Cisco 300-710 Questions - Reduce your Chances of Failure in Exam

Our passing rate is very high to reach 99% and our 300-710 exam torrent also boost high hit rate. Our 300-710 study questions are compiled by authorized experts and approved by professionals with years of experiences. Our 300-710 study questions are linked tightly with the exam papers in the past and conform to the popular trend in the industry. Thus we can be sure that our 300-710 Guide Torrent are of high quality and can help you pass the 300-710 exam with high probability.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q14-Q19):

NEW QUESTION # 14

An engineer must deploy a Cisco FTD appliance via Cisco FMC to span a network segment to detect malware and threats. When setting the Cisco FTD interface mode, which sequence of actions meets this requirement?

- A. Set to passive, and configure an access control policy with a prefilter policy defined

- B. Set to none, and configure an access control policy with an intrusion policy and a file policy defined
- **C. Set to passive, and configure an access control policy with an intrusion policy and a file policy defined**
- D. Set to none, and configure an access control policy with a prefilter policy defined

Answer: C

NEW QUESTION # 15

When do you need the file-size command option during troubleshooting with packet capture?

- A. when capture packets exceed 10 GB
- B. when capture packets are restricted from the secondary memory
- C. when capture packets are less than 16 MB
- **D. when capture packets exceed 32 MB**

Answer: D

Explanation:

Reference:

https://www.cisco.com/c/en/us/td/docs/security/firepower/620/configuration/guide/fpmc-config-guide-v62/troubleshooting_the_system.html

NEW QUESTION # 16

An engineer is creating an URL object on Cisco FMC How must it be configured so that the object will match for HTTPS traffic in an access control policy?

- A. Use the FQDN including the subdomain for the website
- B. Use the subject common name from the website certificate
- C. Define the path to the individual webpage that uses HTTPS.
- **D. Specify the protocol to match (HTTP or HTTPS).**

Answer: D

Explanation:

To block URL in ACP - you must create an object and add a line to ACP, where you can select protocol - HTTPS, HTTP, etc.

NEW QUESTION # 17

A company wants a solution to aggregate the capacity of two Cisco FTD devices to make the best use of resources such as bandwidth and connections per second. Which order of steps must be taken across the Cisco FTDs with Cisco FMC to meet this requirement?

- A. Configure the Cisco FTD interfaces, add members to FMC, configure cluster members in FMC, and create cluster in Cisco FMC
- B. Add members to Cisco FMC, configure Cisco FTD interfaces in Cisco FMC, configure cluster members in Cisco FMC, create cluster in Cisco FMC, and configure cluster members in Cisco FMC
- **C. Configure the Cisco FTD interfaces and cluster members, add members to Cisco FMC, and create the cluster in Cisco FMC**
- D. Add members to the Cisco FMC, configure Cisco FTD interfaces, create the cluster in Cisco FMC, and configure cluster members in Cisco FMC

Answer: C

Explanation:

In Chassis manager, you (STEP1) config the interfaces, create the cluster and add nodes, then you (STEP2) switch to FMC to add the units to FMC and build the cluster there.

https://www.cisco.com/c/en/us/td/docs/security/firepower/ftd-4100-9300-cluster.html#task_tqm_ghj_qgb

NEW QUESTION # 18

A Cisco Secure Firewall Threat Defense device is configured in inline IPS mode to inspect all traffic that passes through the interfaces in the inline set. Which setting in the inline set configuration must be selected to allow traffic to pass through uninterrupted when VDB updates are being applied?

- A. Strict TCP Enforcement
- B. Tap Mode
- C. Propagate Link State
- **D. Snort Fail Open**

Answer: D

Explanation:

In inline IPS mode, to ensure that traffic passes through uninterrupted when VDB (Vulnerability Database) updates are being applied, the "Short Fall Open" setting must be configured. This setting allows traffic to continue to flow through the firewall even if there are issues with the inspection process, such as during updates or if the inspection engine fails.

Steps:

In FMC, navigate to the inline set configuration.

Enable the "Short Fall Open" option.

Deploy the configuration to the FTD device.

This ensures that network traffic is not disrupted during updates or other issues with the inspection process.

NEW QUESTION # 19
