

Accurate EXIN - CDCP - Test Certified Data Centre Professional (CDCP) Assessment

BTW, DOWNLOAD part of PracticeTorrent CDCP dumps from Cloud Storage: https://drive.google.com/open?id=1n9bEXsr3S1ojEsFYFVrtVBk9HPx_XRCI

We can say that the EXIN CDCP practice questions are the top-notch Certified Data Centre Professional (CDCP) (CDCP) dumps that will provide you with everything that you must need for instant CDCP exam preparation. Take the right decision regarding your quick Certified Data Centre Professional (CDCP) (CDCP) exam questions preparation and download the real, valid, and updated EXIN CDCP exam dumps and start this journey.

EXIN CDCP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Equipment Racks: It discusses power rail• strip options, security considerations, and rack standards, properties and selection criteria.
Topic 2	<ul style="list-style-type: none">• Designing a Scalable Network Infrastructure: It covers ANSI• TIA-942 cabling hierarchy, network redundancy, structured Cabling System, and planning considerations.
Topic 3	<ul style="list-style-type: none">• Light: This topic covers light fixture types and placement, emergency lighting, and emergency Power Supply (EPS).
Topic 4	<ul style="list-style-type: none">• Power Infrastructure: It focuses ATS and STS systems, redundancy levels and techniques, static and dynamic UPS systems, battery types, thermo-graphics, and renewable energy factor (REF).
Topic 5	<ul style="list-style-type: none">• Data Centre Location, Building and Construction: It focuses on appropriate sites and components of an effective data centre and supporting facilities setup.
Topic 6	<ul style="list-style-type: none">• Auxiliary Systems: The topic covers water leak detection systems, data centre monitoring requirements, EMS, BMS and DCIM.

Topic 7	<ul style="list-style-type: none"> • Electro Magnetic Fields: The topic deals with effects of EMF on human health and equipment (H)EMP, standards, and EMF shielding solutions.
Topic 8	<ul style="list-style-type: none"> • Raised Floor • Suspended Ceiling: The topic discusses applicable standards, signal reference grid, and disability act and regulations.
Topic 9	<ul style="list-style-type: none"> • Water Supply: This topic is all about water supply techniques and application areas.

New CDCP Test Practice & Reliable CDCP Cram Materials

Our CDCP practice guide is cited for the outstanding service. In fact, we have invested many efforts to train our workers. All workers will take part in regular training to learn our CDCP study materials. So their service spirits are excellent. We have specific workers to be responsible for answering customers' consultation about the CDCP Learning Materials. All our efforts are aimed to give the best quality of CDCP exam questions and best service to our customers.

EXIN Certified Data Centre Professional (CDCP) Sample Questions (Q47-Q52):

NEW QUESTION # 47

Which one of the following is an Audible Signaling and Notification Device?

- A. Sirens
- B. Clocks
- C. Alarms
- D. Strobes

Answer: A

Explanation:

According to the CDCP® Preparation Guide, an audible signaling and notification device is a device that produces a sound to alert or notify the occupants of a data center of an event or condition. Sirens are examples of such devices, as they can emit loud and distinctive tones to warn of fire, emergency, or security incidents.

Strobes, on the other hand, are visual signaling and notification devices that produce flashes of light to attract attention or convey information. Alarms and clocks are not specific types of devices, but rather general terms that can refer to various audible or visual devices.

References: CDCP® Preparation Guide, page 30. Audible Visual Notification | System Sensor | Honeywell.

NEW QUESTION # 48

Which formula can be used to define risk?

- A. Risk = Impact * Probability
- B. Risk = Time * Quality
- C. Risk = Security * Criminality
- D. Risk = Probability * Cost

Answer: A

Explanation:

According to the CDCP Preparation Guide¹, risk can be defined as the product of impact and probability.

Impact is the measure of the negative consequences or losses that may result from a risk event, such as downtime, data loss, or damage to the data centre. Probability is the measure of the likelihood or frequency of a risk event occurring, based on historical data, expert judgment, or statistical analysis. By multiplying impact and probability, risk can be quantified and compared, which helps

in prioritizing and mitigating the risks. For example, a risk event that has a high impact but a low probability may have the same risk level as a risk event that has a low impact but a high probability.

NEW QUESTION # 49

Mean time between failures is best considered a measure of:

- A. Size
- B. Cost
- C. Duration
- **D. Reliability**

Answer: D

Explanation:

Mean time between failures (MTBF) is a measure of the reliability of a system or component. It represents the average time that a system or component will operate before it fails. The higher the MTBF, the more reliable the system or component is. MTBF is calculated by dividing the total time of operation by the number of failures that occur during that time. MTBF is used to compare the reliability of similar systems or components, and to help with maintenance planning, inventory management, and system design.

NEW QUESTION # 50

Which formula is correct?

- A. Power Factor = Volt-Ampere / Watt
- B. Volt-Ampere = Watt * Power Factor
- **C. Watt = Volt-Ampere * Power Factor**
- D. Watt = Volt-Ampere / Power Factor

Answer: C

NEW QUESTION # 51

Do I need to check the local standards if I already comply to international standards?

- A. Local standards do not to be checked as some countries have too many local standards, which will slow down the data centre construction.
- B. Data centres only need to comply to international standards since they are connected to a worldwide international network infrastructure.
- **C. You need to check the local standards to ensure compliance to these standards.**
- D. Compliance to only international standards is good enough as most local standards are derived from international standards.

Answer: C

Explanation:

Data centre design and infrastructure standards can vary from country to country, depending on the local regulations, codes, and practices. Therefore, it is important to check the local standards before designing, building, or operating a data centre in a specific location. Compliance to only international standards may not be sufficient or adequate to meet the local requirements, which could result in legal, financial, or operational risks. For example, some countries may have stricter fire safety, environmental, or energy efficiency standards than the international ones. Some countries may also have different electrical standards, such as voltage, frequency, or plug types. By checking the local standards, you can ensure that your data centre is compliant, safe, and efficient in the local context.

Infrastructure Codes and Standards4, page 1, section 1 5: Explaining the new family of ISO Data Centre Standards6, page 1, section 1 7: Standards for data centre certification. Is a changing coming?8, page 1, section 1

NEW QUESTION # 52

.....

Education degree does not equal strength, and it does not mean ability. Education degree just mean that you have this learning experience only. And the real ability is exercised in practice, it is not necessarily linked with the academic qualifications. Do not feel that you have no ability, and don't doubt yourself. When you choose to participate in the EXIN CDCP Exam, it is necessary to pass it. If you are concerned about the test, however, you can choose PracticeTorrent's EXIN CDCP exam training materials. No matter how low your qualifications, you can easily understand the content of the training materials. And you can pass the exam successfully.
