!
interface E 0/1
ip bgp suppress-map BLOCK_SPECIFIC
!

!

```
route-map BLOCK_SPECIFIC permit 10
match ip address prefix-list PL_BLOCK_SPECIFIC
```

Answer: B

Explanation:

When the aggregate-address command is used within BGP routing, the aggregated address is advertised, along with the more specific routes.

The exception to this rule is through the use of the summary-only command. The "summary-only" keyword suppresses the more specific routes and announces only the summarized route.
