SC-400 시험 문제집 최신 인기 시험 덤프

Microsoft SC-400 덤프는 Microsoft SC-400 시험 문제 변경에 따라 주기적으로 업데이트를 진행하여 저희 덤프가 항상 가장 최신 버전이도록 보장해드립니다. 고객님들에 대한 깊은 배려의 마음으로 고품질 Microsoft SC-400 덤프를 제공해드리고 디테일한 서비스를 제공해드리는 것이 저희의 목표입니다.

최신 Microsoft Certified: Information Protection Administrator Associate SC-400 무료샘플문제 (Q247-Q252):

질문 # 247

You are implementing Microsoft Office 365 Message Encryption (OME) for a Microsoft 365 tenant named contoso.com.

You need to meet the following requirements:

* All email to a domain named fabhkam.com must be encrypted automatically.

* Encrypted emails must expire seven days after they are sent.

What should you configure for each requirement? To answer, select the appropriate options. NOTE: Each correct selection is worth one point.

정답:

설명:

질문 # 248

You have a Microsoft 365 E5 tenant.

You create sensitivity labels as shown in the Sensitivity Labels exhibit.

The Confidential/External sensitivity label is configured to encrypt files and emails when applied to content.

The sensitivity labels are published as shown in the Published exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

정답:

Topic 2, Fabrikam,

Overview

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all included on this exam in the time provided.

To answer the questions included in a case study, you will need In reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described In the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Cloud Environment

Fabrikam has a Microsoft 365 tenant that contains the following resources:

- * An Azure Active Directory (Azure AD) tenant that syncs to an on-premises Active Directory domain named corp.fabrikam.com
- * Microsoft Cloud App Security connectors configured for all supported cloud applications used by the company Some users have company Dropbox accounts.

Compliance Configuration

Fabrikam has the following in the Microsoft 365 compliance center:

- * A data loss prevention (DLP) policy is configured. The policy displays a tooltip to users. Users can provide a business justification to override a DLP policy violation.
- * The Azure information Protection unified labeling scanner is installed and configured.
- * A sensitivity label named Fabrikam Confidential is configured.

An existing third-party records management system is managed by the compliance department.

Human Resources (HR) Management System

The HR department has an Azure SQL database that contains employee information. Each employee has a unique 12-character alphanumeric ID. The database contains confidential employee attributes including payroll information, date of birth, and personal contact details.

On-premises Environment

You have an on-premises file server that runs Windows Server 2019 and stores Microsoft Office documents in a shared folder named Data.

All end-user computers are joined to the corp.fabrikam.com domain and run a third-party antimalware application.

Sales Contracts

Users in the sales department receive draft sales contracts from customers by email. The sales contracts are written by the customers and are not in a standard format.

Employment Applications

Employment applications and resumes are received by HR department managers and stored in either mailboxes, Microsoft SharePoint Online sites, OneDrive for Business folders, or Microsoft Teams channels.

The employment application form is downloaded from SharePoint Online and a serial number is assigned to each application. The resumes are written by the applications and in any format.

HR Requirements

You need to create a DLP policy that will notify the HR department of a DLP policy violation if a document that contains confidential employee attributes is shared externally. The DLP policy must use an Exact Data Match (EDM) classification derived from a CSV export of the HR department database.

The HR department identifies the following requirements for handling employment applications:

- * Resumes must be identified automatically based on similarities to other resumes received in the past
- * Employment applications and resumes must be deleted automatically two years after the applications are received.
- * Documents and emails that contain an application serial number must be identified automatically and marked as an employment application.

Sales Requirements

A sensitivity label named Sales Contract must be applied automatically to all draft and finalized sales contracts.

Compliance Requirements

Fabrikam identifies the following compliance requirements:

- * All DLP policies must be applied to computers that run Windows 10, with the least possible changes to the computers.
- * Users in the compliance department must view the justification provided when a user receives a tooltip notification for a DLP violation.
- * If a document that has the Fabrikam Confidential sensitivity label applied is uploaded to Dropbox, the file must be deleted automatically. - The Fabrikam Confidential sensitivity label must be applied to existing Microsoft Word documents in the Data shared folder that have a document footer containing the following string: Company use only.

* Users must be able to manually select that email messages are sent encrypted. The encryption will use Office 365 Message Encryption (OME) v2. Any email containing an attachment that has the Fabrikam Confidential sensitivity label applied must be encrypted automatically by using OME.

* Existing policies configured in the third-party records management system must be replaced by using Records management in the Microsoft 365 compliance center. The compliance department plans to export the existing policies, and then produce a CSV file that contains matching labels and policies that are compatible with records management in Microsoft 365. The CSV file must be used to configure records management in Microsoft 365.

Executive Requirements

You must be able to restore all email received by Fabrikam executives for up to three years after an email is received, even if the email was deleted permanently.

질문 # 251

Hotspot Question

You have a Microsoft 365 E5 subscription.

You plan to create a new sensitive information type (SIT) by using the Microsoft Purview compliance portal.

You need to copy and modify an existing SIT from which to create the new SIT.

What are two SITs that you can copy and modify? To answer, select the appropriate SITs in the answer area.

NOTE: Each selection is worth one point.

정답:
