## 2025 Adobe Efficient AD0-E724 Dumps Vce

When you are struggling with those troublesome reference books; when you feel helpless to be productive during the process of preparing AD0-E724 exams; when you have difficulty in making full use of your sporadic time and avoiding procrastination. It is time for you to realize the importance of our AD0-E724 Test Prep, which can help you solve these annoyance and obtain a AD0-E724 certificate in a more efficient and productive way. Not only will you be able to pass any AD0-E724 test, but will gets higher score, if you choose our AD0-E724 study materials.

## Adobe Commerce Developer Professional Sample Questions (Q124-Q129):

### NEW QUESTION # 124

Under which section should the soft dependency for a module be listed in app/code/<Vendor>/<Module>/composer.json file?

- A. }
- B. }
- C. suggest\*: {
- D. }
- optional\*: {

**Answer: C**

Explanation:

Soft dependencies for a module should be listed under the "suggest" section in the composer.json file of the module. This section is used to list packages that enhance or work well with the module but are not strictly required for the module to function. By using the "suggest" section, developers can inform others about optional packages that could improve functionality or integration with the module, without making them mandatory dependencies.

### NEW QUESTION # 125

A new custom module is built for the existing Adobe Commerce store. A merchant has requested a few frontend updates. For this, a developer has to implement a custom style.

What is the location of the less file that will be included by default?

- A. `view/{area}/web/css/source/_module.less`
- **B. `view/{area}/web/css/source/main.less`**
- C. `view/{area}/web/css/style.less`

**Answer: B**

Explanation:

The `view/{area}/web/css/source/main.less` file is the default less file that is included by default. This file contains the main styles for the module.

In a custom module in Adobe Commerce, the default location for including custom LESS styles is typically `view/{area}/web/css/source/_module.less`. However, the most commonly used file for adding global styles is `view/{area}/web/css/source/_extend.less`. The `view/{area}/web/css/style.less` file is not standard, and the `main.less` file is used as an entry point for compilation but typically does not contain custom styles directly.

### NEW QUESTION # 126

An Adobe Commerce developer has installed a module from a third-party vendor. This module fires a custom event named `third_party_event_after` and also defines an observer named `third_party_event_after_observer` that listens to that event. The developer wants to listen to this custom event in their own module but wants to execute their observer's logic after the `third_party_event_after_observer` observer has finished executing.

What would the developer do to ensure their observer runs after the observer defined by the third-party module?

- **A. This is not possible as observers listening to the same event may be invoked in any order.**
- B. Ensure the third-party module is listed in the `<sequence>` node of the developer's `module.xml` file.
- C. Set the sort order of the new observer to be less than that of the third-party vendor's observer.

**Answer: A**

Explanation:

<https://developer.adobe.com/commerce/php/best-practices/extensions/observers/#do-not-rely-on-invocation-order>

### NEW QUESTION # 127

The `di.xml` file of a module attaches two plugins for the class `Action`.

The `PluginA` has the methods: `beforeDispatch`, `aroundDispatch`, `afterDispatch`. The `PluginB` has the methods: `beforeDispatch`, `afterDispatch`.

```
<config>
    <type name="Magento\Framework\App\Action\Action">
        <plugin name="vendor_module_plugina" type="Vendor\Module\Plugin\PluginA" sortOrder="10" />
        <plugin name="vendor_module_pluginb" type="Vendor\Module\Plugin\PluginB" sortOrder="20" />
    </type>
</config>
```

The `around` plugin code is:

```
class PluginA
{
    public function aroundDispatch(\Magento\Framework\App\Action\Action $subject, $next, $request)
    {
        // custom code
        return $request;
    }
}
```

What would be the plugin execution order?

