## MB-500 Original Questions, MB-500 Complete Exam Dumps

Our MB-500 practice test is designed to accelerate your professional knowledge and improve your ability to solve the difficulty of MB-500 real questions. Well preparation of certification exam is the first step of passing MB-500 Exam Tests and can save you lots time and money. Our latest MB-500 dumps torrent contains the valid questions and answers which updated constantly.

The MB-500 Exam is a part of the Microsoft Certified: Dynamics 365: Finance and Operations Apps Developer Associate certification. Microsoft Dynamics 365: Finance and Operations Apps Developer certification is targeted towards developers who want to demonstrate their skills in developing and customizing Dynamics 365 for Finance and Operations apps. Microsoft Dynamics 365: Finance and Operations Apps Developer certification is recognized globally and is highly valued by employers. It is an excellent way to showcase your skills and knowledge in the field of Microsoft Dynamics 365.

## Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q294-Q299):

### NEW QUESTION # 294

You are a Dynamics 365 Finance developer. You need to create an extension class. Which action should you perform?

- A. Mark the class as final.
- B. Add the class buffer as the first parameter.
- C. Mark the class as protected.
- D. Mark the class as public.

**Answer: A**

Explanation:

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/extensibility/method-wrapping-coc>

### NEW QUESTION # 295

You need to create an extension of the table and perform a build and synchronize the newly extended table.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

□

**Answer:**

Explanation:

□

Explanation:

□

### NEW QUESTION # 296

You are configuring your developer environment by using Team Explorer.

There are several developers working on a customization.

You need to ensure that all code is checked in and then merged to the appropriate branches.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

□

**Answer:**

Explanation:

□

Explanation:

□

### NEW QUESTION # 297

You need to implement the payroll application data process.

Which two objects should you create? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. a class that extends `SysOperationServiceBase`
- B. an `UIBuilder` class that extends `SysOperationAutomaticUIBuilder`
- C. a service class that has a public method which accepts a single parameter for a contract
- D. a data contract class that uses the `DataContractAttribute` attribute

**Answer: A,D**

Explanation:

Scenario: You must develop a process to import payroll journals into the system.

A: Data Contract: Data contract class is the model class defining attributes needed for batch operations. These attributes are provided by the user, in a dialog. `DataContractAttribute` attribute is needed for the class and the properties methods requires `DataMemberAttribute` attribute.

C: Service: Service class extends from the `SysOperationServiceBase` class and contains the business logic for the batch operation. Developers often tend to add the business logic in controller classes, which violates the Single responsibility principle.

Incorrect Answers:

D: UI Builder: UI Builder class extends from `SysOperationAutomaticUIBuilder` class and is used for adding custom behavior to dialog / dialog fields dynamically constructed by the `SysOperation` framework.

### NEW QUESTION # 298

You create the following cloud-based Dynamics 365 Finance environments:

□ A developer creates code extensions in the Development environment. The developer checks the code changes into an Azure DevOps branch.

You need to deploy the code changes to the Standard Acceptance Test environment.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

□

### Answer:

Explanation:

□ Explanation:

□ Box 1: Build the code in the DevOps pipeline.

Box 2: Asset library

Run the export to the Asset library in Microsoft Dynamics Lifecycle Services (LCS).

Box 3: Select Maintain and Apply updates.

reprovision the target environment

If you copy a database between environments, the copied database won't be fully functional until you run the Environment reprovisioning tool to make sure that all Commerce components are up to date.

Follow these steps to run the Environment reprovisioning tool.

\* In your project's Asset Library, in the Software deployable packages section, click Import.

\* From the list of shared assets, select the Environment Reprovisioning Tool.

\* On the Environment details page for your target environment, select Maintain > Apply updates.

\* Select the Environment Reprovisioning tool that you uploaded earlier, and then select Apply to apply the package.

\* Monitor the progress of the package deployment.
