ISACA COBIT 2019 Foundation Sample Questions (Q61-Q66):

NEW QUESTION # 61

Which of the following COBIT components includes a list of artifacts with links to relevant governance and management practices?

- A. Organizational structures
- B. Policies and procedures
- C. Information flow and items

Answer: C

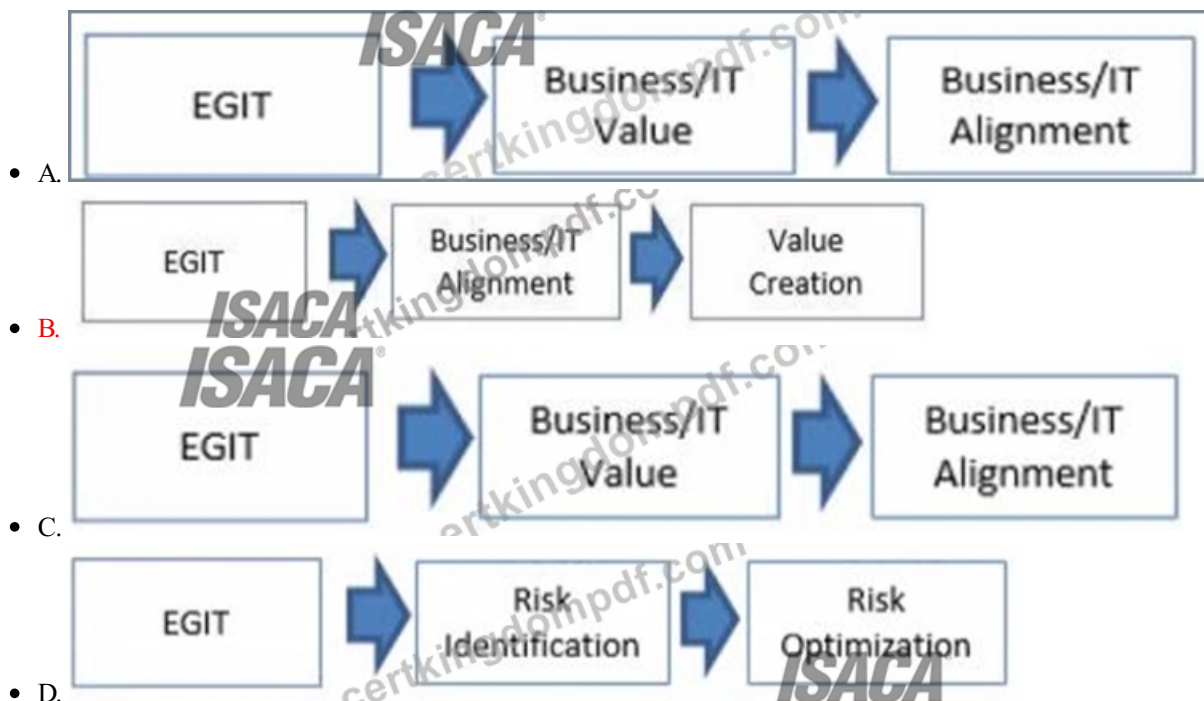

Explanation:

Explanation

The information flow and items component of COBIT includes a list of artifacts with links to relevant governance and management practices. An artifact is a tangible or intangible object that is produced, modified, or used by a process or activity. An artifact can be a document, a report, a record, a plan, a policy, a procedure, a service, a product, etc. The information flow and items component of COBIT provides a comprehensive list of artifacts that are relevant for each governance and management objective, as well as links to the practices that produce, modify, or use them. 12 COBIT 2019 Framework: Introduction and Methodology, COBIT 2019 Framework: Governance System

NEW QUESTION # 62

Which of the following figures BEST illustrates the context of an enterprise governance of information and technology (EGIT) system?

Answer: B

NEW QUESTION # 63

A governance or management objective always relates to:

- A. a group of related processes.
- **B. a single process.**
- C. a single related component.

Answer: B

Explanation:

A governance or management objective always relates to a single process. A governance or management objective is a desired outcome or result of a governance or management activity for information and technology. A process is a set of interrelated or interacting activities that transform inputs into outputs. A process can be described by its purpose, goals, practices, activities, inputs, outputs, roles, metrics, etc. A governance or management objective always relates to a single process by defining its purpose and goals, as well as providing guidance on how to perform it effectively and efficiently.12 References: COBIT 2019 Framework: Introduction and Methodology, COBIT 2019 Framework: Governance and Management Objectives

NEW QUESTION # 64

Which of the following is a KEY principle associated with the Accountable (A) role of an organizational structure?

- A. Accountability can be delegated.
- B. Accountability must be approved by the board.
- **C. Accountability cannot be shared.**

Answer: C

Explanation:

Explanation

A key principle associated with the Accountable (A) role of an organizational structure is that accountability cannot be shared. This means that only one person can be accountable for each activity or decision, and that person is ultimately liable for the success and achievement of the assigned tasks2, p. 34. References: 2: COBIT 2019 Framework: Introduction and Methodology

NEW QUESTION # 65

Which of the following I&T implementation methods requires the HIGHEST level of participation by users at multiple stages of software development?

- **A. Agile**
- B. Traditional
- C. Hybrid
- D. DevOps

Answer: A

Explanation:

Explanation

The IT implementation methods design factor describes how an enterprise develops, delivers, and maintains its IT solutions. There are four IT implementation methods defined in COBIT 2019: traditional, agile, DevOps, and hybrid. Each method has different implications for the governance and management of information and technology in terms of focus areas, processes, practices, roles, structures, and metrics. The IT implementation method that requires the highest level of participation by users at multiple stages of software development is agile. Agile is an IT implementation method that emphasizes flexibility, adaptability, collaboration, customer satisfaction, and value delivery. One of the characteristics of agile is that it involves frequent and direct interaction with users throughout the software development life cycle, from requirements gathering to testing to deployment. Users are considered as key stakeholders who provide feedback, input, validation, verification, acceptance, and evaluation of the IT solutions. Users are also involved in prioritizing the features and functionalities of the IT solutions based on their needs and expectations. Agile aims to deliver IT solutions that meet user requirements and expectations in a timely and cost-effective manner.
