

Free PDF MB-820 - Microsoft Dynamics 365 Business Central Developer–The Best Original Questions

BTW, DOWNLOAD part of DumpsValid MB-820 dumps from Cloud Storage: <https://drive.google.com/open?id=1gM7zY6yLRstaV9ZB5we2S4MnzaYKSKrR>

Selecting shortcut and using technique are to get better success. If you want to get security that you can pass Microsoft MB-820 certification exam at the first attempt, DumpsValid Microsoft MB-820 exam dumps is your unique and best choice. It is the dumps that you can't help praising it. There are no better dumps at the moment. The dumps can let you better accurate understanding questions point of MB-820 Exam so that you can learn purposefully the relevant knowledge. In addition, if you have no time to prepare for your exam, you just remember the questions and the answers in the dumps. The dumps contain all questions that can appear in the real exam, so only in this way, can you pass your exam with no ease.

Microsoft MB-820 Exam Overview:

Certification Vendor:	Microsoft
Exam Name:	Microsoft Dynamics 365 Business Central Developer
Exam Number:	MB-820
Exam Duration:	90 minutes
Passing Score:	700 (on a scale of 1–1000)
Real Exam Qty:	40–60
Available Languages:	English
Exam Price:	\$165 USD
Certificate Validity Period:	1 year
Exam Format:	Multiple choice, Case studies, Drag and drop, Build list, Active screen
Recommended Training:	Microsoft Learn: Dynamics 365 Business Central Developer Learning Paths Pearson VUE
Exam Registration:	Microsoft Learn Exam Registration
Sample Questions:	Microsoft MB-820 Sample Questions
Exam Way:	Online proctored or onsite testing center
Pre Condition:	Recommended: 1–2 years experience developing Business Central solutions, familiarity with AL language, Visual Studio Code, and development lifecycle

MB-820 Review Guide & Reliable MB-820 Braindumps Free

Do you often feel that your ability does not match your ambition? Are you dissatisfied with the ordinary and boring position? If your

answer is yes, you can try to get the MB-820 certification that you will find there are so many chances wait for you. You can get a better job; you can get more salary. But if you are trouble with the difficult of MB-820 Exam, you can consider choose MB-820 guide question to improve your knowledge to pass MB-820 exam, which is your testimony of competence. We believe our latest MB-820 exam torrent will be the best choice for you.

Microsoft MB-820 Exam Syllabus Topics:

Topic	Details
Topic 1	Install, develop, and deploy for Business Central: It delves into the installation and configuration of a Business Central development environment. Moreover, it discusses creating, debugging, and deploying an extension in Business Central.
Topic 2	Describe Business Central: Describing the components and capabilities of Business Central, and describing the core solution and extensions approach for Business Central are focal points of this topic. It also explains the difference between Business Central Online and Business Central on-premises features.
Topic 3	Develop by using AL objects: Building and extending tables and reports is discussed in this topic. It also explains Designing and creating an XMLport. Lastly, it discusses how to work with entitlement and permission set objects.

Microsoft Dynamics 365 Business Central Developer Sample Questions (Q64-Q69):

NEW QUESTION # 64

You create a 'Contoso Post' procedure to send an http POST request in JSON format. You publish the procedure to your environment.

You write the following procedure code:

```

01 procedure ContosoPost(RequestText: Text; var ResponseText : Text; Token: Text)
02 var
03     Content: HttpContent;
04     Headers: HttpHeaders;
05     Client: HttpClient;
06     ResponseMessage: HttpResponseMessage;
07 begin
08     Client.Clear();
09     Content.Clear();
10     Content.WriteFrom(RequestText);
11     Content.GetHeaders(Headers);
12     Headers.Clear();
13     Headers.Add('Content-Type', 'text/plain');
14     Headers.Add('Authorization', 'Bearer ' + Token);
15     if Client.Post('https://contoso.com/api', Content, ResponseMessage) then
16         Content.ReadAs(ResponseText);
17 end;

```

The procedure does not work as expected.

