- B. Outer
- C. **Left**

#### Answer: C

- A. The report can be edited in any language.
- B. **The source language is chosen from enabled locales on the instance when enabling translation.**
- C. The source language is set to the current locale of the individual who enabled translation.
- D. **The report can be edited only in the source language.**

**Answer: B,D**

\* Source Language Setting

\* When inline translation is enabled, the source language is selected from the list of locales enabled on the instance. This ensures that translation aligns with existing localization settings.

\* The report can only be edited in the source language to maintain consistency across translations.

\* Explanation of Correct Answers

\* Option A: Correct, as the source language must be chosen from the available locales when inline translation is activated.

\* Option B: Correct, as any edits to the report must be made in the source language to avoid inconsistencies.

\* Explanation of Incorrect Options

\* Option C: Incorrect, because the source language is not dynamically set to the current locale of the individual enabling translation.

\* Option D: Incorrect, because editing in any language is not allowed once inline translation is enabled-only the source language can be edited.
