

Practice C_BW4H_2505 Mock & New C_BW4H_2505 Test Fee

What's more, part of that Prep4pass C_BW4H_2505 dumps now are free: https://drive.google.com/open?id=11L5_QxY0YZiBWLmbWgONvLIQzjrEdLL

The SAP Certified Associate - Data Engineer - SAP BW/4HANA (C_BW4H_2505) certification is one of the hottest career advancement credentials in the modern SAP world. The SAP Certified Associate - Data Engineer - SAP BW/4HANA (C_BW4H_2505) certification can help you to demonstrate your expertise and knowledge level. With only one badge of SAP Certified Associate - Data Engineer - SAP BW/4HANA in C_BW4H_2505 Certification, successful candidates can advance their careers and increase their earning potential.

C_BW4H_2505 certification is more and more important for this area, but the exam is not easy for many candidates. Our C_BW4H_2505 practice materials make it easier to prepare exam with a variety of high quality functions. Their quality function is observably clear once you download them. We have three kinds of C_BW4H_2505 practice materials moderately priced for your reference. All these three types of C_BW4H_2505 practice materials win great support around the world and all popular according to their availability of goods, prices and other term you can think of. Just come and buy them!

>> Practice C_BW4H_2505 Mock <<

New C_BW4H_2505 Test Fee - Valid Test C_BW4H_2505 Testking

In this highly competitive IT world, C_BW4H_2505 certification exam are more important than any time before. If you choose Prep4pass, we guarantee that you will easily pass C_BW4H_2505 exam at one time. If you can't pass C_BW4H_2505 Certification Exam, or there are any problems of C_BW4H_2505 exam dumps, we will give a full refund unconditionally. What are you waiting for? Hurry up and fight for your IT dream.

SAP Certified Associate - Data Engineer - SAP BW/4HANA Sample Questions (Q14-Q19):

NEW QUESTION # 14

Which external hierarchy properties can be changed in the query definition? Note: There are 3 correct answers to this question.

- A. Display text nodes
- B. Position of child nodes
- C. Sort direction
- D. Time dependency
- E. Exp to level

Answer: A,C,E

Explanation:

In SAP Data Engineer - Data Fabric, particularly when working with hierarchies in query definitions, external hierarchies are used to organize and structure data in a meaningful way for reporting and analysis. External hierarchies are predefined hierarchies that can be integrated into queries, and certain properties of these hierarchies can be adjusted within the query definition to meet specific reporting requirements.

* B. Sort direction

* The sort direction determines the order in which the hierarchy nodes are displayed in the query results. You can choose to sort the hierarchy in ascending or descending order based on node names, key values, or other attributes. This property is adjustable in the query definition to allow flexibility in how the data is presented to end users.

* In SAP BW (Business Warehouse) and SAP Data Engineer - Data Fabric, sorting options for hierarchies are available in the query designer under the hierarchy settings.

C). Exp to level

The "Exp to level" property allows you to specify the depth to which the hierarchy should be expanded when displayed in the query results. For example, if you set "Exp to level" to 3, the hierarchy will automatically expand to show all nodes up to the third level.

This is useful for controlling the granularity of data displayed without requiring manual expansion by the user.

Reference: In SAP BW Query Designer, this property is part of the hierarchy display settings and can be configured during query design.

D). Display text nodes

The "Display text nodes" property controls whether text nodes (descriptive labels) are shown alongside the hierarchy nodes in the query output. Text nodes provide additional context or descriptions for each node, making the hierarchy easier to interpret for end users.

Reference: This property is commonly used in SAP BW and SAP Data Engineer - Data Fabric to enhance the readability of hierarchical data in reports.

Incorrect Options: A. Position of child nodes

The position of child nodes within a hierarchy is determined by the hierarchy's structure and cannot be altered in the query definition. It is a fixed property defined during the creation of the hierarchy in the backend system.

Reference: SAP documentation specifies that structural properties like node positions are not modifiable at the query level.

E). Time dependency

Time dependency is a characteristic of the hierarchy itself, indicating whether the hierarchy changes over time (e.g., organizational structures that evolve). This property is defined during the creation of the hierarchy and cannot be changed in the query definition.

Reference: SAP BW and SAP Data Engineer - Data Fabric treat time-dependent hierarchies as static entities in the query context, meaning their time dependency cannot be altered dynamically.

Conclusion: The three correct answers-Sort direction, Exp to level, and Display text nodes-are properties that can be modified in the query definition to customize the presentation of external hierarchies. These adjustments provide flexibility in how hierarchical data is displayed and analyzed, enhancing the usability of reports and dashboards in SAP Data Engineer - Data Fabric environments.

