

Free PDF Quiz 2026 CompTIA High-quality CAS-005: CompTIA SecurityX Certification Exam Reliable Source

COMPTIA SECURITYX EXAM OVERVIEW

Exam Code	CAS-005
Exam Duration	165 minutes
Number of Questions	Maximum 90 questions
Question Types	Multiple Choice & Performance-based
Passing Score	Pass/Fail only (no scaled score)
Recommended Experience	10+ years in IT (5+ years in security)
Testing Provider	Pearson VUE (Test center or online)
Launch Date	December 17, 2024
Certification Validity	3 years (renewable through continuing education)

P.S. Free & New CAS-005 dumps are available on Google Drive shared by Real4dumps: <https://drive.google.com/open?id=151RDT4HkWbqVh-HXTgMEBF53OdqjuwZr>

When you follow with our CAS-005 exam questions to prepare for your coming exam, you will be deeply touched by the high-quality and high-efficiency. Carefully devised by the professionals who have an extensive research of the CAS-005 exam and its requirements, our CAS-005 study braindumps are a real feast for all the candidates. And if you want to have an experience with our CAS-005 learning guide, you can free download the demos on our website.

Some candidates say that they prepare for CAS-005 exam using some exam materials from other site but fail. If you still do not know how to pass exam, our CompTIA CAS-005 actual test will be a clever choice for you now. You will know both dump price and exam quantity should not take into key account. The most key consideration is the quality of CAS-005 Actual Test. If you are afraid of failure please rest assured to purchase our exam questions, I am sure that our CAS-005 actual test will help you pass exam.

CAS-005 Interactive Course | CAS-005 Reliable Exam Papers

Our passing rate is very high to reach 99% and our CAS-005 exam torrent also boost high hit rate. Our CAS-005 study questions are compiled by authorized experts and approved by professionals with years of experiences. They are compiled according to the latest development conditions in the theory and practice and the questions and answers are based on real exam. Our CAS-005 study questions are linked tightly with the exam papers in the past and conform to the popular trend in the industry. Our product convey you more important information with less amount of the questions and answers. Thus we can be sure that our CAS-005 guide torrent are of high quality and can help you pass the exam with high probability.

CompTIA SecurityX Certification Exam Sample Questions (Q89-Q94):

NEW QUESTION # 89

A company plans to implement a research facility with Intellectual property data that should be protected. The following is the security diagram proposed by the security architect

Which of the following security architect models is illustrated by the diagram?

- A. Zero Trust security model
- B. Perimeter protection security model
- C. Identity and access management model
- D. Agent based security model

Answer: A

Explanation:

The security diagram proposed by the security architect depicts a Zero Trust security model. Zero Trust is a security framework that assumes all entities, both inside and outside the network, cannot be trusted and must be verified before gaining access to resources.

Key Characteristics of Zero Trust in the Diagram:

Role-based Access Control: Ensures that users have access only to the resources necessary for their role.

Mandatory Access Control: Additional layer of security requiring authentication for access to sensitive areas.

Network Access Control: Ensures that devices meet security standards before accessing the network.

Multi-factor Authentication (MFA): Enhances security by requiring multiple forms of verification.

This model aligns with the Zero Trust principles of never trusting and always verifying access requests, regardless of their origin.

NEW QUESTION # 90

After an incident occurred, a team reported during the lessons-learned review that the team

- * Lost important Information for further analysis.
- * Did not utilize the chain of communication
- * Did not follow the right steps for a proper response

Which of the following solutions is the best way to address these findings?

- A. Requesting budget for better forensic tools to Improve technical capabilities for Incident response operations
- B. Requiring professional incident response certifications for each new team member
- C. Publishing the incident response policy and enforcing it as part of the security awareness program
- D. Building playbooks for different scenarios and performing regular table-top exercises

Answer: D

Explanation:

Building playbooks for different scenarios and performing regular table-top exercises directly addresses the issues identified in the lessons-learned review. Here's why:

* Lost important information for further analysis: Playbooks outline step-by-step procedures for incident response, ensuring that team members know exactly what to document and how to preserve evidence.

* Did not utilize the chain of communication: Playbooks include communication protocols, specifying who to notify and when. Regular table-top exercises reinforce these communication channels, ensuring they are followed during actual incidents.

