

Accurate NetSec-Pro Test - NetSec-Pro Practice Exams

P.S. Free 2025 Palo Alto Networks NetSec-Pro dumps are available on Google Drive shared by LatestCram:
<https://drive.google.com/open?id=1Lob7KIVi9mwFPkGyWV8KFJLmMyxRCkAI>

In order to help all people to pass the NetSec-Pro exam and get the related certification in a short time, we designed the three different versions of the NetSec-Pro study materials. We can promise that the products can try to simulate the real examination for all people to learn and test at same time and it provide a good environment for learn shortcoming in study course. If you buy and use the NetSec-Pro study materials from our company, you can complete the practice tests in a timed environment, receive grades and review test answers via video tutorials. You just need to download the software version of our NetSec-Pro Study Materials after you buy our study materials. You will have the right to start to try to simulate the real examination. We believe that the NetSec-Pro study materials from our company will not let you down.

In this hustling society, our NetSec-Pro study guide is highly beneficial existence which can not only help you master effective knowledge but pass the NetSec-Pro exam effectively. They have a prominent role to improve your soft-power of personal capacity and boost your confidence of conquering the exam with efficiency. As there are all keypoints in the NetSec-Pro Practice Engine, it is easy to master and it also helps avoid a waste of time for selecting main content.

Free PDF 2025 Palo Alto Networks First-grade NetSec-Pro: Accurate Palo Alto Networks Network Security Professional Test

The Palo Alto Networks Network Security Professional (NetSec-Pro) web-based practice test is compatible with these browsers: Chrome, Safari, Internet Explorer, MS Edge, Firefox, and Opera. This Palo Alto Networks Network Security Professional (NetSec-Pro) practice exam does not require any software installation as it is web-based. It has similar specifications to the Palo Alto Networks NetSec-Pro desktop-based practice exam software, but it requires an internet connection.

Palo Alto Networks NetSec-Pro Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> NGFW and SASE Solution Functionality: This part assesses the knowledge of firewall administrators and network architects on the functions of various Palo Alto Networks firewalls including Cloud NGFWs, PA-Series, CN-Series, and VM-Series. It covers perimeter and core security, zone security and segmentation, high availability, security and NAT policy implementation, as well as monitoring and logging. Additionally, it includes the functionality of Prisma SD-WAN with WAN optimization, path and NAT policies, zone-based firewall, and monitoring, plus Prisma Access features such as remote user and network configuration, application access, policy enforcement, and logging. It also evaluates options for managing Strata and SASE solutions through Panorama and Strata Cloud Manager.
Topic 2	<ul style="list-style-type: none"> Platform Solutions, Services, and Tools: This section measures the expertise of security engineers and platform administrators in Palo Alto Networks NGFW and Prisma SASE products. It involves creating security and NAT policies, configuring Cloud-Delivered Security Services (CDSS) such as security profiles, User-ID and App-ID, decryption, and monitoring. It also covers the application of CDSS for IoT security, Enterprise Data Loss Prevention, SaaS Security, SD-WAN, GlobalProtect, Advanced WildFire, Threat Prevention, URL Filtering, and DNS security. Furthermore, it includes aligning AIOps with best practices through administration, dashboards, and Best Practice Assessments.
Topic 3	<ul style="list-style-type: none"> Infrastructure Management and CDSS: This section tests the abilities of security operations specialists and infrastructure managers in maintaining and configuring Cloud-Delivered Security Services (CDSS) including security policies, profiles, and updates. It includes managing IoT security with device IDs and monitoring, as well as Enterprise Data Loss Prevention and SaaS Security focusing on data encryption, access control, and logging. It also covers maintenance and configuration of Strata Cloud Manager and Panorama for network security environments including supported products, device addition, reporting, and configuration management.
Topic 4	<ul style="list-style-type: none"> Connectivity and Security: This part measures the skills of network engineers and security analysts in maintaining and configuring network security across on-premises, cloud, and hybrid environments. It covers network segmentation, security and network policies, monitoring, logging, and certificate management. It also includes maintaining connectivity and security for remote users through remote access solutions, network segmentation, security policy tuning, monitoring, logging, and certificate usage to ensure secure and reliable remote connections.

