Appian Senior Developer Sample Questions (Q60-Q65):

NEW QUESTION # 60

You need to implement a Gender dropdown, where the choice labels may need to be altered in the future. The transactional database tables rely on this data for reporting, so the data must be accurate.

What is the recommended action?

- A. Create an expression rule and modify it as per the business requirement.
- B. Create a constant and modify it as needed per the business requirement.
- C. Create these entries in a table and reference them through a query entity rule as per the business requirement.

Answer: C

Explanation:

Storing the dropdown entries in a database table and referencing them through a query entity rule ensures data integrity, flexibility for future changes, and accuracy for reporting purposes.

NEW QUESTION # 61

You're creating a new record type with data sync enabled. Users in the "ACME Employees" group must be able to access the record list and start the New Case action.

What are two valid steps that you should perform to grant users the appropriate access? (Choose two.)

- A. Add the "ACME Employees" group as a Viewer on the record type.
- B. Grant Viewer permissions to the underlying interface object for the record list.
- C. Grant Initiator permissions to the underlying process model for the New Case action.
- D. Add the "ACME Employees" group as a Viewer to the data store mapped to the record.

Answer: A,C

Explanation:

Adding the "ACME Employees" group as a Viewer on the record type allows them to access the record list.

Granting Initiator permissions to the process model for the New Case action enables group members to start that action.

NEW QUESTION # 62

Consider this POST request:

NEW QUESTION # 63

You're refining a story regarding a highly regulated form, where information needs to be sent to a regulatory body at the end of each month to ensure that the business complies with laws and legislation. The story only concerns the creation of the form. You need to create a form that captures information to comply with the regulatory requirements.

Which two questions should you ask the business? (Choose two.)

- **A. What is the maximum length of each field?**
- B. Is the information sent to the regulatory body via an integration?
- C. How often is the information sent to the regulatory body?
- **D. What information does the regulatory body require?**

Answer: A,D

Explanation:

Knowing what information the regulatory body requires ensures the form captures all necessary data for compliance.

Understanding the maximum length of each field guarantees that the data collected will meet validation and regulatory constraints.

NEW QUESTION # 64

You're developing a user input form for a government services application that includes a file upload component.

If the uploaded file is a multimedia file (for example: .MP4, .MOV or .WAV), the customer wants these uploaded to Microsoft SharePoint instead.

What is the best way to achieve this requirement?

- **A. Use the out-of-the-box Appian Connected System as it has a pre-built connected system to SharePoint to provide a guided experience for designers to send and receive data.**
- B. Develop a connected system plug-in given SharePoint has an extensive API that cannot easily be resolved using the Appian out-of-the-box Connected System.
- C. Use the out-of-the-box Appian Connected System, but since it does not have any pre-built connected systems, you will need to use either a HTTP or OpenAI Connected System to connect with SharePoint.

Answer: A

Explanation:

Appian provides an out-of-the-box pre-built connected system for SharePoint, allowing you to integrate file uploads to SharePoint with a guided experience for configuration-making this the best way to fulfill the requirement.
