# PL-300 Reliable Real Test | PL-300 Test Passing Score

BONUS!!! Download part of RealExamFree PL-300 dumps for free: https://drive.google.com/open?id=1iACRRQTF4tUW_ZWih6sCtAbmBjV_h07J

Our reliable PL-300 question dumps are developed by our experts who have rich experience in the fields. Constant updating of the PL-300 prep guide keeps the high accuracy of exam questions thus will help you get use the PL-300 Exam quickly. During the exam, you would be familiar with the questions, which you have practiced in our PL-300 question dumps. That's the reason why most of our customers always pass exam easily.

It is universally acknowledged that the pass rate is the most persuasive evidence to prove how useful and effective a kind of PL-300 practice test is. In terms of our PL-300 training materials, the pass rate is one of the aspects that we take so much pride in because according to the statistics from the feedbacks of all of our customers, under the guidance of our PL-300 Preparation materials, the pass rate among our customers has reached as high as 98% to 100%, which marks the highest pass rate in the field. So just feel rest assured to buy our PL-300 study guide!

PL-300 Reliable Real Test Exam | PL-300 Test Passing Score – 100% free

With our Microsoft PL-300 practice materials, and your persistence towards success, you can be optimistic about your PL-300 real dumps. Even you have bought our Microsoft PL-300 learning braindumps, and we will send the new updates to you one year long. On one hand, all content can radically give you the best backup to make progress.

Microsoft Power BI Data Analyst Sample Questions (Q111-Q116):

NEW QUESTION # 111
Your company plans to use Power BI for 20 users in the sales department. The users will perform the following tasks:
* Access a published Power BI app
* Modify reports in an app workspace
* Share dashboards created in My Workspace
You need to identify which Power BI licenses are required for the tasks. The solution must use the Power BI (free) licenses, whenever possible.
Which license should you identify for each task? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Explanation:
References:
https://docs.microsoft.com/en-us/power-bi/service-create-distribute-apps

NEW QUESTION # 112
You create a data model in Power BI.
Report developers and users provide feedback that the data model is too complex.
The model contains the following tables.
☐
The model has the following relationships:
*There is a one-to-one relationship between Sales_Region and Region_Manager.
*There are more records in Manager than in Region_Manager, but every record in Region_Manager has a corresponding record in Manager.
*There are more records in Sales_Manager than in Sales_Region, but every record in Sales_Region has a corresponding record in Sales_Manager.
You need to denormalize the model into a single table. Only managers who are associated to a sales region must be included in the reports.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.
NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.
☐

Answer:

Explanation:
☐
Explanation
1.Merge [Region_Manager] and [Manager] by using an inner join.
3.Merge [Sales_Region] and [Sales_Manager] by using an inner join.
6.Merge [Sales_Region] and [Region_Manager] by using an inner join.

NEW QUESTION # 113
Your company plans to completely separate development and production assets such as datasets, reports, and dashboards in Microsoft Power BI.
You need to recommend an application lifecycle strategy. The solution must minimize access to production assets and prevent end users from viewing the development assets.
What should you recommend?

- A. Create production reports in a separate workspace that uses a shared dataset from the development workspace. Grant the end users access to the production workspace.
- B. In one workspace, create separate copies of the assets and append DEV to the names of the copied assets. Grant the end users access to the workspace.
- C. Create a workspace for development and a workspace for production. From the production workspace, publish an app.
- D. Create one workspace for development. From the new workspace, publish an app for production.

Answer: C

Explanation:
Explanation
Use different work stages (Development, Test, and Production).
Deploy from the Development workspace.

NEW QUESTION # 114
Case Study 2 - Contoso Ltd
Overview
Existing Environment
Contoso, Ltd. is a manufacturing company that produces outdoor equipment Contoso has quarterly board meetings for which financial analysts manually prepare Microsoft Excel reports, including profit and loss statements for each of the company's four business units, a company balance sheet, and net income projections for the next quarter.

Data and Sources

Data for the reports comes from three sources. Detailed revenue, cost and expense data comes from an Azure SQL database. Summary balance sheet data comes from Microsoft Dynamics 365 Business Central. The balance sheet data is not related to the profit and loss results, other than they both relate to dates.