* Did not follow the right steps for a proper response: Playbooks provide a clear sequence of actions to be taken during various types of incidents, helping the team to respond in a structured and effective manner. Regular exercises allow the team to practice these steps, identifying and correcting any deviations from the plan.

Investing in better forensic tools (Option A) or requiring certifications (Option C) are also valuable, but they do not directly address the procedural and communication gaps identified. Publishing and enforcing the incident response policy (Option D) is important but not as practical and hands-on as playbooks and exercises in ensuring the team is prepared.

NEW QUESTION # 91

A company's security policy states that any publicly available server must be patched within 12 hours after a patch is released. A recent IIS zero-day vulnerability was discovered that affects all versions of the Windows Server OS:

	OS	Externally available?	Behind WAF?	IIS installed?
Host 1	Windows 2019	Yes	Yes	Yes
Host 2	Windows 2008 R2	No	N/A	No
Host 3	Windows 2012 R2	Yes	Yes	Yes
Host 4	Windows 2022	Yes	No	Yes
Host 5	Windows 2012 R2	No	N/A	No
Host 6	Windows 2019	Yes	No	No

Which of the following hosts should a security analyst patch first once a patch is available?

- A. 0
- B. 1
- C. 2
- D. 3
- E. 4
- F. 5

Answer: E

Explanation:

Based on the security policy that any publicly available server must be patched within 12 hours after a patch is released, the security analyst should patch Host 1 first. Here's why:

Public Availability: Host 1 is externally available, making it accessible from the internet. Publicly available servers are at higher risk of being targeted by attackers, especially when a zero-day vulnerability is known.

Exposure to Threats: Host 1 has IIS installed and is publicly accessible, increasing its exposure to potential exploitation. Patching this host first reduces the risk of a successful attack.

Prioritization of Critical Assets: According to best practices, assets that are exposed to higher risks should be prioritized for patching to mitigate potential threats promptly.

NEW QUESTION # 92

A security operations analyst is reviewing network traffic baselines for nightly database backups. Given the following information:

Date	Time	Bandwidth consumed	SRC server	DST server
12/1	12:01 a.m.	11.24GB	PRDDB01	BACKUP01
12/2	12:01 a.m.	11.57GB	PRDDB01	BACKUP01
12/3	12:01 a.m.	11.70GB	PRDDB01	BACKUP01
12/3	12:46 a.m.	97.00GB	PRDDB01	85.34.17.98
12/4	12:01 a.m.	10.95GB	PRDDB01	BACKUP01

Which of the following should the security analyst do next?

- A. Quarantine PRDDB01 and then alert the database engineers
- B. Consult with a network engineer to determine the impact of bandwidth usage
- C. Refer to the incident response playbook for the proper response
- D. Review all the network logs for further data exfiltration

Answer: D

NEW QUESTION # 93

A systems engineer is configuring SSO for a business that will be using SaaS applications for its remote-only workforce. Privileged actions in SaaS applications must be allowed only from corporate mobile devices that meet minimum security requirements, but BYOD must also be permitted for other activity. Which of the following would best meet this objective?

- A. Install machine certificates on corporate devices and perform checks against the clients.
- B. Deploy application protection policies using a corporate, cloud-based MDM solution.
- C. Block any connections from outside the business's network security boundary.
- **D. Configure device attestations and continuous authorization controls.**

Answer: D

Explanation:

Device attestation ensures that only corporate-approved devices can perform privileged actions in SaaS applications. Continuous authorization monitors ongoing device compliance, dynamically adjusting permissions based on security posture.

- * Blocking connections (A) is too restrictive and does not accommodate BYOD.
- * Machine certificates (B) help with authentication but do not provide continuous security assessment.
- * MDM policies (D) secure mobile devices but do not apply real-time access controls for SaaS applications.

NEW QUESTION # 94

.....

The valid CompTIA SecurityX Certification Exam (CAS-005) practice tests are available in CAS-005 pdf format which works on all smart devices. When you have all the actual CAS-005 questions in a pdf document, it will be easy for you to prepare successfully for the CAS-005 test in a short time. Practice makes a man perfect and we can apply the same thing here.
