Latest 1z0-1077-25 Questions, Exam 1z0-1077-25 Preview

If moving up in the fast-paced technological world is your objective, Oracle is here to help. The excellent Oracle Order Management Cloud Order to Cash 2025Implementation Professional (1z0-1077-25) practice exam from Oracle can help you realize your goal of passing the Oracle Treasury with Oracle Order Management Cloud Order to Cash 2025Implementation Professional (1z0-1077-25) certification exam on your very first attempt. Most people find it difficult to find excellent Oracle Treasury with Oracle Order Management Cloud Order to Cash 2025Implementation Professional (1z0-1077-25) exam dumps that can help them prepare for the actual Oracle Order Management Cloud Order to Cash 2025Implementation Professional (1z0-1077-25) exam.

Oracle Order Management Cloud Order to Cash 2025Implementation Professional Sample Questions (Q123-Q128):

NEW QUESTION # 123
Your organization prices customer sales orders using multiple conditional attributes. Pricing Cloud has a feature that allows you to get values for these attributes on a pricing matrix according to a value set. You use the Domain Type attribute in a pricing matrix or matrix class to specify the value set.
Which configuration is NOT supported by this feature?

- A. Use values from a value set in a matrix.
- B. Use value set values to determine pricing algorithm.
- C. Use new value set domain type as part of a condition.
- D. Use value set values to determine pricing segment.

Answer: B

Explanation:
Use value set values to determine pricing algorithm.

Pricing Cloud does not support using value set values to determine pricing algorithm. Pricing algorithm is a predefined formula that calculates the price of an item or service. You can use value set values to determine pricing segment, which is a group of customers who share common characteristics and pricing preferences.

You can also use new value set domain type as part of a condition, which is a rule that evaluates whether a pricing strategy, segment, or matrix applies to a transaction. You can also use values from a value set in a matrix, which is a table that defines the price of an item or service based on one or more attributes.

NEW QUESTION # 124

Your organization requires you to include Extensible Flexfield values into your sales order approval rules.
Which three order entities support the use of Extensible Flexfield attributes in approval rules for sales orders?

- A. Process
- B. Header
- C. Fulfillment Line
- D. Delivery
- E. Line

Answer: B,C,E

Explanation:
Extensible Flexfield attributes are custom attributes that you can add to Order Management entities to capture additional information that is specific to your business needs. You can use these attributes in approval rules for sales orders to define conditions and actions based on the values of the attributes. The order entities that support the use of Extensible Flexfield attributes in approval rules for sales orders are Header, Line, and Fulfillment Line. These entities have predefined Extensible Flexfield categories that you can configure and deploy in the Setup and Maintenance work area. You can also access and update these attributes in the Order Management work area.

NEW QUESTION # 125

Identify the transformation type in which a transactional item attribute is used for transforming a product. The transformation may be added to the existing product or replace the product on the sales order for a CTO item.

- A. Attribute to Attribute
- B. Product to Product
- C. Context to Product
- D. Attribute to Product

Answer: D

Explanation:
An attribute-to-product transformation uses transactional attributes to transform an attribute to an item number. It can add the transformation to an existing item or replace the item that the source order references.
Assume your company receives orders for an MP3 player that includes a Color attribute and a Size attribute, and that you must use a combination of these attributes to reference an item number. In the following example, a transformation rule transforms the Color and Size attributes of the Mini Plus item to the VIS481 item. Order Management displays VIS481 on the order line.

NEW QUESTION # 126

Your company is using Order Management Cloud to capture orders, and has integrated with a legacy inventory application for order fulfillment. A fulfillment request needs to be aggregated and sent to an external inventory application.
What step would you perform to aggregate the request?

- A. Create a new custom task by using the Supply Task Layer.
- B. Configure a fulfillment task routing rule with aggregation criteria based on time limit or total number of lines.
- C. Create a new custom task by using the Fulfillment Task Layer.
- D. Create a new custom task by using the Shipment Task Layer.

Answer: B

NEW QUESTION # 127
Your company wants to notify the external system when there is a high possibility that an order is going to be delayed.
Which four steps are required to invoke the external system connector to notify that an order is going to be delayed? (Choose four.)

- A. Set up the lead time for the orchestration steps in the orchestration process definition.
- B. Register the web service connector.
- C. Create a routing rule for the orchestration process task.
- D. Set up the Jeopardy threshold for the orchestration process task.
- E. Enable a business event trigger point for Jeopardy and associate the connector.
- F. Set up the Use Defined Lead time in the Available To Promise Rule.

Answer: A,C,D,E

NEW QUESTION # 128
......
