Preparing for the Certified Ethical Hacker Exam (CEHv13) (312-50v13) certification exam can be time-consuming and expensive. That's why we guarantee that our customers will pass the prepare for your Certified Ethical Hacker Exam (CEHv13) (312-50v13) exam on the first attempt by using our product. By providing this guarantee, we save our customers both time and money, making our 312-50v13 Practice material a wise investment in their career development.

In modern time, new ideas and knowledge continue to emerge, our 312-50v13 training prep has always been keeping up with the trend. Besides, they are accessible to both novice and experienced customers equally. Some customer complained to and worried that the former 312-50v13 training prep is not suitable to the new test, which is wrong because we keep the new content into the 312-50v13 practice materials by experts.

Mock 312-50v13 Exams | 100% Free Online Certified Ethical Hacker Exam (CEHv13) Version

The simulation of the actual 312-50v13 test helps you feel the real 312-50v13 exam scenario, so you don't face anxiety while giving the final examination. You can even access your last test results, which help to realize your mistakes and try to avoid them while taking the Certified Ethical Hacker Exam (CEHv13) (312-50v13) certification test.

ECCouncil Certified Ethical Hacker Exam (CEHv13) Sample Questions (Q218-Q223):

NEW QUESTION # 218

During a red team exercise at Horizon Financial Services in Chicago, ethical hacker Clara crafts an email designed to trick the company's CEO. The message, disguised as an urgent memo from the legal department, warns of a pending lawsuit and includes a link to a fake internal portal requesting the executive's credentials.

Unlike generic phishing, this attack is tailored specifically toward a high-ranking individual with decision-making authority.

- A. Whaling
- B. Clone Phishing
- C. Spear Phishing
- D. Consent Phishing

Answer: A

Explanation:

Whaling is the correct answer because the scenario describes a highly targeted phishing attempt aimed at a "big fish"-a senior executive (the CEO). In CEH terminology, whaling is a specialized form of phishing that focuses on high-profile, high-authority individuals (e.g., CEOs, CFOs, directors) to maximize impact. These targets often have access to sensitive data, financial approvals, privileged systems, and strategic communications, making their credentials significantly more valuable than those of typical employees.

The attacker (Clara) uses classic social engineering drivers emphasized in CEH training: authority (impersonating the legal department), urgency/fear (a "pending lawsuit"), and trust in internal processes (a link to a supposed internal portal). This combination is designed to short-circuit normal verification behavior and prompt quick compliance. The inclusion of a credential-harvesting link aligns with common phishing goals: capturing usernames/passwords, enabling account takeover, and potentially facilitating broader compromise (e.g., email access for business email compromise, lateral movement, or privileged escalation). Why the other options are less accurate: Spear phishing is also targeted, but it is a broader category aimed at specific individuals or groups at any level. The defining clue here is the executive-level target, which elevates it to whaling. Clone phishing involves copying a legitimate email previously received and swapping a malicious link or attachment-this detail is not present. Consent phishing typically abuses legitimate OAuth /app consent flows rather than a fake portal requesting credentials.

NEW QUESTION # 219

A large company intends to use Blackberry for corporate mobile phones and a security analyst is assigned to evaluate the possible threats. The analyst will use the Blackjacking attack method to demonstrate how an attacker could circumvent perimeter defenses and gain access to the Prometric Online Testing - Reports

https://ibt1.prometric.com/users/custom/report_queue/rq_str... corporate network. What tool should the analyst use to perform a Blackjacking attack?

- A. BBCrack
- B. Paros Proxy
- C. BBProxy
- D. Bloover

Answer: C

NEW QUESTION # 220

An organization uses SHA-256 for data integrity verification but still experiences unauthorized data modification. Which cryptographic tool would best resolve this issue?

- A. SSL/TLS certificates
- B. Asymmetric encryption
- C. Digital signatures
- D. Symmetric encryption

Answer: C

Explanation:

CEH explains that hash functions alone, such as SHA-256, only provide integrity checks and do not verify authenticity or non-repudiation. Attackers can modify data and recompute the hash.

