People from all walks of life all work hard for the future. You must work hard to upgrade your IT skills. Then, do you have obtained Salesforce Analytics-DA-201 certificate which is very popular? How much do you know about Analytics-DA-201 test? If you want to pass Analytics-DA-201 exam without enough exam related knowledge, how should you do? But don't you worry: VCE4Dumps will give assistance to you.

Salesforce Analytics-DA-201 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> ABAP SQL and Code Pushdown: This section of the exam measures the competencies of the SAP ABAP Cloud Developer related to performance optimization through ABAP SQL and code pushdown techniques. It ensures that the developer understands how to shift logic to the database layer using efficient SQL scripting to enhance performance in data-intensive applications.
Topic 2	<ul style="list-style-type: none"> SAP Clean Core Extensibility and ABAP Cloud: This part of the exam targets the SAP S 4HANA Technical Consultant and covers concepts of clean core extensibility using ABAP in the cloud. The focus is on in-app and side-by-side extensibility techniques, ensuring that custom code complies with cloud-readiness principles and does not compromise the upgrade stability of core systems.
Topic 3	<ul style="list-style-type: none"> Object-Oriented Design: This section of the exam evaluates the SAP ABAP Cloud Developer's understanding of object-oriented principles in the ABAP context. It focuses on class-based programming, inheritance, interfaces, and polymorphism, all crucial for building modular and maintainable ABAP cloud applications.
Topic 4	<ul style="list-style-type: none"> Core ABAP Programming: This part of the exam assesses the foundational programming skills of the SAP S 4HANA Technical Consultant. It includes knowledge of syntax, control structures, modularization, and internal tables in ABAP. The section aims to validate the candidate's proficiency in writing clean, efficient ABAP code using best practices.

Latest Analytics-DA-201 Dumps Pdf & Analytics-DA-201 Actual Test

If you prepare Analytics-DA-201 real exam with our training materials, we guarantee your success in the first attempt. Our test engine enables you practice Analytics-DA-201 exam questions in the mode of the formal test and enjoy the atmosphere of the actual test. Our Analytics-DA-201 Practice Test is a way of exam simulation that will mark your mistakes and remind you when you practice dump next time.

Salesforce Certified Tableau Data Analyst Sample Questions (Q135-Q140):

NEW QUESTION # 135

You have the following dataset.

Quarter	Sales	Calculation
2010 Q1	20,301	
2010 Q2	58,872	
2010 Q3	36,522	
2010 Q4	44,261	0.66%
2011 Q1	52,982	160.98%
2011 Q2	45,264	-23.11%
2011 Q3	63,121	72.83%
2011 Q4	87,867	98.52%
2012 Q1	77,777	46.80%
2012 Q2	118,448	161.68%
2012 Q3	83,829	32.81%
2012 Q4		

Which formula calculates the percent difference in sales relative to the same quarter the previous year as shown in the Calculation field?

- A. $(SUM([Sales]) - LOOKUP(SUM([Sales]), -4))$
- B. $(SUM([Sales]) / (LOOKUP(SUM([Sales]), -4))$
- C. $(SUM([Sales]) - LOOKUP(SUM([Sales]), -4)) / (LOOKUP(SUM([Sales]), -4))$
- D. $(ZN(SUM([Sales])) - LOOKUP(ZN(SUM([Sales]), -4))$

Answer: C

Explanation:

The formula in option B calculates the percent difference in sales relative to the same quarter the previous year. It subtracts the sales of the same quarter from the previous year from the current year's sales, and then divides this by the previous year's sales. This gives a percentage change, which aligns with what is shown in the Calculation field of your dataset. The LOOKUP function returns the value of a specified offset from the current row in the partition. In this case, the offset is -4, which means the value of the same measure four rows above the current row. This corresponds to the same quarter of the previous year, assuming the data is sorted by quarter. References:

NEW QUESTION # 136

A Data Analyst has a dataset that contains the following rows of sales data.

Month Year	Sales
February 2020	\$20,301
April 2020	\$36,522
January 2020	\$43,971
May 2020	\$52,982
July 2020	\$45,264
June 2020	\$58,872
March 2020	\$63,121
August 2020	\$77,777
October 2020	\$87,867
December 2020	\$83,829
September 2020	\$118,448
November 2020	\$77,777

The analyst needs to return a value of TRUE if a month has sales greater than \$50,000; otherwise, the formula must return a value of FALSE.

Which two formulas achieve this goal? (Choose two.)

- A. $MAX([Sales], 50000)$
- B. $IF [Sales] > 50000 THEN TRUE ELSE FALSE END$

- C. [Sales] > 50000
- D. SUM([Sales]) IN (50000)

Answer: B,C

NEW QUESTION # 137

You have the following visualization.

State	Name	Student ID	State	Avg. Score	
NC	Lamar High School	4050	NC	64	Abc
		4205	NC	67	Abc
	Memorial High School	4056	NC	66	Abc
		4220	NC	71	Abc
NY	Dewey High School	4183	NY	39	Abc
		4183	NY	39	Abc
		4247	NY	71	Abc
	Edwards High School	4124	NY	75.5	Abc

You Create a table calculation named Rank_Score that has a formula of RANK(AVG([Score])), and you drag Rank_Score to Text on the Marks cards.

What is the Rank Score value for Student ID 4220?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

To determine the Rank Score value for Student ID 4220, we look at the visualization provided and apply the table calculation of RANK(AVG([Score])). This function will rank the average scores in ascending order by default, with the lowest score receiving the rank of 1.

Based on the provided visualization, the scores for the students are as follows (from lowest to highest average score):

- * Student ID 4183: 39 (Rank 1)
- * Student ID 4220: 71 (Rank 6)
- * Student ID 4247: 71 (Rank 6, same score as ID 4220 so they share the same rank)
- * Student ID 4124: 75.5
- * Student ID 4050: 64
- * Student ID 4205: 67
- * Student ID 4056: 66

Since Student ID 4220 has an average score of 71, which is the third-highest score, it shares the rank with Student ID 4247.

However, since Tableau ranks without gaps, the actual rank assigned is 6, considering that there are two students with a rank of 4 (due to the same average score being the second lowest), making the next rank number 6.

Note: The actual ranks for the highest scores are not provided, but they are not needed to determine the rank for Student ID 4220.

NEW QUESTION # 138

You create the following worksheet

The Pick Measure parameter contains the following list of values

Users can select a value from Pick Measure to change the visualization to show either the Sales measure or the Profit measure.

Which formula is used in the Selected Measure calculated field to switch between measures?

- A. Case AVG([Pick Measure])
WHEN [Sales] then 1
WHEN [Profit] then 2
END

- B. Case [Pick Measure:
WHEN [Sales] then 1
WHEN [Profit] then 2 END
- C. Case STFMEPick Measure])
WHEN "Sales" then ([Sales])
WHEN "Profit" then ([Profit]) e:i
- D. Case [Pick Measure]
WHEN 1 then ([Sales])
WHEN 2 then ([Profit])
END

Answer: D

Explanation:

https://help.tableau.com/current/pro/desktop/en-us/parameters_swap.htm

This formula uses a parameter (Pick Measure) to switch between the Sales and Profit measures. When the user selects '1', it shows Sales, and when '2' is selected, it shows Profit. This dynamic switching is enabled by the Case function.

NEW QUESTION # 139

Open the link to Book1 found on the desktop. Open the Movie Durations worksheet.

Replace the existing data source with the Netflix_2019 data source.

Answer:

Explanation:

check the steps below in explanation.

Explanation:

To replace the existing data source with the Netflix_2019 data source, you need to do the following steps:

* Open the link to Book1 found on the desktop. This will open the Tableau workbook that contains the Movie Durations worksheet.

* Click on the Movie Durations tab at the bottom of the workbook to open the worksheet. You will see a bar chart that shows the number of movies by duration for the existing data source.

* Go to the Data Source tab at the bottom of the workbook to see the data source page. You will see a table that shows the fields and values from the existing data source.

* Click on the drop-down arrow next to the data source name at the top of the page and select Replace Data Source from the menu. This will open a dialog box that allows you to replace your data source with another one.

* Select Netflix_2019 from the list of available data sources and click OK. This will replace your existing data source with the Netflix_2019 data source and update your worksheet accordingly. You may need to fix any broken fields or calculations that result from the replacement.
