- A. `chmod 2775 /tmp`
- B. `chmod 1775 /tmp`
- C. `chmod +s /tmp`

- D. **chmod +t /tmp**
- E. **chmod 4775 /tmp**

Answer: B,D

NEW QUESTION # 11

Which command is used to create and initialize the files used to store quota information? (Specify ONLY the command without any path or parameters.)

Answer:

Explanation:

quotacheck

Explanation

The command that is used to create and initialize the files used to store quota information is quotacheck. This command scans one or more file systems for disk usage, creates, checks, and repairs quota files. The quota files are named aquota.user and aquota.group and are located in the root of the file system.

The quotacheck command should be run before using quotaon to enable disk quotas.

NEW QUESTION # 12
