

# Effective Way to Prepare for Nutanix NCP-EUC Certification Exam?

BTW, DOWNLOAD part of ActualTestsQuiz NCP-EUC dumps from Cloud Storage: <https://drive.google.com/open?id=11G-y7s1gYWwTnf8N-IRTqvQecHdoA79H>

As is known to us, our company has promised that the NCP-EUC exam braindumps from our company will provide more than 99% pass guarantee for all people who try their best to prepare for the exam. If you are preparing for the exam by the guidance of the NCP-EUC study practice question from our company and take it into consideration seriously, you will absolutely pass the exam and get the related certification. So do not hesitate and hurry to buy our study materials.

The NCP-EUC Certification Exam covers a wide range of topics such as installation, configuration, and management of Nutanix VDI solutions, as well as the integration of third-party products and services. Candidates will be tested on their ability to design and deploy virtual desktop infrastructure solutions, troubleshoot issues, and optimize performance to ensure efficient and cost-effective VDI deployments.

## Free PDF Quiz Nutanix - NCP-EUC Updated Reliable Real Test

You can first download ActualTestsQuiz's free exercises and answers about Nutanix certification NCP-EUC exam as a try, then you will feel that ActualTestsQuiz give you a reassurance for passing the exam. If you choose ActualTestsQuiz to provide you with the pertinence training, you can easily pass the Nutanix Certification NCP-EUC Exam.

Nutanix NCP-EUC certification exam is an excellent opportunity for IT professionals to validate their skills and knowledge in Nutanix EUC solutions. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification exam is an industry-recognized certification that will help IT professionals to enhance their career opportunities and advance their careers. The Nutanix NCP-EUC Certification Exam is an excellent investment for IT professionals who want to stay ahead of the curve in the rapidly evolving field of End-User Computing.

## Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q82-Q87):

### NEW QUESTION # 82

What should the administrator do to optimize the virtual desktop environment?

- A. Add more resources to the cluster,
- B. remove memory reservation.
- **C. Verify if VAAI plugin is running.**
- D. Set Host policy to Balanced.

**Answer: C**

Explanation:

one of the possible ways to optimize the virtual desktop environment is to verify if VAAI plugin is running. VAAI (vStorage APIs for Array Integration) is a technology that enables VMware ESXi hosts to offload storage operations to Nutanix storage controllers. This can improve performance and efficiency of cloning, migrating, and snapshotting virtual machines<sup>234</sup>.

### NEW QUESTION # 83

Refer to the exhibit.

Refer to the exhibit.

Setting	Value	Unit
User inactivity timeout	30	min
Idle timeout	15	min
Max session duration	240	min
Reservation timeout	600	min

An administrator was made aware that user sessions are being randomly disconnected, and their applications and files being terminated. When the user launches new virtual desktop session, they are authenticated to a fresh desktop. Upon investigating, the administrator discovers that most users log in at 9:00 AM and are active through 2:00 PM.

What configuration setting must be modified in order to resolve this issue?

- **A. Max session duration**
- B. Idle timeout
- C. Reservation timeout
- D. user inactivity timeout

**Answer: A**

Explanation:

Nutanix Frame has several session settings that can affect the user experience and resource utilization. One of these settings is Max session duration, which defines how long a user can stay connected to a Frame session before it is automatically terminated<sup>1</sup>. If this setting is too low, users might experience random disconnections and lose their applications and files. Therefore, the configuration setting that must be modified in order to resolve this issue is A (Max session duration).

### NEW QUESTION # 84

There are 50 people in a legal department who are scheduled to have their laptops replaced with virtual desktops. Their application suite consists of Microsoft Office 365, Photoshop, and an IP-based application internally developed by the company.

Which option minimizes management overhead of the gold image, while providing the users with access to their application suite?

- A. Citrix Virtual Apps virtual hosted desktop with the application suite built into the gold image
- B. Persistent virtual machines with the application suite built into the gold image
- **C. Non-persistent MCS delivered virtual machines virtualizing the application suite**
- D. Remote Desktop Services virtualizing the application suite

**Answer: C**

Explanation:

ersistent virtual machines are those that retain all the user's personal settings, files, and customizations after each session<sup>12</sup>. Non-persistent virtual machines are those that reset to a predefined state after each session and do not save any user data<sup>12</sup>. MCS (Machine Creation Services) is a Citrix feature that allows administrators to create and manage multiple virtual machines from a single master image<sup>3</sup>. Remote Desktop Services (RDS) is a Microsoft feature that allows users to access applications or desktops hosted on a remote server<sup>4</sup>. Citrix Virtual Apps is a Citrix feature that allows users to access applications hosted on a remote server or cloud<sup>5</sup>

### NEW QUESTION # 85

Which scenario represents the best case for how an organization would deploy non-persistent desktops to their employee and customer base?

- A. Application Quality Assurance Testing
- B. High end developers
- C. Registration kiosks at a conference
- D. Private equity traders

**Answer: C**

Explanation:

This is because registration kiosks are used by multiple customers who do not need to personalize their desktops or applications, and who only need to perform a specific task such as registering or checking in.

Non-persistent desktops can provide a secure and consistent user experience for these customers, and also reduce management overhead for the organization.

### NEW QUESTION # 86

An administrator has deployed Citrix Virtual Apps and Desktops on a Nutanix dedicated VDI cluster.

What is the delivery method in use, based on the curator reports shown in the exhibit?

- A. Citrix Provisioning
- B. Full Clones
- C. Linked Clones
- D. Citrix MCS

**Answer: D**

Explanation:

the delivery method in use is Citrix MCS. Citrix Machine Creation Services (MCS) is a technology that creates and manages virtual machines from a master image. MCS uses Nutanix storage efficiency features such as deduplication and shadow clones to reduce storage consumption and improve performance. The exhibit shows that the VDI cluster has a high deduplication ratio (7.5x) and a low physical space usage (1.2 TB) compared to the logical space usage (9.1 TB), which indicates that MCS is in use.

### NEW QUESTION # 87
