-ID identifies and controls applications on the network. While it improves visibility and security posture, it does not address zero-day malware detection or prevention.
Reference: Palo Alto Networks Advanced WildFire documentation confirms its role in detecting and preventing zero-day malware through advanced analysis techniques.

NEW QUESTION # 15
Device-ID can be used in which three policies? (Choose three.)

- A. SD-WAN
- B. Policy-based forwarding (PBF)
- C. Security
- D. Quality of Service (QoS)
- E. Decryption

Answer: B,C,D

Explanation:
Device-ID is a feature in Palo Alto Networks firewalls that identifies devices based on their unique attributes (e.g., MAC addresses, device type, operating system). Device-ID can be used in several policy types to provide granular control. Here's how it applies to each option:
* Option A: Security
* Device-ID can be used in Security policies to enforce rules based on the device type or identity.
For example, you can create policies that allow or block traffic for specific device types (e.g., IoT devices).
* This is correct.

* Option B: Decryption
* Device-ID cannot be used in decryption policies. Decryption policies are based on traffic types, certificates, and other SSL/TLS attributes, not device attributes.
* This is incorrect.
* Option C: Policy-based forwarding (PBF)
* Device-ID can be used in PBF policies to control the forwarding of traffic based on the identified device. For example, you can route traffic from certain device types through specific ISPs or VPN tunnels.
* This is correct.
* Option D: SD-WAN
* SD-WAN policies use metrics such as path quality (e.g., latency, jitter) and application information for traffic steering. Device-ID is not a criterion used in SD-WAN policies.
* This is incorrect.
* Option E: Quality of Service (QoS)
* Device-ID can be used in QoS policies to apply traffic shaping or bandwidth control for specific devices. For example, you can prioritize or limit bandwidth for traffic originating from IoT devices or specific endpoints.
* This is correct.
References:
* Palo Alto Networks documentation on Device-ID

NEW QUESTION # 16

......

PSE-Strata-Pro-24 training materials have now provided thousands of online test papers for the majority of test takers to perform simulation exercises, helped tens of thousands of candidates pass the PSE-Strata-Pro-24 exam, and got their own dream industry certificates PSE-Strata-Pro-24 exam questions have an extensive coverage of test subjects and have a large volume of test questions, and an online update program. PSE-Strata-Pro-24 Training Materials are not only the passbooks for students passing all kinds of professional examinations, but also the professional tools for students to review examinations. In the past few years, PSE-Strata-Pro-24 exam torrent has received the trust of a large number of students and also helped a large number of students pass the exam smoothly.

PSE-Strata-Pro-24 Certification Cost: https://www.actualtestsquiz.com/PSE-Strata-Pro-24-test-torrent.html

Palo Alto Networks PSE-Strata-Pro-24 Reliable Exam Materials You will receive downloading link and password within ten minutes, and if you don't receive, just contact us, we will check for you, In the modern era of rapid development of this industry, the requirements for Palo Alto Networks PSE-Strata-Pro-24 Certification Cost employees are increasing day by day, It is proved by our loyal customers that our passing rate of PSE-Strata-Pro-24 practice materials has reached up to 98 to 100 percent up to now.

These sites are part of the rapidly growing set of infrastructure PSE-Strata-Pro-24 Reliable Exam Materials and support services that make it easier and cheaper to start and operate a full or parttime microbusiness.

This Premium Edition contains an enhanced version Review PSE-Strata-Pro-24 Guide of the Pearson Test Prep practice text software with four full practice exams, You will receive downloading link and password **PSE-Strata-Pro-24 Reliable Exam Materials** within ten minutes, and if you don't receive, just contact us, we will check for you.

100% Pass 2026 The Best Palo Alto Networks PSE-Strata-Pro-24: Palo Alto Networks Systems Engineer Professional - Hardware Firewall Reliable Exam Materials

In the modern era of rapid development of this PSE-Strata-Pro-24 industry, the requirements for Palo Alto Networks employees are increasing day by day, It is proved by our loyal customers that our passing rate of PSE-Strata-Pro-24 practice materials has reached up to 98 to 100 percent up to now.

Get soon and avail the big chance for your best selection for your future, Prepare with PSE-Strata-Pro-24 real exam questions to crack the test on the first try.
