

CCSK Sample Questions - CCSK Exam Cost

CSA cloud security alliance®

CCSK Certificate of Cloud Security Knowledge

CCSK v5 Sample Questions

Check your knowledge before taking the exam

Domain 1: Cloud Computing Concepts & Architectures

Q1: Which of the following accurately defines the primary responsibility difference for IaaS, PaaS, and SaaS?

- In PaaS, the user manages the hardware and network infrastructure
- In SaaS, the user is responsible for managing and updating the application itself
- **In IaaS, the user manages applications, data, runtime, and OS**
- In IaaS, the provider manages both the infrastructure and applications

Justification: In the IaaS model, infrastructure management primarily lies with the user, except for the underlying hardware.

Q2: What does ISO/IEC 22123-1:2023 define cloud computing as?

- **A scalable and elastic pool of shareable resources**
- A static and local set of dedicated resources
- A fixed and isolated pool of private resources
- A static and flexible collection of isolated resources

Justification: This definition specifically highlights scalability, elasticity, and resource sharing, which are fundamental aspects of cloud computing as defined by ISO/IEC 22123-1:2023.

Q3: Which characteristic of cloud computing can potentially increase security risks when compared to traditional on-premises infrastructure?

- Elasticity
- Broad network access
- Resource pooling
- **Multi-tenancy**

Do you want to pass CCSK exam and get the related certification within the minimum time and effort? If you would like to give me a positive answer, you really should keep a close eye on our website since you can find the best CCSK study material in here--our CCSK Training Materials. We have helped millions of thousands of candidates to prepare for the CCSK exam and all of them have got a fruitful outcome, we believe you will be the next winner as long as you join in us!

Cloud Security Alliance Certificate of Cloud Security Knowledge (CCSK) is a globally recognized certification program that is designed to validate one's knowledge and expertise in cloud computing security. The CCSK exam is a vendor-neutral certification exam that is specifically designed to test an individual's understanding of cloud computing security principles, techniques, and best practices. Certificate of Cloud Security Knowledge v5 (CCSKv5.0) certification exam is based on the CSA Security Guidance for Critical Areas of Focus in Cloud Computing v4.0 and the ENISA (European Union Agency for Cybersecurity) Cloud Computing Risk Assessment report.

The CCSK Certification program is developed and maintained by the Cloud Security Alliance (CSA), a non-profit organization that is dedicated to promoting cloud security best practices. The CSA is a globally recognized authority in cloud security, with members in over 150 countries. The CCSK exam is based on the CSA's Security Guidance for Critical Areas of Focus in Cloud Computing, which is a comprehensive guide to securing cloud environments.

Ace Your Cloud Security Alliance CCSK Exam with PassSureExam:

Comprehensive Study Material and Real Exam Questions

In recent years, many people are interested in Cloud Security Alliance certification exam. So, Cloud Security Alliance CCSK test also gets more and more important. As the top-rated exam in IT industry, CCSK certification is one of the most important exams. With CCSK certificate, you can get more benefits. If you want to attend the exam, PassSureExam Cloud Security Alliance CCSK questions and answers can offer you convenience. The dumps are indispensable and the best.

Cloud Security Alliance Certificate of Cloud Security Knowledge v5 (CCSKv5.0) Sample Questions (Q200-Q205):

NEW QUESTION # 200

Which of the following information security policies defines the use of an organization's IT resources?

- A. Remote Work Policy
- B. Data Handling Policy
- C. Acceptable Use Policy
- D. Use of Cloud Services Policy

Answer: C

Explanation:

"An Acceptable Use Policy (AUP) defines appropriate and prohibited uses of organizational IT resources, including cloud services."
- CSA Security Guidance v4.0 - Domain 2: Governance and Risk Management

NEW QUESTION # 201

Which of the following should be your top priority when designing a cloud security program for your organization?

- A. Consider OWASP guideline
- B. Protection of cloud management plan
- C. Prevention of DDoS Attack
- D. Configure IPSEC tunnels

Answer: B

Explanation:

In most cases, those APIs are both remotely accessible and wrapped into a web-based user interface.

This combination is the cloud management plane, since consumers use it to manage and configure the cloud resources, such as launching virtual machines (instances) or configuring virtual networks. From a security perspective, it is both the biggest difference from protecting physical infrastructure (since you can't rely on physical access as a control) and the top priority when designing a cloud security program. If an attacker gets into your management plane, they potentially have full remote access to your entire cloud deployment.

Ref: CSA Security Guidelines V4

NEW QUESTION # 202

Lack of CPU or network bandwidth and intermittent access to provisioned resources are examples of which of the following cloud risk?

- A. Resource Exhaustion
- B. Software vulnerabilities
- C. API vulnerabilities
- D. Isolation failure

Answer: A

Explanation:

They are all examples of resource exhaustion

NEW QUESTION # 203

What is the primary focus during the Preparation phase of the Cloud Incident Response framework?

- A. Deploying automated security monitoring tools across cloud services
- **B. Establishing a Cloud Incident Response Team and response plans**
- C. Developing a cloud service provider evaluation criterion
- D. Conducting regular vulnerability assessments on cloud infrastructure

Answer: B

Explanation:

The Preparation phase focuses on setting up an incident response team and developing plans to handle incidents efficiently when they occur. Reference: [Security Guidance v5, Domain 11 - Incident Response]

NEW QUESTION # 204

What is resource pooling?

- A. Placing Internet ("cloud") data centers near multiple sources of energy, such as hydroelectric dams.
- B. Internet-based CPUs are pooled to enable multi-threading.
- C. None of the above.
- **D. The provider's computing resources are pooled to serve multiple consumers.**
- E. The dedicated computing resources of each client are pooled together in a colocation facility.

Answer: D

NEW QUESTION # 205

.....

This kind of prep method is effective when preparing for the Cloud Security Alliance CCSK certification exam since the cert demands polished skills and an inside-out understanding of the syllabus. These skills can be achieved when you go through intensive Cloud Security Alliance CCSK Exam Training and attempt actual Cloud Security Alliance CCSK.
