

Reliable SOL-C01 Exam Camp, High SOL-C01 Passing Score

DOWNLOAD the newest Itcerttest SOL-C01 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1jGn88PETtmvqwoy5IgtjOI0tzaAtt6l7>

Do you want to pass SOL-C01 exam in one time? Itcerttest exists for the purpose of fulfilling your will, and it will be your best choice because it can meet your needs. After you buy our SOL-C01 Dumps, we promise you that we will offer free update service in one year. If you fail the exam, we also promise full refund.

Snowflake SOL-C01 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Data Protection and Data Sharing: This domain addresses continuous data protection through Time Travel and cloning, plus data collaboration capabilities via Snowflake Marketplace and private Data Exchange sharing.
Topic 2	<ul style="list-style-type: none">• Identity and Data Access Management: This domain focuses on Role-Based Access Control (RBAC) including role hierarchies and privileges, along with basic database administration tasks like creating objects, transferring ownership, and executing fundamental SQL commands.
Topic 3	<ul style="list-style-type: none">• Data Loading and Virtual Warehouses: This domain covers loading structured, semi-structured, and unstructured data using stages and various methods, virtual warehouse configurations and scaling strategies, and Snowflake Cortex LLM functions for AI-powered operations.
Topic 4	<ul style="list-style-type: none">• Interacting with Snowflake and the Architecture: This domain covers Snowflake's elastic architecture, key user interfaces like Snowsight and Notebooks, and the object hierarchy including databases, schemas, tables, and views with practical navigation and code execution skills.

100% Pass Quiz SOL-C01 - Efficient Reliable Snowflake Certified SnowPro Associate - Platform Certification Exam Camp

Itcerttest is the preeminent platform, which offers SOL-C01 exam materials duly equipped by experts. If you want you spend least time getting the best result, our exam materials must be your best choice. Our SOL-C01 exam materials are best suited to busy specialized who can learn in their seemly timings. Our study materials have satisfied in PDF format which can certainly be retrieved on all the digital devices. You can install it in your smartphone, Laptop or Tables to use. What most useful is that PDF format of our SOL-C01 Exam Materials can be printed easily, you can learn it everywhere and every time you like. It is really convenient for candidates who are busy to prepare the exam. You can save so much time and energy to do other things that you will make best use of you time.

Snowflake Certified SnowPro Associate - Platform Certification Sample Questions (Q139-Q144):

NEW QUESTION # 139

A Snowflake administrator needs to implement RBAC for accessing a highly sensitive dataset.

They decide to create several custom roles: 'DATA OWNER', 'DATA CURATOR', 'DATA ANALYST', and 'DATA READER'. The requirement is that 'DATA OWNER' should be able to grant privileges to other roles, but the 'DATA CURATOR' should only be able to modify the data but not grant any permissions. 'DATA ANALYST' should have the ability to create temporary tables to assist with analysis, and the 'DATA READER' should only have SELECT privileges on the data.

Which of the following SQL commands would correctly fulfill these requirements?

- Ⓐ GRANT OWNERSHIP ON TABLE TO ROLE DATA_OWNER; GRANT INSERT, UPDATE, DELETE ON TABLE TO ROLE DATA_CURATOR; GRANT CREATE TEMPORARY TABLE ON DATABASE TO ROLE DATA_ANALYST; GRANT SELECT ON TABLE TO ROLE DATA_READER;
- Ⓑ GRANT ALL PRIVILEGES ON TABLE TO ROLE DATA_OWNER; GRANT INSERT, UPDATE, DELETE ON TABLE TO ROLE DATA_CURATOR; GRANT CREATE TEMPORARY TABLE ON DATABASE TO ROLE DATA_ANALYST; GRANT SELECT ON TABLE TO ROLE DATA_READER;
- Ⓒ GRANT OWNERSHIP ON TABLE TO ROLE DATA_OWNER; GRANT INSERT, UPDATE, DELETE ON TABLE TO ROLE DATA_CURATOR; GRANT CREATE TABLE ON DATABASE TO ROLE DATA_ANALYST; GRANT SELECT ON TABLE TO ROLE DATA_READER;
- Ⓓ GRANT OWNERSHIP ON TABLE TO ROLE DATA_OWNER; GRANT INSERT, UPDATE ON TABLE TO ROLE DATA_CURATOR; GRANT CREATE TEMPORARY TABLE ON DATABASE TO ROLE DATA_ANALYST; GRANT SELECT ON TABLE TO ROLE DATA_READER;
- Ⓔ GRANT OWNERSHIP ON TABLE TO ROLE DATA_OWNER; GRANT INSERT, UPDATE, DELETE ON TABLE TO ROLE DATA_CURATOR; GRANT CREATE TEMPORARY TABLE ON DATABASE TO ROLE DATA_ANALYST; GRANT SELECT ON TABLE TO ROLE DATA_READER; GRANT ROLE DATA_CURATOR TO ROLE DATA_OWNER;

