

Accurate EAPA_2025 Study Material - EAPA_2025 Vce Format

P.S. Free & New EAPA_2025 dumps are available on Google Drive shared by PDFBraindumps: https://drive.google.com/open?id=1bAOlsQsCD5esRfP6S9vpt9v3bM_8ETqr

Considering that our customers are from different countries, there is a time difference between us, but we still provide the most thoughtful online after-sale service twenty four hours a day, seven days a week, so just feel free to contact with us through email anywhere at any time. Our commitment of helping you to Pass EAPA_2025 Exam will never change. Considerate 24/7 service shows our attitudes, we always consider our candidates' benefits and we guarantee that our EAPA_2025 test questions are the most excellent path for you to pass the exam.

Esri EAPA_2025 Exam Syllabus Topics:

Topic	Details
Topic 1	Automate Workflows: This section of the exam measures skills of GIS Specialist and examines your ability to build and manage models using ModelBuilder, construct geoprocessing workflows, chain together tools, and automate repeatable GIS tasks effectively.
Topic 2	Create and Share Maps and Layouts: This section of the exam measures skills of GIS Specialist and includes creating polished maps—designing layouts, inserting elements like scale bars, legends, titles, and sharing outputs via print, PDF, or packages for collaboration.
Topic 3	Edit Features and Organize Workflows: This section of the exam measures skills of GIS Analyst and evaluates your competency in editing geospatial features through snapping, templates, sketch tools, performing quality control, and managing simple tasks including map layouts and bookmarks.

Top Accurate EAPA_2025 Study Material – The Newest Vce Format Providers for Esri EAPA_2025

The Esri EAPA_2025 exam dumps are top-rated and real Esri EAPA_2025 practice questions that will enable you to pass the final Esri EAPA_2025 exam easily. PDFBraindumps is one of the best platforms that has been helping Esri EAPA_2025 Exam candidates. You can also get help from actual Esri EAPA_2025 exam questions and pass your dream Esri EAPA_2025 certification exam.

Esri ArcGIS Pro Associate 2025 Sample Questions (Q30-Q35):

NEW QUESTION # 30

A GIS specialist has a feature class of flights that contains information such as origin city, destination city, and the length of time that the flight was delayed. The specialist needs to display this information in a chart and aggregate the delayed time as an average.

- A. Matrix heat chart
- B. Box plot
- C. Scatter plot

Answer: A

Explanation:

ArcGIS Pro's Matrix Heat Chart is designed for visualizing relationships between two categorical fields- such as origin and destination cities- and summarizing a numeric field, like delay time, using aggregate functions (e.g., mean). This type of chart aligns perfectly with the requirement:

- * It allows you to set Column to the destination city and Row to the origin city.
- * Then choose the Number field as delay time and the Aggregation method as "Mean" to calculate average delay.
- * The chart displays each origin#destination pair as a cell, color-coded by the calculated average delay.

Official documentation highlights this example explicitly:

"Create a matrix heat chart to identify the flights that have the highest average arrival delay time between origin and destination city by setting the following properties... Aggregation-Mean; Number-DelayTime" Other chart types don't fit the requirement:

- * Box plots are used to display distributions and identify outliers; it doesn't aggregate by category pairs.
 - * Scatter plots show relationships between numeric variables on a continuous axis- not suitable for categorical city#pair aggregation.
- Therefore, the most appropriate choice for summarizing average journey delay by city pairs is the Matrix Heat Chart (C).

NEW QUESTION # 31

In ArcGIS Pro, which tool should be used to change the coordinate system of a dataset to a different coordinate system?

- A. Define Projection
- B. Convert Coordinate Notation
- C. Project

Answer: C

Explanation:

The Project tool is used to permanently convert data from one coordinate system to another, recalculating coordinates to match the new spatial reference.

- * Define Projection assigns a spatial reference to datasets that do not have one but does not transform coordinates.
- * Convert Coordinate Notation converts coordinate formats (such as MGRS, UTM, DMS) but not spatial references.

Therefore, the correct answer is B.

-

NEW QUESTION # 32

A GIS technician wants to share one layer from their map as a feature service to a portal. Which workflow should the technician use to accomplish this task?

- A. Click the Share tab > Web Layer > Publish Web Layer
- B. Right-click the layer > Sharing > Share As Layer Package
- C. Right-click the layer > Sharing > Share As Web Layer

Answer: C

Explanation:

Right-clicking the specific layer and selecting "Share As Web Layer" allows the technician to directly publish that individual layer as a feature service to a portal. This avoids sharing the entire map or unrelated layers.

- * Share tab > Web Layer (Option A) is used for sharing multiple layers but is less direct for single-layer publishing.
- * Layer Package (Option B) creates a package for sharing offline, not a web feature service.

Therefore, the correct answer is C.

NEW QUESTION # 33

A GIS analyst has a countrywide parcel dataset and needs to determine the property owners for the northern region of the country. The analyst wants to find owners whose last name contains Jon. Which query should the analyst use?

- A. Region = 'North' AND OwnerName = 'Jon'
- **B. Region = 'North' AND OwnerName LIKE 'Jon'**
- C. Region = 'North' OR OwnerName LIKE 'Jon'

Answer: B

Explanation:

The correct SQL expression should filter parcels that are both in the North region and where the OwnerName field contains 'Jon.'

The LIKE operator is appropriate when matching patterns or partial names.

* Option A correctly combines both conditions using AND.

* Option B would include any parcel in the North region or any parcel where OwnerName contains Jon, which is overly broad.

* Option C incorrectly uses exact equality, which would fail to match variations like 'Johnson' or 'Jonas.' Note: The LIKE expression typically includes wildcard characters (e.g., LIKE '%Jon%') but based on provided options, Option A represents the correct logic.

Therefore, the correct answer is A.

-

NEW QUESTION # 34

A GIS analyst has various datasets, maps, database connections, and toolboxes. The analyst plans on sharing this to their ArcGIS Online organization for easy access by coworkers.

Which package should be shared to the analyst's ArcGIS Online organization to facilitate collaboration by a coworker?

- **A. Project package**
- B. Map package
- C. Mobile map package

Answer: A

Explanation:

Project packages (.ppkx) contain all components of a project-including maps, layouts, database connections, styles, toolboxes, and models-making them ideal for sharing complete workspaces with coworkers who need access to everything.

* Mobile map packages (Option A) are designed for offline use on mobile devices.

* Map packages (Option B) include maps and data but do not include toolboxes, database connections, or project-level configurations.

Therefore, the correct answer is C.

-

NEW QUESTION # 35

.....

The EAPA_2025 guide dump from our company is compiled by a lot of excellent experts and professors in the field. In order to help all customers pass the exam in a short time, these excellent experts and professors tried their best to design the study version, which is very convenient for a lot of people who are preparing for the EAPA_2025 exam. You can find all the study materials about the exam by the study version from our company. More importantly, we can assure you that if you use our EAPA_2025 Certification guide, you will never miss any important and newest information. We will send you an email about the important study information every day in order to help you study well. We believe that our EAPA_2025 exam files will be most convenient for all people who want to take an exam.
