Microsoft Dynamics 365 Business Central Functional Consultant Sample Questions (Q68-Q73):

NEW QUESTION # 68

A company uses Dynamics 365 Business Central.

The company performs an annual review of customer prices and determines that sales prices must rise by 10% for the coming year. You need to adjust the prices. What should you do?

- A. Manually add a sales price to the Sales Prices page.
- B. Manually add new lines to the Sales Lines Discount page.
- C. Use the action **Suggest Sales Price on Worksheet**.
- D. Manually add a sales price to the Sales Price Worksheet page.

Answer: C

Explanation:

Business Central provides a Sales Price Worksheet for mass updates of prices.

The Suggest Sales Price on Worksheet action allows you to apply a percentage increase (e.g., +10%) across selected items, customers, or customer groups.

This is the efficient way to implement an annual across-the-board price increase.

Other options:

A). Manually add new lines to the Sales Lines Discount page # This page is for discounts, not base sales prices.

C). Manually add a sales price to the Sales Prices page # Correct for individual adjustments, but not efficient for bulk changes.

D). Manually add a sales price to the Sales Price Worksheet page # You could enter manually, but using Suggest Sales Price automates the bulk adjustment process.
