## **2026 156-536 Latest Dumps Book | Efficient CheckPoint 156-536 Authorized Exam Dumps: Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES)**

The PracticeDump is committed to ace your Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) (156-536) exam preparation and ensure your success on the first attempt. To achieve this objective the PracticeDump is offering top-rated, real, and updated Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) (156-536) exam questions in three different formats. The names of these formats are 156-536 PDF dumps file, desktop practice test software, and web-based practice test software.

### **CheckPoint Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Sample Questions (Q11-Q16):**

#### **NEW QUESTION # 11**

One of the ways to install Endpoint Security clients is 'Automatic Deployment'. Which of this is true for automatic deployment of Endpoint Security clients?

- A. Automatic deployment can be done on any Windows 10 machine without any Check Point component pre-installed
- B. Automatic deployment can be done on any Windows machine with Check Point SmartConsole first installed
- C. For automatic deployment to work, the client system must have SVN Foundation enabled in Windows 10 or downloaded and installed on other operating systems
- D. Automatic deployment first requires installation of the Initial Client package, which is exported and distributed manually

**Answer: C**

#### **NEW QUESTION # 12**

What does the Kerberos key tab file contain?

- A. Pairs of Kerberos principals and encryption keys
- B. Pairs of authentication settings and un-authentication settings
- C. Pairs of encryption and decryption keys
- D. Pairs of ktpass tools

**Answer: A**

#### **NEW QUESTION # 13**

On which search engines/web sites is the Safe Search feature supported in Harmony Endpoint?

- A. Google, Bing, and Yahoo!

- B. Google, Yahoo!, and OneSearch
- C. Google, Bing, Yahoo! by default, and extra support for Baidu, Yandex, Lycos, and Excite if the Harmony Endpoint Management is deployed in Cloud
- D. Google and Bing if the Harmony Endpoint Management is On-Premises deployment

**Answer: A**

#### NEW QUESTION # 14

Media Encryption and Port Protection (MEPP) provide strong encryption for removable media, such as?

- A. Cables and Ethernet cords
- B. USB drives and CD/DVDs
- C. **USB drives, CD/DVDs, and SD cards, and for external ports**
- D. External ports only

**Answer: C**

Explanation:

Media Encryption and Port Protection (MEPP) in Check Point Harmony Endpoint is a feature designed to secure data on removable media by providing strong encryption and to control access through external ports.

According to the CP\_R81.20\_Harmony\_Endpoint\_Server\_AdminGuide.pdf on page 280, under the section

"Media Encryption & Port Protection," it states:

"Protects data stored on the computers by encrypting removable media devices and allowing tight control over computers' ports (USB, Bluetooth, and so on)." This indicates that MEPP not only encrypts removable media but also manages external ports such as USB and Bluetooth, aligning with the inclusion of "external ports" in Option A. Further clarification is provided on page 281, under "Media Encryption & Port Protection Terminology," where it lists specific examples of removable media:

"Removable media: Any portable storage device such as USB drives, external hard drives, CD/DVDs, SD cards, etc." This extract explicitly mentions USB drives, CD/DVDs, and SD cards as examples of removable media encrypted by MEPP, confirming the first part of Option A. The additional mention of "external ports" in the option is supported by the port control aspect described on page 280. Thus, Option A fully captures the scope of MEPP's functionality.

\* Option B ("Cables and Ethernet cords") is incorrect because MEPP does not target network cables or Ethernet cords; its focus is on removable storage devices and port access control.

\* Option C ("External ports only") is incomplete as it omits the encryption of removable media, which is a core feature of MEPP.

\* Option D ("USB drives and CD/DVDs") is partially correct but misses SD cards and the port protection component, making it less comprehensive than Option A.

References:

CP\_R81.20\_Harmony\_Endpoint\_Server\_AdminGuide.pdf, Page 280: "Media Encryption & Port Protection" (describes encryption of removable media and control of ports).

CP\_R81.20\_Harmony\_Endpoint\_Server\_AdminGuide.pdf, Page 281: "Media Encryption & Port Protection Terminology" (lists examples of removable media).

#### NEW QUESTION # 15

In addition to passwords, what else does the pre-boot environment also support?

- **A. Options for multi-factor authentication methods**
- B. Options for double-factor authentication method
- C. Options for remote authentication method
- D. Options for single-factor authentication method

**Answer: A**

Explanation:

The Check Point Harmony Endpoint documentation clearly specifies that the pre-boot environment supports multi-factor authentication methods. These methods combine different authentication mechanisms to enhance security significantly beyond traditional password-based authentication alone.

Exact Extract from Official Document:

"You can also use TPM in addition to Pre-boot authentication for two-factor authentication." Reference: Check Point Harmony Endpoint Specialist R81.20 Administration Guide, Section: "Authentication before the Operating System Loads (Pre-boot)."

## NEW QUESTION # 16

A lot of applicants have studied from CheckPoint 156-536 practice material. They have rated it positively because they have cracked CheckPoint 156-536 Certification on their first try. PracticeDump guarantees its customers that they can pass the 156-536 test on the first attempt.
