Acquia Certified Site Builder - Drupal 8 認定 Acquia-Certified-Site-Builder-D8 試験問題 (Q36-Q41):

質問 # 36

Your Drupal site contains a contact form for anonymous users, with the following fields: subject (text plain), name (text plain), email (Email), message (text long), attachment (file) All fields are without any restrictions and none is mandatory to send the form What is the potential security threat with this form?

- A. Anonymous users can upload corrupted or virus-infected files to your server
- B. Putting a very long text into the message field, may timeout the form submit and open up options for DDoS attacks
- C. There are no issues with this form
- D. Anonymous users should not have access to forms.

正解: D

質問 # 37

You have created a new Comment type, but when you try to add a comment field to a Content type, you can't select your new Comment type.

What could be the problem?

- A. Custom comment types can only be added to default Content types
- B. "Allow comments" is not checked in the Content type settings
- **C. In your new Comment type, you didn't select "Content" as the Target entity type**
- D. You need to clear the site caches to see the new option

正解: C

質問 # 38

You are asked to implement a "employee of the month" block into your corporate website. The block should show name and picture of the employee and should be editable over the normal block layout. All the employees are users of the website. How do you implement the block?

- A. Create a user view mode with user name and picture. Add a user reference field to one of your block types and let the user reference field use the new user view mode.
- B. Add a custom block and select the type "user account information", activate the user name and picture fields.
- **C. Create a new Users View with user name field and user picture and an exposed filter on uid. Add a block display to the view and place the block in the block layout.**
- D. Install the user_blocks module from Drupal.org, select the fields you need and place block via block layout.

正解: C

質問 # 39

Your company website has a form "Contact Us" through which users can submit questions or feedback to the company. This form uses the site-wide contact form that comes with Drupal 8. The News department within your company has requested their own contact form so that site visitors can specify additional information about a potential story. How can you build the News department their own contact form with an additional field, using only Drupal core modules?

- A. This request is best handled with a contributed module such as Webform.
- B. Update the existing contact form with a checkbox ("Send message to News team"); a "Story Information" field, and conditional fields to route the message accordingly.
- C. Under Structure > Contact Forms, add the News department's email address to the recipients of the existing contact form, and a new field "Story information."
- **D. Under Structure > Contact Forms, add a new contact form with the News department's email address as the recipient, and a new field: "Story information."**

正解: D

質問 # 40

You manage two sites. A public site ("Prod"), which is live to the world, and a development site ("Dev"), for building new features and testing updates. Dev is a clone of Prod. You have created a new content type, fields and View on Dev. After testing and ensuring that everything is working correctly on Dev, you would like to deploy these changes to Prod. How will you do this using only Drupal core modules?

- **A. To minimize data loss, it is best to recreate the steps manually on Prod that you used to setup the content type, fields, and View on Dev.**
- B. You must use a contributed module such as Features to import and export configurations between two sites.
- C. On Dev, go to the Configuration section of your content type admin interface. Export the content type configuration. Repeat for fields and Views. On Prod, import your content type archive into the content type Configuration section. Repeat for fields and Views.
- D. On Dev, go to the Configuration synchronization interface. Export an archive of the full site configuration. Go to Configuration synchronization on Prod. Upload your site archive. Click "Import all."

正解: A
