### Salesforce Certified Sales Cloud Consultant Sample Questions (Q135-Q140):

#### NEW QUESTION # 135

Cloud Kicks has 300,000 account records and 16 million invoices in a custom object with a master-detail relationship to the Account. Each account record takes a long time to display due to the rendering time of the invoice related list. What should the consultant do to solve this issue?

- A. Enable Collapsible Sections for the Invoice related list
- B. Enable indexing on all visible fields on the invoice related list.
- C. Move the invoice related list to a separate tab on the Lightning page.
- D. Convert the Invoice object into a lookup relationship.

**Answer: C**

Explanation:

Moving the invoice related list to a separate tab on the Lightning page can solve the issue of long rendering time, as it allows the account record to load faster without loading the invoice related list at the same time.

The user can then click on the tab to view the invoice related list when needed. This also improves the user experience and the page layout by reducing clutter and scrolling.

#### NEW QUESTION # 136

At a kickoff meeting for a new project, a consultant starts gathering information to be used in the project implementation plan. They ask the participants to define what project success will look like. Which strategy is the consultant using?

- A. Challenge Framing
- B. Design Direction
- C. Discovery

**Answer: C**

Explanation:

During the Discovery phase, consultants gather information to understand the client's requirements, challenges, and goals. By asking participants to define what project success looks like, the consultant is conducting discovery to establish clear objectives and align the implementation with the client's expectations. This approach helps ensure that the solution will meet the client's needs and supports setting measurable goals for the project.

Design Direction and Challenge Framing are useful strategies, but they occur after the Discovery phase, once the initial understanding of goals and challenges is established.

### NEW QUESTION # 137

During the Deploy phase at Cloud Kicks, users are finding it difficult to use a new system, which is adoption. How should the consultant avoid this issue in the future?

- A. Design a solution during the Build phase.
- **B. Gain buy-in during the Analyze phase.**
- C. Develop test scripts during the Plan phase.
- D. Conduct a Beta review during the Validate phase.

**Answer: B**

Explanation:

Gaining buy-in during the Analyze phase is the best way to avoid user adoption issues in the future when working on a new system at Cloud Kicks. Buy-in is the acceptance or support of an idea or proposal by stakeholders or decision-makers who have influence or authority over its implementation or outcome. The Analyze phase is a stage of a project where requirements are gathered and validated, business processes are mapped and optimized, and solutions are designed and evaluated. By gaining buy-in during the Analyze phase, the consultant can ensure that the new system meets the needs and expectations of the users and stakeholders, and that they are involved and engaged in the project from the start. This can increase user satisfaction and adoption of the new system.
