Reliable GICSP Braindumps Sheet & Exam GICSP Questions Fee

Some people prefer to read paper materials rather than learning on computers. Of course, your wish can be fulfilled in our company. We have PDF version GICSP exam guides, which are printable format. You can print it on papers after you have downloaded it successfully. If you want to change the fonts, sizes or colors, you can transfer the GICSP exam torrent into word format files before printing. There are many advantages of the PDF version. Firstly, there are no restrictions to your learning. You can review the GICSP Test Answers everywhere. You spare time can be made good use. Secondly, you can make notes on your materials, which will accelerate your understanding of the GICSP exam guides. In a word, our company seriously promises that we do not cheat every customer.

GIAC Global Industrial Cyber Security Professional (GICSP) Sample Questions (Q27-Q32):

NEW QUESTION # 27

What is the primary benefit of having a documented ICS security program in place?

Response:

- A. It increases the complexity of system operations

- B. It ensures compliance with regulatory standards
- C. It reduces the need for physical security measures
- D. It allows unauthorized users to access ICS systems

Answer: B

NEW QUESTION # 28

What is an output of a Business Impact Analysis?

- A. Calculating the financial impact of a technology failure
- B. Determining the maximum time that systems can be offline
- C. Understanding all of the business's technology functions
- D. Prioritizing the business's processes

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

A Business Impact Analysis (BIA) primarily produces a prioritization of the business's processes (B) based on their criticality and impact on organizational goals.

While BIAs help understand downtime tolerance (A) and financial impacts (C), prioritization is the core output guiding recovery efforts.

Understanding technology functions (D) is part of broader asset and risk management but not the primary BIA output.

GICSP highlights BIA as essential for aligning ICS recovery priorities with business needs.

NEW QUESTION # 29

Which type of process is described below?

- A. Distributed
- B. Discrete
- C. Batch
- D. Continuous

Answer: C

Explanation:

The process described involves a defined quantity of ingredients being mixed and held for a fixed time before moving to the next step. This is a hallmark of a batch process.

Batch processes are executed in discrete lots or batches, where the process is started, controlled during the batch, and stopped or reset before the next batch.

Discrete processes (B) involve countable, separate units like assembled products.

Continuous processes (C) operate nonstop with steady conditions, common in chemical plants but not in batch brewing.

Distributed (D) refers to control architectures, not process type.

GICSP emphasizes the importance of understanding process types to tailor cybersecurity controls appropriate to their operational characteristics.

NEW QUESTION # 30

Which of the following is located in user mode of a typical realtime OS, but in kernel mode of a typical standard OS?

- A. Interprocess communication
- B. Virtual memory
- C. Device drivers
- D. Process scheduling

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In many real-time operating systems (RTOS), interprocess communication (IPC) mechanisms (A) operate in user mode to minimize latency and overhead.

In typical standard operating systems, IPC is usually handled by the kernel (kernel mode) for security and control.

Virtual memory (B), device drivers (C), and process scheduling (D) are typically kernel mode in both OS types.

GICSP covers these architectural differences important in ICS device security and performance.

NEW QUESTION # 31

As part of securing the ICS architecture, you need to isolate the control systems from external threats while maintaining data exchange between the business network and ICS network. Which of the following actions should you take?

(Select all that apply)

Response:

- A. Allow unrestricted access between the business and ICS networks
- B. Apply strict firewall rules between the networks
- C. Implement VLANs to separate network traffic
- D. Create a DMZ to isolate the control network

Answer: B,C,D

NEW QUESTION # 32

.....

Clients always wish that they can get immediate use after they buy our GICSP Test Questions because their time to get prepared for the exam is limited. Our GICSP test torrent won't let the client wait for too much time and the client will receive the mails in 5-10 minutes sent by our system. Then the client can log in and use our software to learn immediately. It saves the client's time.