NEW QUESTION # 15

You are involved in an SAP BW/4HANA project focusing on General Ledger reporting want to use the SAP ERP standard DataSource OFI_GL_14 (New GL Items) which is not active in your SAP ERP system.

Which transactions can be used to activate this DataSource? Note: There are 2 correct answers to this question.

- A. Transaction RSA5 (Installation of DataSource from Business Content) in the SAP ERP system
- B. Transaction RSDS (DataSource Repository) in the SAP BW/4HANA system
- C. Transaction RSA2 (DataSource Repository) in the SAP ERP system
- D. Transaction RSORBCT (Data Warehousing Workbench: BI Content) in the SAP BW/4HANA system

Answer: A,C

Explanation:

To activate a standard DataSource like OFI_GL_14 (New GL Items) in an SAP ERP system, you need to use transactions that are specifically designed for managing and activating DataSources within the ERP system.

Below is a detailed explanation of the correct answers:

* Explanation: This transaction is used in the SAP BW/4HANA system to activate or install BI Content objects such as InfoProviders, Transformations, and DTPs. However, it does not activate DataSources in the source SAP ERP system. Activation of DataSources must occur in the ERP system itself.

* RSORBCT is part of the BW/4HANA environment and is unrelated to activating DataSources in the ERP system.

Option B: Transaction RSA5 (Installation of DataSource from Business Content) in the SAP ERP system Explanation: RSA5 is used in the SAP ERP system to activate standard DataSources delivered by SAP. When you run this transaction, you can search for and activate specific DataSources, such as OFI_GL_14, from the Business Content. This ensures that the DataSource becomes available for extraction.

Reference: RSA5 is a key transaction for enabling standard DataSources in SAP ERP systems. It is essential for preparing the ERP system to deliver data to SAP BW/4HANA.

Option C: Transaction RSA2 (DataSource Repository) in the SAP ERP system Explanation: RSA2 provides access to the DataSource repository in the SAP ERP system. While it does not directly activate DataSources, it allows you to view, maintain, and manage the status of DataSources. You can also trigger the activation of DataSources from this transaction.

Reference: RSA2 is often used alongside RSA5 to verify the status of DataSources and ensure they are correctly configured for extraction.

Option D: Transaction RSDS (DataSource Repository) in the SAP BW/4HANA system Explanation:

RSDS is used in the SAP BW/4HANA system to view and manage DataSources that have been replicated from the source system. However, it cannot activate DataSources in the SAP ERP system. Activation must occur in the ERP system using transactions like RSA5 or RSA2.

Reference: RSDS is limited to managing DataSources within the BW/4HANA environment and does not interact with the ERP system's DataSource activation process.

Summary To activate the OFI_GL_14 DataSource in the SAP ERP system:

RSA5: Activates standard DataSources from Business Content.

RSA2: Provides access to the DataSource repository and supports maintenance tasks.

These transactions ensure that the DataSource is properly enabled in the ERP system, allowing it to deliver data to SAP BW/4HANA.

NEW QUESTION # 16

The Database Explorer in the Web IDE for SAP HANA provides a data file import wizard to create a table in SAP HANA from a flat file. What are possible actions after the system suggests the target structure? Note:

There are 3 correct answers to this question.

- A. Switch the table type between row store and column store.
- B. Change the order of the fields in the target table.
- C. Remove leading zeroes for a target table field.
- D. Adjust the suggested data type of the target table fields.
- E. Define sorting properties for a target table field.

Answer: B,C,D

NEW QUESTION # 17

Which tasks are part of the Business Blueprint phase in an SAP BW/4HANA project? Note: There are 2 correct answers to this question.

- A. Activate SAP business content objects that comply with the layered scalable architecture (LSA++) architecture
- B. Collect central individual information requirements
- C. Associate an InfoObject to a field in an Open ODS view
- D. Analyze key performance indicators of the business processes

Answer: B,D

Explanation:

The Business Blueprint phase in an SAP BW/4HANA project is a critical step in the implementation process. It focuses on understanding and documenting the business requirements, defining key performance indicators (KPIs), and gathering detailed information about the data and reporting needs of the organization. This phase lays the foundation for designing the technical solution in subsequent phases.

* Analyze key performance indicators of the business processes (Option A): During the Business Blueprint phase, it is essential to identify and analyze the key performance indicators (KPIs) that are critical for measuring the success of business processes. KPIs help define the metrics and reporting requirements that will guide the design of the SAP BW/4HANA system.

