## Oracle Project Management Cloud 2025 Implementation Professional Sample Questions (Q85-Q90):

### NEW QUESTION # 85

Which step within the functional setup manager helps you to move your verified setup data from the test environment to a production environment?

- A. Deploying
- B. Setting Up

- C. Maintaining
- D. Opting In
- E. Planning

**Answer: A**

Explanation:

The Deploying step within the functional setup manager helps you to move your verified setup data from the test environment to a production environment. This step allows you to export and import setup data across instances using spreadsheets or configuration packages. You can also compare and validate setup data across instances using reports and dashboards. #### NEW QUESTION # 88

A consulting services company is currently working on a business transformation project for your client that spans over 10 months. The total contract amount is 250000 USD. They have generated a revenue of 25000 USD and an Invoice of 10000 USD at the end of the first period.

The accounting entry for revenue is:

Dr Unbilled Receivables	25000
Cr Revenue	25000

and accounting entry for invoice is:

Dr Account Receivable	10000
Cr Deferred Revenue	10000

What will be the accounting entry when you reclassify the billing offset balances in the first period?

- A. Dr Accounts Receivables 10000 -  
Cr Unbilled Receivables 10000
- B. Dr Deferred Revenue 10000 -  
Cr Unbilled Receivables 10000
- C. Dr Unbilled Receivables 10000 -  
Cr Accounts Receivables 10000
- D. Dr Accounts Receivables 10000 -  
Cr Revenue 10000

**Answer: A**

Explanation:

When you reclassify the billing offset balances in the first period, the accounting entry is:

Dr Accounts Receivables 10000 - Cr Unbilled Receivables 10000

This entry reduces the unbilled receivables balance and increases the accounts receivables balance by the invoice amount. This is because the invoice has been created and sent to the customer, and the billing offset account is no longer needed. Reference:

#### NEW QUESTION # 89

Shift is one of the key elements in defining project and resource calendars.

Which two additional key elements are required to define the project and resource calendars? (Choose two.)

- A. Schedule Exceptions
- B. Time off
- C. Expenditure Type
- D. Workday Patterns
- E. Accounting Calendar

**Answer: A,D**

Explanation:

Shift is one of the key elements in defining project and resource calendars. Two additional key elements that are required to define the project and resource calendars are:

\* Schedule Exceptions: These are dates or periods that override the regular workday patterns and shifts of a calendar. They can be used to define holidays, vacations, or other special events that affect the availability of resources or projects.

\* Workday Patterns: These are patterns of working and nonworking days that repeat over a period of time. They can be used to define the standard working days and hours for a calendar. Time off, expenditure type, and accounting calendar are not key elements in defining project and resource calendars. Time off is an attribute of a resource assignment that reduces the availability of a resource.

Expenditure type is a classification of costs that determines how they are processed and accounted.

Accounting calendar is a calendar that defines the accounting periods and dates for transactions.
