

Cisco 300-425 Reliable Test Topics: Designing Cisco Enterprise Wireless Networks - PassCollection Test Engine Simulation

BONUS!!! Download part of PassCollection 300-425 dumps for free: https://drive.google.com/open?id=1FgmIE3XVwIU_doffiUtDzgF9uq-l4bYJ

Our 300-425 questions answers study guide is the best option for you to pass exam easily. Our experts are busy in providing the most updated content that could ensure your 100% success in 300-425 actual test. The up-to-date Cisco exam dumps consist of latest practice questions answers and explanations. We are devoted to take appropriate steps in improving our products like 300-425 Pass Guide.

The Cisco 300-425 Exam consists of 60-70 multiple-choice questions that must be completed within 90 minutes. It is conducted by Pearson VUE, a leading provider of computer-based testing and assessment services. To pass the exam, candidates must score at least 750 out of 1000 points. 300-425 exam fee is \$300, and it can be taken at any Pearson VUE testing center worldwide.

Preparation Process for Cisco 300-425 Exam

Career Opportunities

Passing the Cisco 300-425 exam and getting the CCNP Enterprise certification will improve your career potential. With this sought-after certificate under their belt, you can explore various job roles, including a Network Engineer, a Senior Enterprise Architect, a Cisco Certified Network Professional, a Cisco Wireless Network Engineer, a Network Manager, a Cisco Firewall Engineer, a Network Deployment Engineer, and many more. The average salary that the certified specialists can expect is up to \$71,000 per year. Some of these titles can provide them with as high as \$124,000 per annum. The number of wages will depend on their position, related tasks, and working experience.

Free PDF Quiz 2026 Cisco 300-425: Marvelous Designing Cisco Enterprise Wireless Networks Reliable Test Topics

Our 300-425 guide torrent has gone through strict analysis and summary according to the past exam papers and the popular trend in the industry and are revised and updated. The 300-425 exam questions have simplified the sophisticated notions. The software boosts varied self-learning and self-assessment functions to check the learning results. The software of our 300-425 Test Torrent provides the statistics report function and help the students find the weak links and deal with them. With this version of our 300-425 exam questions, you will be able to pass the exam easily.

Cisco 300-425 exam is intended for wireless network engineers, network administrators, and network architects who want to advance their career in the field of wireless networking. 300-425 exam is part of the CCNP Enterprise certification track, which is a professional-level certification that demonstrates the candidate's expertise in enterprise networking solutions. Passing the 300-425 Exam along with the core exam (350-401) and one concentration exam is required to earn the CCNP Enterprise certification. 300-425 exam consists of 60-70 multiple-choice and simulation questions and has a duration of 90 minutes.

Cisco Designing Cisco Enterprise Wireless Networks Sample Questions (Q267-Q272):

NEW QUESTION # 267

A customer has determined that aesthetics is a primary concern for their upcoming guest deployment. Which design consideration can be leveraged to address this concern?

- A. Use AIR-AP-BRACKET-1 to allow for greater mounting locations
- B. Use enclosures to hide the wireless infrastructure in the surrounding environment.
- C. Paint the access point to cover the LED from being noticeable.
- **D. Deploy environmentally friendly cabling components to blend into the environment.**

Answer: D

Explanation:

- Use cables that are resistive to bend loss if excessive bending of cables cannot be prevented due to installation constraints.
- Avoid mounting the cabling components in places that block accessibility to other equipment (such as a power strip or fans) in and out of the racks.

NEW QUESTION # 268

A customer has two locations named building 1 and building 2. Each location has a Cisco wireless network with these components:

Building 1

- 2 Cisco Catalyst 9800 Series Wireless Controllers in a high availability cluster
- 50 Cisco Catalyst 9100 APs
- Contractor SSID in VLAN 100
- Corporate SSID in VLAN 200
- mobility group configured to the building 2 WLCs

Building 2

- 2 Cisco Catalyst 9800 Series Wireless Controllers in a high availability cluster
- 20 Cisco Catalyst 9100 APs
- Contractor SSID in VLAN 300
- Corporate SSID in VLAN 400
- mobility group configured to the building 1 WLCs

The customer has a new security requirement mandating that all contractor SSID traffic must terminate on VLAN 100 on the building 1 WLCs for all locations. Which design approach must the engineer take?

- A. Use the building 2 WLCs as anchor controllers and building 1 as foreign controllers for the contractor SSID traffic.
- B. Use the WLCs at both buildings as anchor controllers and tunnel the contractor SSID traffic to building 1.
- **C. Use the building 2 WLCs as foreign controllers and building 1 as anchor controllers for the contractor SSID traffic.**

- D. Use the WLCs at both buildings as foreign controllers and tunnel the contractor SSID traffic to building 1.

Answer: C

Explanation:

To force contractor SSID traffic from Building 2 to terminate on VLAN 100 at Building 1, Building 2 must operate as the foreign controller for that SSID and tunnel the client traffic over the mobility (EoIP) tunnel to Building 1, which is configured as the anchor controller where VLAN 100 exists.

NEW QUESTION # 269

An engineer is designing a wireless network to support high availability. The network will need to support the total number of APs and client SSO. Live services should continue to work without interruption during the failover.

Which two requirements need to be incorporated into the design to meet these needs? (Choose two)

- A. WLC 7.5 code or more recent
- B. 10 sec RTT
- C. back-to-back direct connection between WLCs
- D. redundant vWLC
- E. controller high availability pair with one of the WLCs having a valid AP count license

Answer: C,E

NEW QUESTION # 270

An engineer is performing a predictive wireless design for a medical treatment environment, which requires data and voice services. What is the minimum requirement for the design?

- A. continuous -72 dBm coverage from one access point
- B. overlapping -67 dBm coverage from two access points
- C. continuous -67 dBm coverage from one access point
- D. overlapping -72 dBm coverage from two access points

Answer: C

NEW QUESTION # 271

A wireless network consultant must assess an existing wireless LAN controller. Which section must the consultant check before replacing the old APs with APs that are IEEE 802.11ac-capable?

- A. controller PSU
- B. number of AP licenses
- C. software version
- D. throughput capacity

Answer: C

Explanation:

Before replacing old APs with IEEE 802.11ac-capable APs, it is crucial to check the software version of the wireless LAN controller. The controller's firmware must support the newer standards and capabilities of 802.11ac APs. An outdated software version may not support the advanced features and performance enhancements offered by 802.11ac technology, leading to compatibility issues and suboptimal network performance.

NEW QUESTION # 272