Palo Alto Networks Network Security Professional Sample Questions (Q43-Q48):

NEW QUESTION # 43

In which two applications can Prisma Access threat logs for mobile user traffic be reviewed? (Choose two.)

- A. Strata Logging Service
- B. Service connection firewall
- C. Strata Cloud Manager (SCM)
- D. Prisma Cloud dashboard

Answer: A,C

Explanation:

Threat logs for Prisma Access mobile users can be reviewed in both Strata Cloud Manager (SCM) and Strata Logging Service. Prisma Cloud and service connection firewalls are not directly tied to mobile user traffic logs.

"Prisma Access logs are available in the Strata Cloud Manager and can also be sent to the Strata Logging Service for detailed analysis and threat visibility." (Source: Prisma Access Administration Guide)

NEW QUESTION # 44

What is the recommended upgrade path from PAN-OS 9.1 to PAN-OS 11.2?

- A. 9.1 # 10.0 # 11.

- B. 9.1 # 11.0 # 11.2
- **C. 9.1 # 10.0 # 11.2**
- D. 9.1 # 11.

Answer: C

Explanation:

Palo Alto Networks requires upgrading to the next major feature release before moving to newer releases.

This ensures stability and compatibility.

"When upgrading across multiple major PAN-OS releases, you must upgrade to each intermediate major feature release. Skipping major releases is not supported." (Source: Upgrade Considerations) For PAN-OS 9.1 # 11.2, the proper path is:

9.1 # 10.0 # 11.2

NEW QUESTION # 45

Which NGFW function can be used to enhance visibility, protect, block, and log the use of Post- quantum Cryptography (PQC)?

- A. Decryption profile
- B. DNS Security profile
- **C. Decryption policy**
- D. Security policy

Answer: C

Explanation:

A decryption policy allows the firewall to inspect encrypted traffic and apply security controls to Post- quantum Cryptography (PQC) usage, as PQC algorithms are typically implemented within encrypted sessions.

"Decryption policies enable the firewall to see and control encrypted traffic. This visibility and control extend to new cryptographic algorithms, including PQC, to ensure that security measures are applied consistently." (Source: Palo Alto Networks Decryption Overview) By decrypting sessions, you ensure that even PQC traffic can be inspected, logged, and subject to security profiles for visibility and policy enforcement.

NEW QUESTION # 46

A primary firewall in a high availability (HA) pair is experiencing a current failover issue with ICMP pings to a secondary device. Which metric should be reviewed for proper ICMP pings between the firewall pair?

- A. Bidirectional Forwarding Detection (BFD)
- B. Non-functional state
- C. Link monitoring
- **D. Heartbeat polling**

Answer: D

Explanation:

Heartbeat polling is a core HA function to monitor connectivity between HA peers, leveraging ICMP pings to determine link health and availability.

"Heartbeat Polling uses ICMP pings to verify the connectivity and health of the HA peers. If heartbeat polling fails, the firewall considers the peer to be down and may initiate failover." (Source: HA Link and Path Monitoring) If ICMP pings fail, checking heartbeat polling logs helps identify if link or path monitoring triggers the failover.

NEW QUESTION # 47

In a service provider environment, what key advantage does implementing virtual systems provide for managing multiple customer environments?

- A. Shared threat prevention policies across all tenants
- **B. Logical separation of control and Security policy**
- C. Centralized authentication for all customer domains
- D. Unified logging across all virtual systems

Answer: B

Explanation:

Virtual systems provide logical separation in a single physical firewall, allowing different customers (or tenants) to have isolated control and security policies.

"Virtual systems enable service providers to offer logically separated, independent environments on a single firewall. Each virtual system can have its own security policies, interfaces, and administrators." (Source: Virtual Systems) This ensures secure, tenant-specific segmentation within multi-tenant environments.

NEW QUESTION # 48

.....

The countless candidates have already passed their Palo Alto Networks Network Security Professional (NetSec-Pro) certification exam and they all used the real, valid, and updated NetSec-Pro exam questions. So, why not, take a decision right now and ace your Palo Alto Networks Network Security Professional (NetSec-Pro) exam preparation with top-notch Palo Alto Networks NetSec-Pro exam questions?