You need to find and fix all errors in HTTP class usage.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Locate code errors

Statement	Yes	No
Replace line 16 with ResponseText := ResponseMessage	☐	☐
In line 13, change the 'text/plain' value to 'application/json'	☐	☐
Replace line 14 with Client.DefaultRequestHeaders.Add('Authorization', 'Bearer ' + Token);	☐	☐
In line 10, replace WriteFrom with ReadAs	☐	☐

Answer:

Explanation:

Locate code errors

Statement	Yes	No
Replace line 16 with <code>ResponseText = ResponseMessage</code>	☒	☐
In line 13, change the 'text/plain' value to 'application/json'	☐	☒
Replace line 14 with <code>Client.DefaultRequestHeaders.Add('Authorization', 'Bearer ' + Token);</code>	☐	☒
In line 10, replace <code>writeFrom</code> with <code>readAs</code>	☐	☒

NEW QUESTION # 65

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result these questions will not appear in the review screen.

A company plans to optimize its permission sets.

The company has the following permission sets:

Permission Set A	Permission Set B
Permissions = tabledata Job = RIMD;	Permissions = tabledata Job = IMD;

You need to provide the following implementation for a third permission set:

- * Create a new Permission Set C that is a composite of Permission Set A and Permission Set B.
- * Assign Permission Set C to a user.

You need to ensure that the user has only read access to the Job table.

Solution: Set the `IncludedPermissionSets` property to Permission Set A and the `ExcludedPermissionSets` property to Permission Set B.

Does the solution meet the goal?

- A. No
- B. Yes

Answer: A

NEW QUESTION # 66

You need to create the Fabrikam Vendor API for the accounting department.

How should you complete the code segment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Using API pages

```

page 50101 "Fabrikam Vendor API"
{
    PageType = API;
    QueryType = API;
    PageExtension 50101 "Fabrikam Vendor API"

    Caption = 'Fabrikam Vendor API';
    APIPublisher = 'fabrikam';
    APIGroup = 'control';
    APIVersion = 'v2.0';
    EntityName = 'vendor';
    EntitySetName = 'vendors';
    SourceTable = Vendor;
    Editable = false;

    DataAccessIntent = ReadOnly;
    InsertAllowed = false;
    ModifyAllowed = false;

    layout
    {
        area(Content)
        {
            repeater(GroupName)
            {
                field(vendorNo; rec."No.")
                {
                    Caption = 'vendorNo';
                }
                field(vendorName; rec.Name)
                {
                    Caption = 'Name';
                }
            }
        }
    }
}

```

Microsoft

PageType = API;
PageType = API; API';
 QueryType = API;
 PageType = List;

```

DataAccessIntent = ReadOnly;
DataAccessIntent = ReadWrite;
DataAccessIntent = ReadOnly;
InsertAllowed = false;
ModifyAllowed = false;

```

```

layout
{
    area(Content)
    {
        repeater(GroupName)
        {
            field(vendorNo; rec."No.")
            {
                Caption = 'vendorNo';
            }
            field(vendorName; rec.Name)
            {
                Caption = 'Name';
            }
        }
    }
}

```

Answer:

Explanation:

Using API pages

```
page 50101 "Fabrikam Vendor API"
page 50101 "Fabrikam Vendor API"
query 50101 "Fabrikam Vendor API"
pageextension 50101 "Fabrikam Vendor API"
{
    PageType = API;
    PageType = API;
    QueryType = API;
    PageType = List;

    Caption = 'Fabrikam Vendor API';
    APIPublisher = 'fabrikam';
    APIGroup = 'control';
    APIVersion = 'v2.0';
    EntityName = 'vendor';
    EntitySetName = 'vendors';
    SourceTable = Vendor;
    Editable = false;
    DataAccessIntent = ReadOnly;
    DataAccessIntent = ReadWrite;
    DataAccessIntent = ReadOnly;
    InsertAllowed = false;
    ModifyAllowed = false;

    layout
    {
        area(Content)
        {
            repeater(GroupName)
            {
                field(vendorNo; rec."No.")
                {
                    Caption = 'vendorNo';
                }
                field(vendorName; rec.Name)
                {
                    Caption = 'Name';
                }
            }
        }
    }
}
```