- A. Option C
- B. Option E
- C. Option D
- **D. Option A**
- E. Option B

Answer: D

Explanation:

Option A correctly grants ownership to DATA OWNER, allowing them to grant privileges, provides modification access to DATA_CURATOR, permits DATA_ANALYST to create temporary tables, and gives DATA_READER select privileges. Ownership is necessary for the OWNER to grant access to others. The CREATE TEMPORARY TABLE privilege is the correct privilege to allow creation of temp tables, and the SELECT privilege gives the read-only access needed. Option B will give ability to data_owner to change the security permissions. So it violates the principle of Least Privilege. Option C gives CREATE TABLE which is not temporary table, and it violates the Least Privilege principle. Option D does not grant the data_curator the delete permission, so violates the access requirements defined in the problem statement.

NEW QUESTION # 140

You have a large table called with columns such as and 'event_data'. You want to create a view named that calculates the number of distinct users active each day. This view will be used for reporting purposes. The data engineer responsible for the table has informed you that table has been modified to have a row access policy based on 'user_id'. What additional considerations are needed when querying this view?

- A. If the row access policy is not correctly enforced on the view, you may need to explicitly specify the 'WITH' clause to enforce the base table's row access policy within the view definition.
- B. You need to create a separate row access policy and apply it directly to the view, duplicating the logic from the 'web_eventS' table.
- C. No additional considerations are needed. The row access policy on the base table is automatically inherited by the view.
- D. The user querying must have the 'APPLY ROW ACCESS POLICY' privilege on the 'web_eventS' table.
- **E. The view must be created as a secure view to ensure the row access policy on the base table is enforced when querying the view.**

Answer: E

Explanation:

When a base table has a row access policy, and a view is created on top of it, the row access policy is not automatically inherited unless the view is created as a Secure View. Making it a Secure View guarantees enforcement of the underlying table's row access policy. A standard view might bypass the policy, so a secure view is used to ensure compliance. This approach mitigates the risk of exposing sensitive data. Other options are incorrect because row access policy needs to be explicitly defined by using Secure Views

and there is not WITH option for ROW ACCESS Policy.

NEW QUESTION # 141

What is the purpose of using the SHOW GRANTS ON SQL command for a specific object?

- A. To list all users in the account
- B. To list all roles in the account
- C. To list all privileges granted on the object
- D. To list all databases that have access to the object

Answer: C

NEW QUESTION # 142

You are tasked with creating a secure data sharing environment in Snowflake. You need to share a table named 'CUSTOMER RECORDS' from the 'SALES DB' database in your account (Account A) with another Snowflake account (Account B). You want to ensure that Account B can only query the data and cannot modify it in any way. Which of the following steps are REQUIRED to achieve this securely and effectively?

- A. Grant OWNERSHIP on the 'CUSTOMER RECORDS' table to the target account (Account B).
- B. Create an external function that reads the data from Account A and presents it to Account B.
- C. Create a database in Account B from the share provided by Account A, and grant SELECT privilege to the roles in Account B that need access.
- D. Create a share object in Account A and grant USAGE privilege on the database and SELECT privilege on the table to the share.
- E. Create a masking policy on all the columns of the 'CUSTOMER RECORDS' table before creating the share object.

Answer: C,D

Explanation:

To share data securely, you need to create a share object and grant appropriate privileges in the source account (A). This includes USAGE on the database and SELECT on the table. The target account (B) then creates a database from the share, which is a read-only copy of the data.

Finally, SELECT privilege must be granted to roles within account B to allow access. Granting OWNERSHIP to the target account (C) defeats the purpose of secure sharing and isn't required or best practice. External functions (D) are not the correct approach. Masking Policies (E) might be appropriate based on data sensitivity but aren't a fundamental requirement for simple data sharing.

NEW QUESTION # 143

How is the initial activation of the Snowflake Data Exchange feature, which is necessary for establishing private exchanges, typically accomplished?

- A. Activation requires a request to Snowflake Support.
- B. Activation requires a SQL command executed by ACCOUNTADMIN.
- C. Any Snowflake account administrator can enable Data Exchange with a click.
- D. Data Exchange is automatically enabled for all accounts.

Answer: A

Explanation:

Snowflake Data Exchange is not enabled by default. Accounts must open a support request to Snowflake Support, which then activates the feature. It cannot be enabled via UI or SQL. After activation, administrators may create private exchanges and listings.

NEW QUESTION # 144

.....

There are different ways to achieve the same purpose, and it's determined by what way you choose. A lot of people want to pass Snowflake certification SOL-C01 exam to let their job and life improve, but people participated in the Snowflake Certification

SOL-C01 Exam all knew that Snowflake certification SOL-C01 exam is not very simple. In order to pass Snowflake certification SOL-C01 exam some people spend a lot of valuable time and effort to prepare, but did not succeed.
