NEW QUESTION # 26

Universal Containers has implemented an order management application. Each Order can have one or more Order Line items. The Order Line object is related to the Order via a master-detail relationship. For each Order Line item, the total price is calculated by multiplying the Order Line item price with the quantity ordered.

What is the best practice to get the sum of all Order Line item totals on the Order record?

- **A. Roll-up summary field**
- B. Apex trigger
- C. Quick action
- D. Formula field

Answer: A

Explanation:

A roll-up summary field is the best practice for aggregating values (e.g., sum, count, or average) from child records in a master-detail relationship. This feature automatically calculates the sum of all Order Line item totals and displays it on the parent Order record.

NEW QUESTION # 27

A developer creates a batch Apex job to update a large number of records, and receives reports of the job timing out and not completing.

What is the first step towards troubleshooting the issue?

- **A. Check the asynchronous job monitoring page to view the job status and logs.**
- B. Disable the batch job and recreate it with a smaller number of records.
- C. Decrease the batch size to reduce the load on the system.
- D. Check the debug logs for the batch job.

Answer: A

Explanation:

When troubleshooting batch Apex jobs:

* Asynchronous Job Monitoring:

* Navigate to Setup > Apex Jobs to view the status of the batch job.

* Provides information such as success, errors, and total execution time.

* This step is crucial to diagnose whether the issue is with system limits, batch size, or specific records.

* Debug Logs:

* After identifying the issue in the job monitoring page, use debug logs to pinpoint specific errors or bottlenecks.

* B. Check the debug logs for the batch job: Debug logs are a secondary step after checking the job status.

* C. Disable and recreate with fewer records: Premature without investigating the root cause.

* D. Decrease the batch size: Adjusting batch size is a solution but only after identifying the cause of the timeout.