Microsoft

Explanation:

page 50101 "Fabrikam Vendor API"

```

{
  PageType = API;
  Caption = 'Fabrikam Vendor API';
  APIPublisher = 'fabrikam';
  APIGroup = 'control';
  APIVersion = 'v2.0';
  EntityName = 'vendor';
  EntitySetName = 'vendors';
  SourceTable = Vendor;
  Editable = false;
  DataAccessIntent = ReadOnly;

  {
    area(Content)
    {
      repeater(Group)
      {
        field(vendorNo; rec."No.")
        {
          Caption = 'vendorNo';
        }
        field(vendorName; rec.Name)
        {
          Caption = 'Name';
        }
      }
    }
  }
}

```

NEW QUESTION # 67

Drag and Drop Question

A company plans to deploy Business Central.

The company has the following deployment requirements:

- Use the company hardware architecture to run the deployment.
- Use sandbox environments to develop extensions.
- Allow tenants to connect to Shopify with the standard connector.
- Use Microsoft Power Automate to create a workflow that calls a business event.

You need to identify the deployment type for each requirement.

Which deployment types should you use? To answer, move the appropriate deployment types to the correct requirements. You may use each deployment type once, more than once, or not at all.

You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Deployment types	Deployment requirements	Deployment type
On-premises	Run on the company hardware.	
Online	Use sandbox environments for extensions.	
	Allow connection to Shopify.	
	Create a workflow.	

Answer:

Explanation:

Deployment types

On-premises
Online

Deployment requirements

Requirement

Run on the company hardware.

Use sandbox environments for extensions.

Allow connection to Shopify.

Create a workflow.

Deployment type

On-premises
Online
Online
Online

Explanation:

When deploying Microsoft Dynamics 365 Business Central, there are two main deployment types to consider: On-premises and Online.

On-premises Deployment:

The requirement to use the company's hardware architecture implies a need for an on-premises deployment. This is because on-premises deployment allows for the application to be installed and run directly from the company's in-house servers and computing infrastructure, giving full control over the environment and data.

Online Deployment:

The use of sandbox environments for developing extensions is a feature provided in the online version of Business Central. Sandbox environments are a part of the service offered in the cloud-based version, which allows developers to test and develop without affecting the live environment. Connection to Shopify with the standard connector implies an online deployment.

The standard connector is typically a cloud-based service that allows Business Central to connect with other cloud platforms like Shopify, which is more seamlessly integrated with the online version. Lastly, the use of Microsoft Power Automate to create a workflow that calls a business event suggests an online deployment. Power Automate is a cloud-based service designed to create automated workflows between applications and services - which aligns with the services provided by the online version of Business Central.

NEW QUESTION # 68

You are creating an entitlement object in Business Central to enable transactability for AppSource apps.

You must map the entitlement object to a plan in Partner Center.

You need to select the value of the Type property to use in the entitlement object.

Which value should you use?

- A. Role
- B. Unlicensed
- C. Implicit
- D. PerUserServicePlan

Answer: D

Explanation:

In Business Central, when creating an entitlement object to enable transactability for AppSource apps and mapping it to a plan in Partner Center, the Type property of the entitlement object should be set to PerUserServicePlan (A). The PerUserServicePlan type is used to define an entitlement that is based on a service plan, which is typically how transactability features are managed for apps distributed through AppSource. This type of entitlement allows for the mapping of specific features or capabilities of the app to a

service plan in Partner Center, enabling granular control over what users are entitled to use based on their subscription. The other values, such as Implicit (B), Unlicensed (C), and Role (D), are used in different contexts and do not apply to the scenario of mapping an entitlement object to a plan for AppSource apps.