Monthly revenue and expense projections for the next quarter come from a Microsoft SharePoint Online list. Quarterly projections relate to the profit and loss results by using the following shared dimensions: date, business unit, department, and product category.

Net Income Projection Data

Net income projection data is stored in a SharePoint Online list named Projections in the format shown in the following table.

Revenue projections are set at the monthly level and summed to show projections for the quarter.

Balance Sheet Data

The balance sheet data is imported with final balances for each account per month in the format shown in the following table.

There is always a row for each account for each month in the balance sheet data.

Dynamics 365 Business Central Data

Business Central contains a product catalog that shows how products roll up to product categories, which roll up to business units. Revenue data is provided at the date and product level. Expense data is provided at the date and department level.

Business Issues

Historically, it has taken two analysts a week to prepare the reports for the quarterly board meetings. Also, there is usually at least one issue each quarter where a value in a report is wrong because of a bad cell reference in an Excel formula. On occasion, there are conflicting results in the reports because the products and departments that roll up to each business unit are not defined consistently.

Planned Changes

Contoso plans to automate and standardize the quarterly reporting process by using Microsoft Power Bl. The company wants to how long it takes to populate reports to less than two days. The company wants to create common logic for business units, products, and departments to be used across all reports, including, but not limited, to the quarterly reporting for the board.

Technical Requirements

Contoso wants the reports and datasets refreshed with minimal manual effort The company wants to provide a single package of reports to the board that contains custom navigation and links to supplementary information.

Maintenance, including manually updating data and access, must be minimized as much as possible.

Security Requirements

The reports must be made available to the board from powerbi.com. A mail-enabled security group will be used to share information with the board.

The analysts responsible for each business unit must see all the data the board sees, except the profit and loss data, which must be restricted to only their business unit's data. The analysts must be able to build new reports from the dataset that contains the profit and loss data, but any reports that the analysts build must not be included in the quarterly reports for the board. The analysts must not be able to share the quarterly reports with anyone.

Report Requirements

You plan to relate the balance sheet to a standard date table in Power Bl in a many-to-one relationship based on the last day of the month. At least one of the balance sheet reports in the quarterly reporting package must show the ending balances for the quarter, as well as for the previous quarter.

Projections must contain a column named RevenueProjection that contains the revenue projection amounts. A relationship must be created from Projections to a table named Date that contains the columns shown in the following table.

The relationships between products and departments to business units must be consistent across all reports.

The board must be able to get the following information from the quarterly reports:
- Revenue trends over time
- Ending balances for each account
- A comparison of expenses versus projections by quarter
- Changes in long-term liabilities from the previous quarter
- A comparison of quarterly revenue versus the same quarter during the
prior year

Hotspot Question
You need to grant access to the business unit analysts.
What should you configure? To answer, select the appropriate options in the answer area. NOTE:
Each correct selection is worth one point.

Answer:

Explanation:

Explanation:
Box 1: The Viewer role to the workspace
The Viewer role gives a read-only experience to its users. They can view dashboards, reports, or workbooks in the workspace, but

can't browse the datasets or dataflows. Use the Viewer role wherever you would previously use a classic workspace set to "Members can only view Power BI content".

Box 2: Build

The analysts must be able to build new reports from the dataset that contains the profit and loss data.

Scenario: The reports must be made available to the board from powerbi.com.

The analysts responsible for each business unit must see all the data the board sees, except the profit and loss data, which must be restricted to only their business unit's data. The analysts must be able to build new reports from the dataset that contains the profit and loss data, but any reports that the analysts build must not be included in the quarterly reports for the board. The analysts must not be able to share the quarterly reports with anyone.

NEW QUESTION # 115

You are creating a Power Bi model and report.

You have a single table in a data mode) named Product Product contains the following fields:

* ID
* Name
* Color
* Category
* Total Sales

You need to create a calculated table that shows only the top eight products based on the highest value in Total Sales.

How should you complete the DAX expression? To answer, drag the appropriate values to the coned targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Answer:

Explanation:
