問題 #21

Which of the following is a virtualization standard specified by the Distributed Management Task Force (DMTF)?

- A. PCI Data Security Standard (PCI DSS)
- B. vCloud API
- C. Cloud Security Alliance (CSA)
- D. Open Virtualization Format (OVF)

答案： D

解題說明：

The Open Virtualization Format (OVF) is a standard developed by the Distributed Management Task Force (DMTF) for packaging and distributing virtual machines and software. It ensures interoperability across virtualization platforms, making it a key virtualization standard.

* Option A (PCI DSS): A security standard for payment cards, not virtualization-related.

* Option B (CSA): An organization, not a standard, focused on cloud security.

* Option C (vCloud API): A VMware-specific API, not a DMTF standard.

* "The Open Virtualization Format (OVF), established by the DMTF, standardizes virtual machine packaging for portability and compatibility across platforms" (Module: Virtualization and Cloud Computing, Section: Virtualization Standards).