Digital signatures combine hashing with asymmetric cryptography, ensuring:

- * Integrity
- * Authentication
- * Non-repudiation

Option D is correct.

Options A and B provide confidentiality, not integrity assurance.

Option C secures communication channels, not standalone data integrity.

CEH explicitly recommends digital signatures for protecting data integrity against tampering.

NEW QUESTION # 221

Although FTP traffic is not encrypted by default, which layer 3 protocol would allow for end-to-end encryption of the connection?

- A. SSL

- B. SFTP
- **C. Ipsec**
- D. FTPS

Answer: C

Explanation:

<https://en.wikipedia.org/wiki/IPsec>

Internet Protocol Security (IPsec) is a secure network protocol suite that authenticates and encrypts the packets of data to provide secure encrypted communication between two computers over an Internet Protocol network. It is used in virtual private networks (VPNs).

IPsec includes protocols for establishing mutual authentication between agents at the beginning of a session and negotiation of cryptographic keys to use during the session. IPsec can protect data flows between a pair of hosts (host-to-host), between a pair of security gateways (network-to-network), or between a security gateway and a host (network-to-host). IPsec uses cryptographic security services to protect communications over Internet Protocol (IP) networks. It supports network-level peer authentication, data-origin authentication, data integrity, data confidentiality (encryption), and replay protection.

The initial IPv4 suite was developed with few security provisions. As a part of the IPv4 enhancement, IPsec is a layer 3 OSI model or internet layer end-to-end security scheme. In contrast, while some other Internet security systems in widespread use operate above layer 3, such as Transport Layer Security (TLS) that operates at the Transport Layer and Secure Shell (SSH) that operates at the Application layer, IPsec can automatically secure applications at the IP layer.

NEW QUESTION # 222

Which results will be returned with the following Google search query?

site:target.com -site:Marketing.target.com accounting

- A. Results matching all words in the query.
- B. Results from matches on the site marketing.target.com that are in the domain target.com but do not include the word accounting.
- **C. Results matching "accounting" in domain target.com but not on the site Marketing.target.com**
- D. Results for matches on target.com and Marketing.target.com that include the word "accounting"

Answer: C

Explanation:

This Google dork uses advanced operators:

site:target.com - restricts results to pages within the target.com domain

-site:Marketing.target.com - excludes results from the marketing.target.com subdomain accounting - the keyword to be matched So, it returns pages from target.com (excluding the marketing subdomain) that include the word "accounting".

Reference - CEH v13 Official Study Guide:

Module 2: Footprinting and Reconnaissance

Quote:

"Advanced search operators like site:, inurl:, intitle:, and the minus (-) operator help to include or exclude specific domains or pages when gathering public information via Google." Incorrect Options:

- A). Opposite logic - this excludes marketing.target.com
- B). Too general
- C). Incorrect because marketing.target.com is excluded

NEW QUESTION # 223

.....

As we all know, office workers have very little time to prepare for examinations. It would be too painful to waste precious rest time on the subject. But if they have 312-50v13 practice materials, things will become different. Our 312-50v13 study materials not only include key core knowledge, but also allow you to use scattered time to learn, so that you can learn more easily and achieve a multiplier effect. And after you study with our 312-50v13 Exam Questions for 20 to 30 hours, you will be able to pass the 312-50v13 exam for sure.

Online 312-50v13 Version: <https://www.dumpsquestion.com/312-50v13-exam-dumps-collection.html>

Actually, 312-50v13 practice exam test are with high hit rate, which can ensure you 100% pass, A few moments are enough to

introduce you to the excellent of the 312-50v13 braindumps and the authenticity and relevance of the information contained in them, ECCouncil Mock 312-50v13 Exams Below questions is what most candidates may care about, So why not take an immediate action to buy our 312-50v13 exam preparation?

He has earned three undergraduate degrees: a 312-50v13 bachelor of arts, with a major in English, You'll also find additional material, such as a chart that demonstrates how statistical Latest 312-50v13 Exam Experience power shifts as you manipulate sample size, mean differences, alpha and directionality.