- * This task involves collaborating with business stakeholders to understand their goals and translating them into measurable KPIs.
- * For example, KPIs could include sales revenue, customer satisfaction scores, or inventory turnover rates.
- * Collect central individual information requirements (Option D):Gathering detailedinformation requirementsfrom stakeholders is a core activity in the Business Blueprint phase. This includes identifying the specific data elements, reports, and dashboards needed by different users across the organization.
- * Centralizing these requirements ensures that the solution design aligns with the needs of all stakeholders and avoids gaps in functionality.
- * For example, finance teams may require profitability reports, while supply chain teams may need inventory forecasts.
- * Associate an InfoObject to a field in an Open ODS view (Option B):Associating InfoObjects to fields in Open ODS views is a technical modeling task that occurs during theRealization phase, not the Business Blueprint phase. This phase focuses on implementing the solution based on the requirements gathered earlier.
- * Activate SAP business content objects that comply with the layered scalable architecture (LSA++) architecture (Option C):Activating SAP business content objects is also part of theRealization phase.

While LSA++ principles guide the overall architecture, the Business Blueprint phase focuses on understanding requirements rather than implementing technical components.

- * Purpose:The Business Blueprint phase aims to document the business processes, KPIs, and reporting requirements that will drive the SAP BW/4HANA implementation.
- * Deliverables:
 - * Business process documentation.
 - * List of KPIs and reporting requirements.
 - * Information models and data flow diagrams.
- * SAP Activate Methodology for SAP BW/4HANA:This methodology provides a structured approach to implementing SAP BW/4HANA, including detailed guidance on the Business Blueprint phase.
- * Link:SAP Activate for SAP BW/4HANA
- * SAP Best Practices for SAP BW/4HANA Implementation:This resource outlines the tasks and deliverables for each phase of the implementation, including the Business Blueprint phase.

Correct Answers:Why Other Options Are Incorrect:Key Points About the Business Blueprint Phase:
 References to SAP Data Engineer - Data Fabric:By focusing onanalyzing KPIsandcollecting information requirements, you ensure that the SAP BW/4HANA solution is aligned with the business needs and delivers value to stakeholders.

NEW QUESTION # 18

Which development object needs to be built to generate an HDI Container?

- A. SQL script procedure
- B. Package
- C. HDB module
- D. Space

Answer: C

NEW QUESTION # 19

.....

You may previously think preparing for the C_BW4H_2505 practice exam will be full of agony; actually, you can abandon the time-consuming thought from now on. Our C_BW4H_2505 exam question can be obtained within 5 minutes after your purchase and full of high quality points for your references, and also remedy your previous faults and wrong thinking of knowledge needed in this exam. As a result, many customers get manifest improvement and lighten their load by using our C_BW4H_2505 Latest Dumps. You won't regret your decision of choosing us. In contrast, they will inspire your potential. Besides, when conceive and design our C_BW4H_2505 exam questions at the first beginning, we target the aim customers like you, a group of exam candidates preparing for the exam.

New C_BW4H_2505 Test Fee: https://www.prep4pass.com/C_BW4H_2505_exam-braindumps.html

Prep4pass New C_BW4H_2505 Test Fee Provide 24/7 Support System: We have a support desk that ensures answering of every query of the candidate, The price of SAP C_BW4H_2505 updated exam dumps is affordable, SAP Practice C_BW4H_2505 Mock We will give you our software which is a clickable website that you can visit the product page, A Valuable Learning Experience Probably you've never imagined that preparing for your upcoming certification C_BW4H_2505 could be easy.

From the Foreword: > Smart CyberBranding is not about building the next Amazon or C_BW4H_2505 Reliable Test Syllabus

Yahoo or eBay, Make a real difference, Prep4pass Provide 24/7 Support System: We have a support desk that ensures answering of every query of the candidate.

New SAP Certified Associate - Data Engineer - SAP BW/4HANA Actual Test - C_BW4H_2505 Updated Torrent & SAP Certified Associate - Data Engineer - SAP BW/4HANA Practice Pdf

The price of SAP C_BW4H_2505 updated exam dumps is affordable, We will give you our software which is a clickable website that you can visit the product page.

A Valuable Learning Experience Probably you've never imagined that preparing for your upcoming certification C_BW4H_2505 could be easy, If your visit or use of this website, it means that you accept these terms and conditions C_BW4H_2505 and acknowledge that these terms and conditions can work as a binding agreement between you and the Company.
