Microsoft Power Automate RPA Developer Sample Questions (Q83-Q88):

NEW QUESTION # 83

You are developing a cloud flow.

The flow must be able to query several Azure endpoints and must use standard actions where possible.

You need to configure the flow.

Which actions should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Action
Issue POST requests to the Microsoft Graph API by using application permissions.	☐ HTTP ☐ HTTP with Azure AD ☐ Send an HTTP request to SharePoint ☐ Office 365 groups send an HTTP request
Issue GET requests to the Microsoft Graph API by using delegated permissions.	☐ HTTP ☐ HTTP with Azure AD ☐ Send an HTTP request to SharePoint ☐ Office 365 groups send an HTTP request
Issue GET requests to the SharePoint REST API by using delegated permissions.	☐ HTTP ☐ HTTP with Azure AD ☐ Send an HTTP request to SharePoint ☐ Office 365 groups send an HTTP request
Issue GET requests to the SharePoint REST API by using delegated permissions.	☐ HTTP ☐ HTTP with Azure AD ☐ Send an HTTP request to SharePoint ☐ Office 365 groups send an HTTP request
Issue POST requests to SharePoint REST API by using application permissions.	☐ HTTP ☐ HTTP with Azure AD ☐ Send an HTTP request to SharePoint ☐ Office 365 groups send an HTTP request

Answer:

Explanation:

Answer Area	
Requirement	Action
Issue POST requests to the Microsoft Graph API by using application permissions.	HTTP HTTP with Azure AD Send an HTTP request to SharePoint Office 365 groups send an HTTP request
Issue GET requests to the Microsoft Graph API by using delegated permissions.	HTTP HTTP with Azure AD Send an HTTP request to SharePoint Office 365 groups send an HTTP request
Issue GET requests to the SharePoint REST API by using delegated permissions.	HTTP HTTP with Azure AD Send an HTTP request to SharePoint Office 365 groups send an HTTP request
Issue GET requests to the SharePoint REST API by using delegated permissions.	HTTP HTTP with Azure AD Send an HTTP request to SharePoint Office 365 groups send an HTTP request
Issue POST requests to SharePoint REST API by using application permissions.	HTTP HTTP with Azure AD Send an HTTP request to SharePoint Office 365 groups send an HTTP request

NEW QUESTION # 84

You need to address the issue with the capacity planning flow. What should you do?

- A. Create a gateway cluster.
- B. Configure the system to send alerts when the gateway fails.
- C. Create a machine group and add machines to the group to handle requests.
- D. Increase the CPU and memory of the machine on which the gateway is hosted.

Answer: A

Explanation:

According to the scenario, the capacity planning flow fails when the gateway is offline. To avoid this issue, you can create a gateway cluster that consists of two or more gateways that share the same configuration and data sources. This way, if one gateway is offline, another gateway in the cluster can handle the requests and ensure high availability for your flow.

NEW QUESTION # 85

A company runs a process that includes multiple applications and departments.

The process contains several constraints and could be more efficient.

You need to understand the process and identify problems.

Which feature should you use for each scenario? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Process advisor software features