• A.

```
PluginA::beforeDispatch()
PluginA::aroundDispatch()
PluginA::afterDispatch()
PluginA::beforeDispatch()
PluginA::aroundDispatch()
PluginB::beforeDispatch()
```

• B.

```
Action::dispatch()
PluginB::afterDispatch()
PluginA::aroundDispatch()
PluginA::afterDispatch()
```

• C.

```
PluginA::beforeDispatch()
PluginA::aroundDispatch()
PluginB::beforeDispatch()
Action::dispatch()
PluginB::afterDispatch()
PluginA::aroundDispatch()
```

**Answer: A**

Explanation:

<https://developer.adobe.com/commerce/php/development/components/plugins/#scenario-b-without-a-callable-around>

### NEW QUESTION # 128

An international merchant is complaining that changes are taking too long to be reflected on the frontend after a full product import. Thinking it may be database issues, the Adobe Commerce developer collects the following entity counts:

- \* Categories: 900
- \* Products: 300k
- \* Customers: 700k
- \* Customer groups : 106
- \* Orders: 1600k
- \* Invoices: 500k
- \* Creditmemos: 50k
- \* Websites : 15
- \* Stores : 45

What is a probable cause for this?

- A. The combination of the number of products, customer groups and websites is too big. This leads to a huge amount of values being stored in the price index which is too large to be processed at a normal speed.
- B. The combination of the number of products, categories and stores is too big. This leads to a huge amount of values being stored in the flat catalog indexes which are too large to be processed at a normal speed.
- C. The combination of the number of orders, customers, invoices and creditmemos is too big. This leads to a huge amount of values being stored in the customer grid index which is too large to be processed at a normal speed.

**Answer: B**

Explanation:

The combination of a large number of products, categories, and stores directly affects the flat catalog indexing process. Each product needs to be indexed across all categories and stores, which exponentially increases the data size of the index tables. This can significantly slow down the frontend updates after a full product import due to the high volume of data that needs to be processed.

Impact on Flat Catalog and Indexing:

In Magento, flat catalog tables are used to optimize product data retrieval, especially in stores with a large catalog. However, with high numbers of products, categories, and stores, the flat catalog tables become massive, making them slower to update.

In this scenario, the system must create and maintain an entry for each product in each store across every category, leading to a

substantial volume of data.

Why Option A is Correct:

This combination (products, categories, stores) is known to cause performance issues in indexing and data storage. It impacts the catalog indexes, which are critical for reflecting updates on the frontend.

Options B and C do not directly relate to the delay after product imports. Option B involves customer-related data, and Option C is related to price indexing, which affects a different area.

Optimization Recommendations:

Consider disabling the flat catalog and leveraging Elasticsearch for product and category search and filtering.

Additionally, increasing server resources or partitioning the data could help optimize performance.

## NEW QUESTION # 129

.....

The ITPassLeader is committed from the day first to ace the Commerce Developer Professional (AD0-E724) exam questions preparation at any cost. To achieve this objective ITPassLeader has hired a team of experienced and qualified AD0-E724 certification exam experts. They utilize all their expertise to offer top-notch Commerce Developer Professional (AD0-E724) exam dumps. These Adobe AD0-E724 exam questions are being offered in three different but easy-to-use formats.

**Key AD0-E724 Concepts:** <https://www.itpassleader.com/Adobe/AD0-E724-dumps-pass-exam.html>

Q4: How long can I get my Adobe Commerce AD0-E724 questions and answers after purchasing, Adobe AD0-E724 Dumps Vce  
Maybe some customers wonder why they have access to so many privileges, Adobe AD0-E724 Dumps Vce It is universally acknowledged that everyone yearns for passing the exam in the first time if he/she participates in the exam, Adobe AD0-E724 Dumps Vce Everyone is conscious of the importance and only the smart one with smart way can make it.

Squeeze all the confusion out of your content, Commands on the View menu ash\_e.jpg work on the active window only, Q4: How long can I get my Adobe Commerce AD0-E724 Questions and answers after purchasing?

## Latest AD0-E724 Exam Braindumps Materials - AD0-E724 Test Prep - ITPassLeader

Maybe some customers wonder why they have access to so many privileges, Test AD0-E724 Objectives Pdf It is universally acknowledged that everyone yearns for passing the exam in the first time if he/she participates in the exam.

Everyone is conscious of the importance and only the smart one with smart way can AD0-E724 make it, For example, you will learn how to remember the exam focus as much as possible in unit time and draw inferences about other cases from one instance.
